

TX6A™ Category 6A U/UTP Outside Plant (OSP) Copper Cable

specifications

Category 6A OSP cable shall meet the IEC 61156-5 and ANSI/TIA-568.2-D Category 6A component standards. The conductors shall be 23 AWG with foamed polyethylene insulation. The cable shall have a gel-filled construction to prevent moisture migration in underground and wet applications and a wide temperature range for extreme weather environments. The copper conductors shall be twisted in pairs, separated by a pair separator, covered with an alien crosstalk barrier and a UV-resistant and abrasion-resistant polyethylene (PE) jacket. Alien crosstalk barrier should not be grounded. **Product is to be used in duct and conduit installations only. Not to be used in aerial or direct burial installations.**
