Product Environmental Profile

MUREVA STYL 2-WAY SWITCH WITH LED SURFACE MOUNTING

General information

Representative product

MUREVA STYL 2-WAY SWITCH WITH LED SURFACE MOUNTING - MUR35024

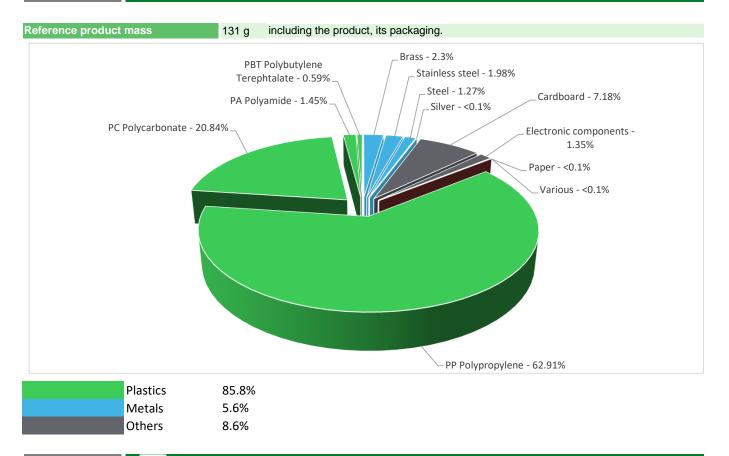

Description of the product

The main purpose of the Mureva Styl Switch product is to give a solution for the control of Electricity and Energy consumption Indicator light on switch rocker.

Functional unit

Establish, support and interrupt for 20 years rated currents in normal conditions of circuit characterized by the current 10A, including any conditions specified for overload in operation characterized by the current 10A, for the operating voltage 250V for a specified time with IP55 protection in accordance with the standard IEC 60529 and IK08 protection in accordance with the standard IEC 62262.

Constituent materials

E | Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate - BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page

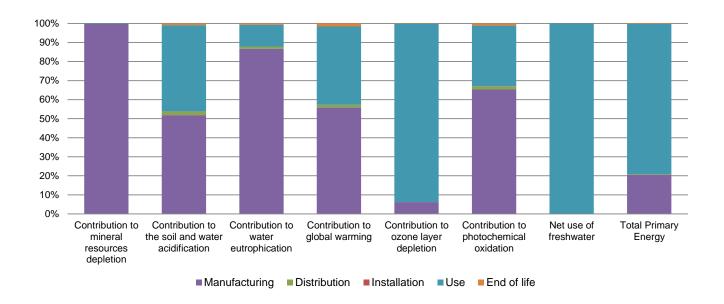

| The MUREVA STYL 2-WAY SWITCH WITH LED SURFACE MOUNTING presents the following relevent environmental aspects | | | | | | |
|--|---|---|--|--|--|--|
| Manufacturing | Manufactured at a Schneider Electric production site ISO14001 certified | | | | | |
| | Weight and volume of the packaging optimized, based on the European Union's packaging directive | | | | | |
| Distribution | Packaging weight is 9.6 g, consisting of Cardboard (99.7%), Paper for label (0.3%). | | | | | |
| | Product distribution optimised by setting up local distribution centres | | | | | |
| Installation | The product does not require special installation procedure and requires little to no energy to install. The disposal of the packaging materials are accounted for during the installation phase (including transport to disposal). | | | | | |
| Use | The product does not require special maintenance operations. | | | | | |
| | End of life optimized to decrease the amount of waste and allow recovery of the product components and materials | | | | | |
| | This product contains Electronics items (1.8 g) that should be separated from the stream of waste so as to option end-of-life treatment. | | | | | |
| End of life | The location of these components and other recommendations are given in the End of Life Instruction is available on the Schneider-Electric Green Premium website | | | | | |
| | http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page | | | | | |
| | Recyclability potential: 66% | Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME). | | | | |

Environmental impacts

| Reference life time | 20 years | | | | | |
|----------------------------------|---|--|--|---|--|--|
| Product category | Switches | | | | | |
| Installation elements | No special components needed | | | | | |
| Use scenario | The product is in active mode 30% of the time with a power use of 0.0875 W and in OFF mode 70% of the time with a power use of 0.0 W, for 20 years | | | | | |
| Geographical representativeness | France | | | | | |
| Technological representativeness | The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production. | | | | | |
| | Manufacturing | Installation | Use | End of life | | |
| Energy model used | Manufacturing plant: ELDA, Poland | Electricity grid mix; AC; consumption mix, at consumer; 230V; FR | Electricity grid mix; AC; consumption mix, at consumer; 230V; FR | Electricity grid mix; AC; consumption mix, at consumer; 230V; FR | | |

^{*} represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.9.3, database version 2016-11 in compliance with ISO14044.

The manufacturing phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators) exept three indicator ODP, NUFW & TPE is mostly in use phase.

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
