PANDUIT

PanMPO Connector Changeover Instructions (For PanMPO Connectors only)

See reverse side for Pulling Eye Removal Instructions (if applicable)

INSTALLATION INSTRUCTIONS

FS074B

Polarity Changeover

1

Squeeze

Key

Arc cut-outs aligned

Key Up
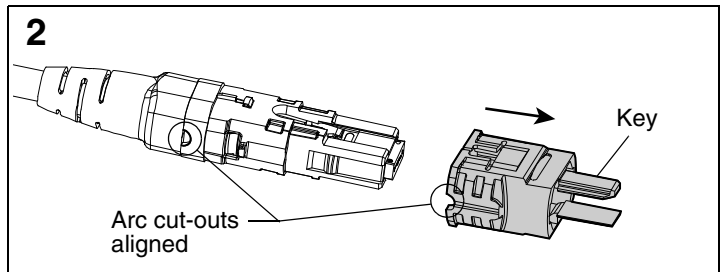

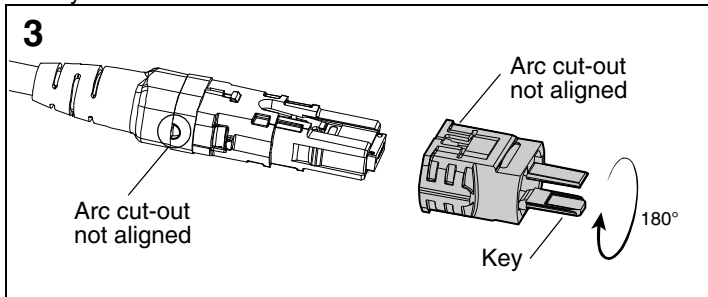

Squeeze both sides of outer housing at the back end evenly until you hear an audible click.

2

Key

Arc cut-outs aligned

Pull outer housing off connector.

3

Arc cut-out not aligned

Arc cut-out not aligned

Key

180°

Rotate outer housing 180° so arc cut-out is on the opposite side.

4

Key Down

Aligned — Method A — Aligned

Not Aligned — Method B — Aligned
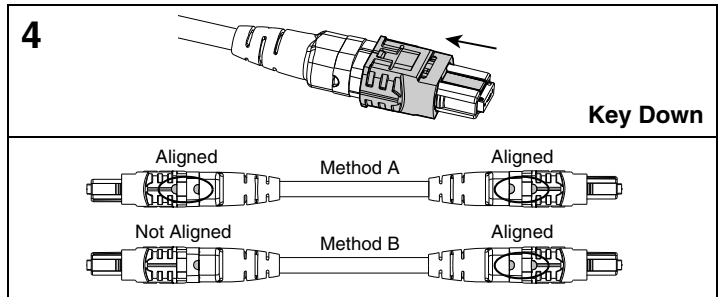

Re-install outer housing until you hear a faint audible click.
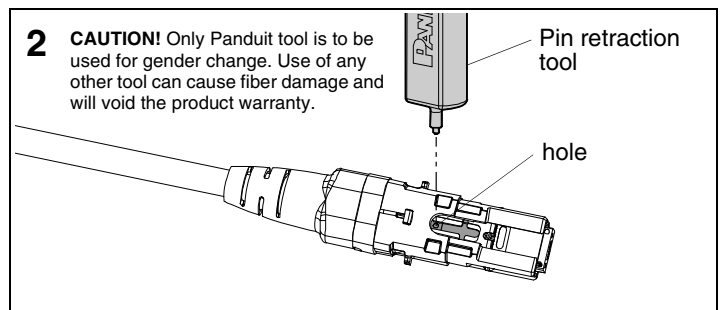

5

Aligned

Aligned
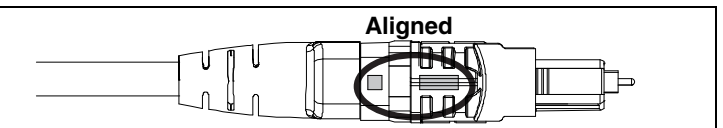

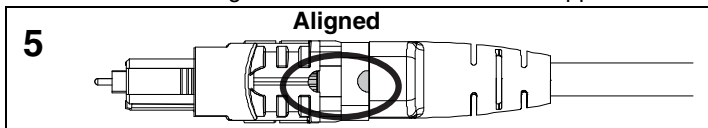

Singlemode only. The polarity of singlemode connectors must not be altered. When assembling the outer housing verify that the arc cut-outs and white dashes align on both sides of the PanMPO housing.
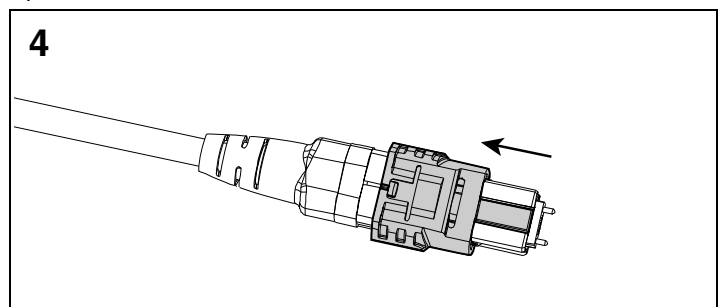

Gender Changeover

1

Female = Pins retracted

Pins retracted
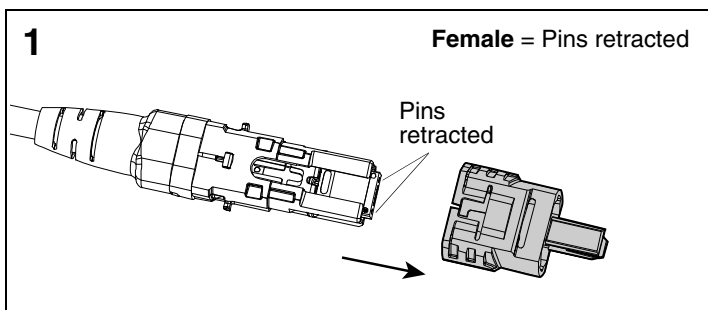

Remove outer housing per polarity changeover instructions.

2

CAUTION! Only Panduit tool is to be used for gender change. Use of any other tool can cause fiber damage and will void the product warranty.

Pin retraction tool

hole

Locate hole in the inner housing on the slotted side and position pin retraction tool over the hole.

3

Gently

Male = Pins extracted

Pins extracted
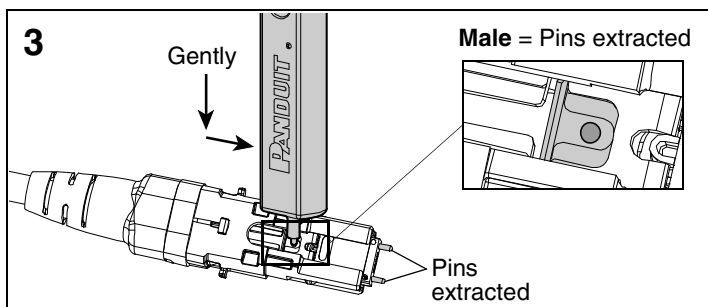

Insert tool into hole, press down gently, and push forward to advance connector pins to the male state. Repeat process in opposite direction to retract pins for female state.
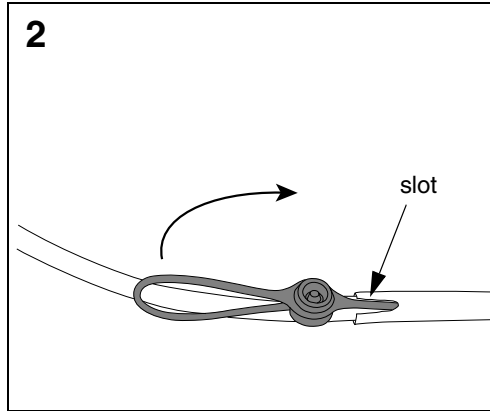

4

Re-install outer housing in the correct orientation. See polarity changeover instructions above.
