WAGO PLC Visualization is an intuitive solution for modern automation projects. It runs directly on your controller, HMI, or virtually, delivering a user-friendly, browser-based interface for rapid implementation of customized operating concepts. With responsive design, real-time data, a WYSIWYG editor, and drag-and-drop functionality, you can keep your processes in view at all times — without the need for additional software installations.Thanks to CODESYS support, WAGO PLC Visualization integrates seamlessly into existing systems and scales flexibly. Advanced features such as alarm management, trend analysis, user roles, and database integration make it a powerful tool for diverse industries — from building automation to industrial production.WAGO PLC Visualization meets relevant security requirements and is secure by design. Your data remains fully under your control while you enjoy the freedom to customize your visualization.

Functional Advantages:

- Direct on the Controller: Local visualization without extra steps or additional software
- Ideal for Small Projects: Perfect for compact machine applications
- Cross-Industry Compatibility: Suitable for industrial, energy, and building automation
- Quick Start: Create visualizations via drag-and-drop in just a few steps

Données du logiciel

Appareils supportés	WAGO CC100 WAGO PFC200 / PFC300 WAGO Web Panel (HMI)

Livraison

Génération de licence	DRM

Données commerciales

Unité d'emb. (SUE)	1 pce(s)
Type d'emballage	pas de données
Pays d'origine	QU
GTIN	4066966835991
Numéro du tarif douanier	88888888888

Conformité environnementale du produit

État de conformité RoHS	Compliant,No Exemption
