Product Environmental Profile

Masterpact MTZ1 16H1 three pole draw out circuit breaker with Micrologic 5.0X control unit

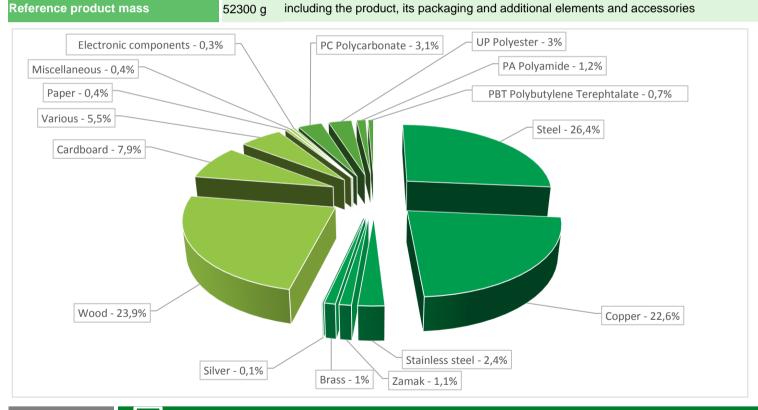

General information

Representative product	Masterpact MTZ1 16H1 three pole draw out circuit breaker with Micrologic 5.0X control unit
Description of the product	The Masterpact MTZ1 16 H1 three pole draw out circuit breaker is designed to guarantee the protection of a low voltage electrical distribution system with assigned voltage up to 690VAC and rated current of 1600A. The breaker can be remotely operated using closing XF release and opening MX release. The Micrologic 5.0X control unit fitted with the circuit breaker enhances protection of electrical installation under fault conditions.
Functional unit	Protect during 20 years the installation against overloads and short-circuits in circuit with assigned voltage up to 690VAC and 1600A rated current. This protection is ensured in accordance with the following parameters: - Number of poles: 3 - Rated service breaking capacity Ics at 440VAC = 42 kA (Ics=100%Icu following IEC 60947-2) - Tripping curve: long time, short time and instantanous protections

Constituent materials

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page

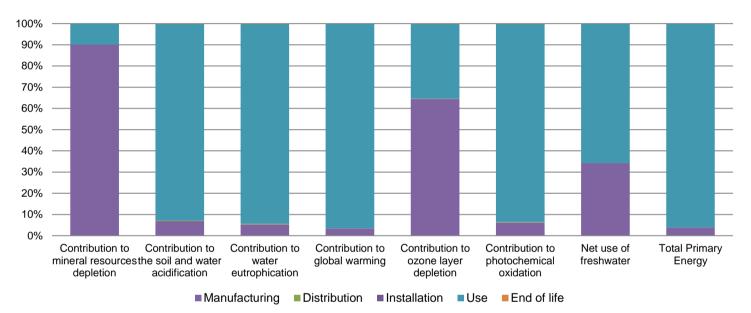

Additional environmental information

Distribution (20g) and steel (219g). Product distribution optimised by setting up local distribution centres Installation The Masterpact MTZ1 16 H1 3P draw out circuit breaker does not need any special installation operation Use The end user must refer to maintenance guide of the product in order to do the appropriate maintenance operations. The Micrologic Control Unit has to be replaced every 10 years and the display screen of Micrologic Control Unit ever years. End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains a battery (10g) and 6 electronic cards (29g, 27g, 48g, 10g and 2x10g) that should be separate from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document whi is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Based on "ECO'DEEE recyclability and recoverability calculation method"	The Masterpact MTZ1 16H1 three pole draw out circuit breaker with Micrologic 5.0X control unit presents the following relevent environmental aspects							
DistributionPackaging weight is 16,8kg, consisting of pallet wood (12,3Kg), cardboard (4,066Kg), paper (200g) polyethylene film (20g) and steel (219g). * represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.5, database version 2016-11.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
