

Product Environmental Profile

**Connection Module 20A
Lexium MC12 multi carrier**

General information

Representative product

Connection Module 20A Lexium MC12 multi carrier - LXMMCACMD02S100

Description of the range

Lexium MC12 multi carrier is an innovative transport system to be used in machines. It uses latest linear motion technology to move products individually through the machine. These individual movements allow for new machine designs making machines faster, more flexible and space efficient.

This range consists of LXMMCACM connection module for LXMMC12M long stator motors.

The environmental impacts of this referenced product are representative of the impacts of the other products of the range which are developed with a similar technology.

Functional unit

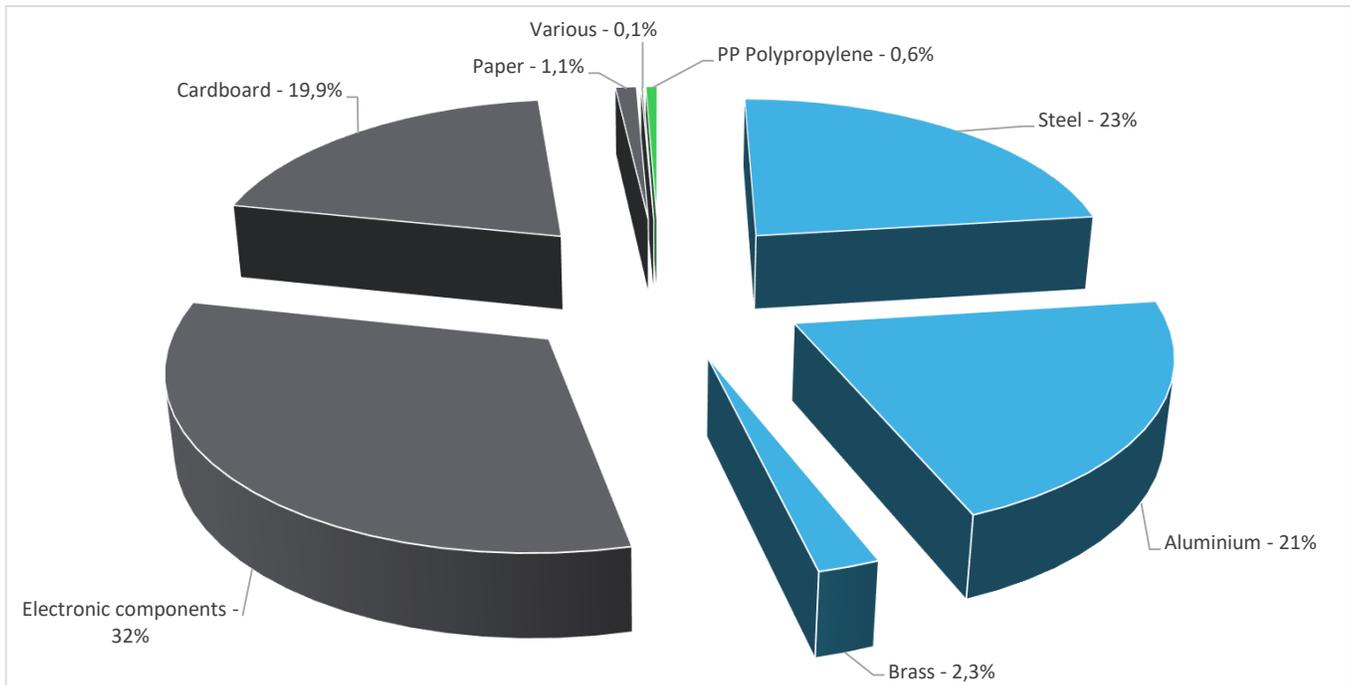

To ensure the overvoltage protection, and the supply voltage monitoring by connecting track to power supply installed between two segments at 9W with a 100% use rate during 10 years.

Constituent materials

Reference product mass

970 g including the product, its packaging and additional elements and accessories

| | |
|----------|-------|
| Plastics | 0,6% |
| Metals | 46,3% |
| Others | 53,1% |

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate– BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The Connection Module 20A Lexium MC12 multi carrier presents the following relevant environmental aspects

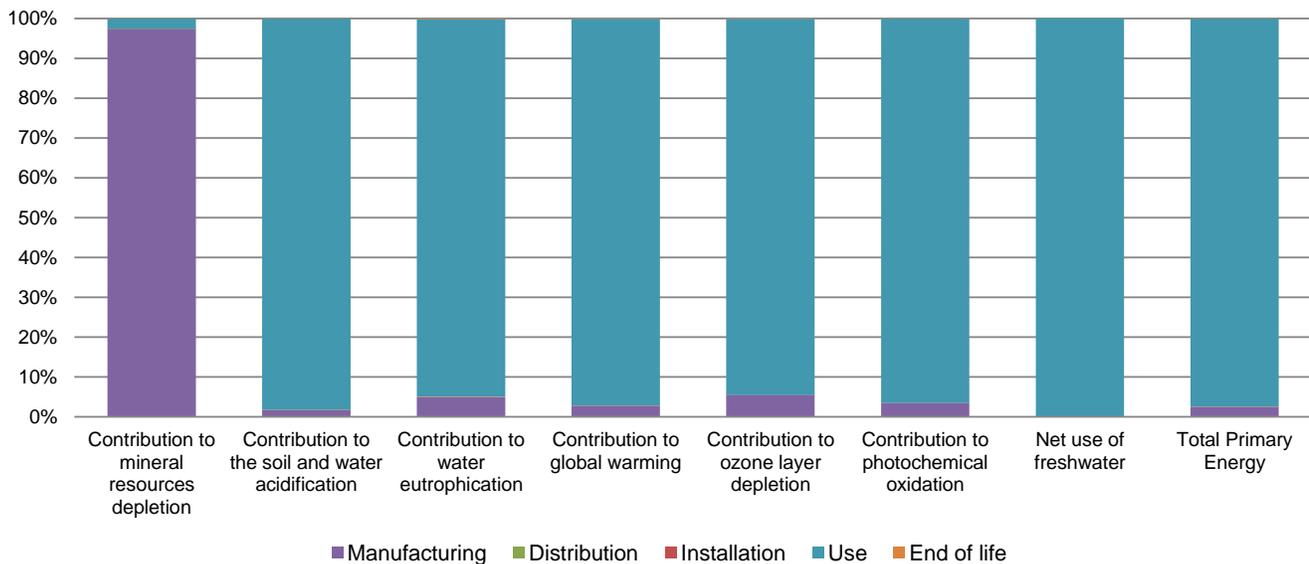

| | |
|----------------------|--|
| Manufacturing | Manufactured at a Schneider Electric production site ISO14001 certified |
| Distribution | Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 205,8 g, consisting of cardboard (95%) and paper (5%) Product distribution optimised by setting up local distribution centres |
| Installation | Does not require any installation operation |
| Use | The product does not require special maintenance operations. |
| End of life | End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains 2 electronic cards (300g) and electrolytic capacitor (60g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 44% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME). |

Environmental impacts

| | | | | |
|--|---|--|--|--|
| Reference life time | 10 years | | | |
| Installation elements | does not require any specific installation operation | | | |
| Use scenario | The product is in active mode 100% of the time with a power use of 9W for 10 years. | | | |
| Geographical representativeness | Europe | | | |
| Energy model used | Manufacturing | Installation | Use | End of life |
| | Energy model used: Germany | Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27 | Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27 | Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27 |

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.9.3, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

According to this environmental analysis, proportionality rules may be used to evaluate the impacts of other products of this range.

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
