

Energy for Change

Freshen the air in your home with Daikin

Daikin Air Purifiers

Air purifiers

For a clean, fresh, healthy home

Fresh air shouldn't be reserved for when we spend our summer months outdoors. Bring the outside in with a **Daikin Air Purifier**, perfect your home climate

We promise you air that's three times cleaner, healthier and fresher with our advanced air purifiers. And what's more, our patented Streamer technology inactivates 99.98% of the human coronavirus HCoV-229E* – giving you pure peace of mind.

A cleaner, healthier home

According to Allergy UK, we spend around 90% of our time indoors. But our indoor spaces can be as much as 10 times more polluted than the air outside.

Our purification technology helps to minimise asthma and allergy symptoms by capturing fine particles from the air in your home. From dust to pollen, to airborne irritants caused by smoking, cleaning and building works, our humidifiers provide extra protection from dry air and viruses, promoting healthy skin and airways too.

Proven to protect

We all want to keep our families safe – especially when it comes to the very young, the elderly, allergy sufferers and those with chronic health conditions. Our range of air purifiers has been designed with your whole family's safety in mind, offering extra protection for the people you care about.

Our patented Streamer technology has been proven to inactivate airborne bacteria and viruses – including up to 99.98% of the human coronavirus HCoV-229E.*

* Source: Institut Pasteur de Lille test report 2021.

Testing laboratory 'Institut Pasteur de Lille' France, evaluated the effectiveness of Daikin's Air Purifiers against respiratory viruses:

- HCoV-229E (of the same family as SARS-CoV-2, the coronavirus causing the COVID-19 pandemic)

- Influenza A virus subtype H1N1 (causing seasonal flu)

Daikin Air Purifiers have the Allergy UK Seal of Approval for their efficiency, eliminating all the most common airborne pollutants in your home.

- › Bacteria and viruses – including up to 99.98% of human coronavirus HCoV-229E*
- › Contamination from sneezing and coughing
- › Dust, allergens and debris from building materials
- › Odours and vapours from cleaning products
- › Outdoor pollution, including pollen and traffic fumes

Daikin Air Purifier

Our patented streamer technology is a revolution in air purification technology. Designed for near-silent but powerful cleaning capability in a compact unit, you no longer need to open windows and doors for fresh air – just switch your unit on for instant peace of mind.

- › Whisper-quiet powerful filtration for spaces of up to 41m²
- › Small, compact, space-saving design
- › Powerful suction, for fast, efficient air purification
- › Up to 10-year lifespan on dust filters
- › No complicated cleaning – simply use a vacuum or damp cloth

Daikin Humidifying Air Purifier

With exceptional cleaning power, the Daikin Humidifying Air Purifier is quiet but effective. Its built-in humidifier has been engineered to create a balanced home environment that offers extra protection from airborne viruses.

- › Simultaneous purifying and humidifying ability
- › Compact, space-saving design
- › 'Econo mode' feature – for budget-friendly performance
- › Up to 10-year lifespan on dust and humidifying filters
- › Powerful humidification for extra protection from dry air and viruses

Notes

This image shows a single page of white paper with horizontal blue lines. The lines are evenly spaced and run across the width of the page, typical of notebook paper or a document template. There are no margins, text, or other markings on the page.

Discover your energy for change

By choosing Daikin, you're choosing more than our world-leading technology. More than our commitment to innovation. Even more than fresh air for your family. You're choosing a healthy home environment to protect those you love.

Be the energy for change.
