## Installation recommendations

See "Basic technical concepts".
To observe the required clearances and creepage distances in the connection area :

- above 100 V : an insulating plate is needed when the switch is mounted on an uninsulated surface.
- above 250 V : insulating plates are needed between switches when ganging.

## How to order

Use the 8 digit part numbers when they are defined
Other cases, precise: Type of microswitch - Degree of protection - Connection - Actuator* - Mounting accessories* - Adaptation* * if needed Example: 83240 IP67 W3/90B LG PE

Examples of special adaptations

Two-pole DPDT assembly with linked levers

In-line quick-connect terminals

Short roller lever

conomic version (839930): SPDT form Za without positive opening, $\varnothing 3.2$ mounting holes on top face, screw terminals
