

## Tie Mount Wing Clamp

The tie mount wing clamp provides a heavy-duty mounting solution that anchors a cable tie for a reinforced securing means over a bundle. This solution can be used to secure cable bundles, loomed coolant hoses, transmission hoses, and other heavy-duty cabling needs. Typical applications include but are not limited to, heavy-duty trucking, off-road vehicles, agriculture, and construction equipment. This also provides a good wire management solution for solar construction, especially suited for attachment to ground-mount frames.

### Key Features and Benefits

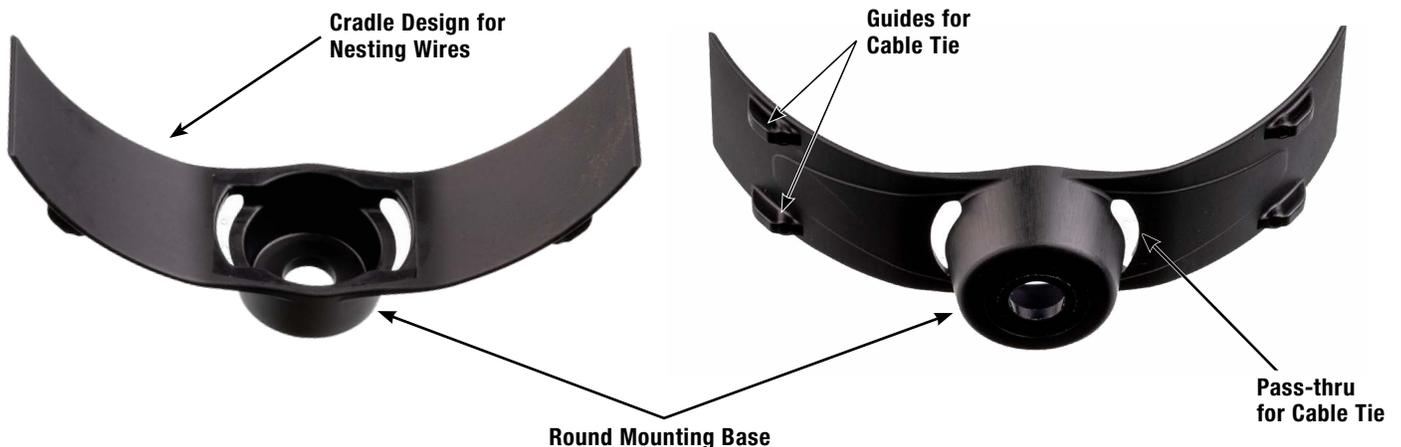

<b>Round mounting base:</b>	Reduces plastic stress points where wings attach to the base, allowing for smaller bundling diameter
<b>Cradle design:</b>	Provides secured nesting surface for cables
<b>Up to 5" bundle capacity<sup>2</sup></b>	Works with cable tie to give reinforced securing means over the bundle. Wings overlap to give an effective minimum bundle diameter <sup>1</sup> capacity of 3/4"

<sup>1</sup>Can go lower than 3/4" as wings of the winged cable mount overlap, but note that the clamp will be limited in achieving desired tightness around the bundle at the smaller diameters.

<sup>2</sup>Limited only by the length of the cable tie used.

### Technical Information

<b>Material:</b>	Impact Modified, Heat Stabilized, Weather Resistant Nylon 6.6
<b>Continuous use temperature:</b>	-60°C to 115°C; -76°F to 239°F
<b>UL 94 Flammability rating:</b>	HB
<b>Bundle Diameter:</b>	The tie mount wing clamp can accommodate working bundle range of 3/4" to 5" (9mm to 127mm)
<b>Hole size:</b>	1/4 (M6) bolt
<b>Compatibility:</b>	Compatible with cable ties cross-section — Standard, Light Heavy, Heavy, and Extra-Heavy Especially suited for PLWS2EH-, PLWS3EH- and PLWS4EH-TL350 wide strap ties If using PLWS-ties, recommend using GTH-E tool to optimize cable tie tension around the bundle
