

QuickNet™ 40 to 10GbE Fiber Optic Cassettes

technical information

To meet the needs for 10 to 40GbE applications, Panduit offers QSFP+ to Four SFP+ Fiber Optic Cassette Assemblies. As part of the Panduit High Speed Data Transport (HSDT) solution, these cassettes provide a streamlined and flexible patching solution for interconnecting or cross-connecting high speed 40GbE switches and servers with parallel signals to 10GbE equipment with duplex signals. The cassettes feature two rear MTP* port connections for 40GBASE-SR4 transceivers and 8 Duplex LC ports in front for connecting to 10GBASE-SR transceivers. End-to-end (HSDT) solutions from Panduit deliver enhanced availability, agility, and security. Visit www.panduit.com/hsdt to learn more about how these solutions help customers manage risk across their physical infrastructure.
