Safety information

Important information

Read these instructions carefully and look at the equipment to become familiar with the device before trying to install, operate, service, or maintain it. The following special messages may appear throughout this manual or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of either symbol to a "Danger" or "Warning" safety label indicates that an electrical hazard exists which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that accompany this symbol to avoid possible injury or death.

A A DANGER

DANGER indicates a hazardous situation which, if not avoided, will result in death or serious injury.

Failure to follow these instructions will result in death or serious injury.

AWARNING

WARNING indicates a hazardous situation which, if not avoided, **could result in** death or serious injury.

CAUTION indicates a hazardous situation which, if not avoided, **could result in** minor or moderate injury.

NOTICE

NOTICE is used to address practices not related to physical injury.

Unica - Connected Single Socket Outlet 16 A

NU5559xx

For your safety

HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH

Safe electrical installation must be carried out only by skilled professionals. Skilled professionals must prove profound knowledge in the following areas:

- Connecting to installation networks.
- Connecting several electrical devices.
- Laying electric cables.
- Safety standards, local wiring rules and regulations.

Failure to follow these instructions will result in death or serious injury.

About the device

The Connected Single Outlet 16 A (hereinafter referred to as a **Socket outlet**) is a connected electrical outlet designed to manage and control electrical devices in a convenient and efficient manner.

The Socket outlet is equipped with:

- Temperature protection mechanism: When the Socket outlet is used with a high load over a long time, the mechanism can switch off the Socket outlet, ensuring overheat protection.
- Overload protection mechanism: When the Socket outlet is used with a high load (~18A or higher), the mechanism can switch off the Socket outlet, ensuring overload protection.

Features of a Socket outlet:

- Remote access: You can switch On/Off the Socket outlet using the app or through a connected wireless switch or through voice control (Google Home, Amazon Alexa, Siri) in addition to using the On/Off button on the device itself.
- **Power consumption:** You can monitor power (W) consumption using the app.
- **Easy installation**: The Socket Outlet fits in existing wall boxes (40 mm), no separate wall box requirement.
- Easy scheduling: You can create a schedule for the various device functions in an easy manner as per your specific requirements for comfort and convenience.
- **High safety**: The integrated overload and overheat protection ensures that the Socket outlet is safe at all times.

Operating element

A. Push button with status LED

Installing the device

Refer to the installation instruction supplied with this product.

Pairing the device with Wiser Hub

Using the Wiser Home app, pair your Socket outlet with the **Wiser Hub** to access and control the Socket outlet. To pair the Socket outlet:

- 1. On the Home page, tap 🔅.
- 2. Tap **Devices > •** and tap **Appliances > Connected Socket > Next**.

TIP: The next screen shows the joining process of Socket outlet.

3. Short press the push button 3 times on the Socket outlet.

Make sure the LED blinks amber.

4. Wait for a few seconds until the LED turns green. You can also see in the app that the Socket outlet is joined.

5. Once the device is joined, tap 🖍 (A) and select an icon suitable for your load and tap **Save**.

NOTE: Electric plug icon is assigned by default.

6. Tap \checkmark (B) and assign a name.

- 7. Tap **Next** to assign the Socket outlet to an existing room or a new room.
- 8. Tap Submit.

You can see the added Socket outlet on the **Home** page under the room tab or under **ALL** devices.

Configuring the device

Renaming the device

Using the Wiser Home app, you can rename your Socket outlet. To rename the Socket outlet:

- 1. On the Home page, tap 🐼.
- Tap Devices > Connected Socket > Device Name (A) to rename the Socket outlet.

Connected Sock	s et	
OPTIONS	^	1
Icon Electric Plugs	£ /

Changing the icon

You can change the icon of the device.

- 1. On the Home page, tap 2^{3} > Devices > Connected Socket.
- 2. Tap **lcon**, select an icon of your choice (A) and tap **Save** (B).

IMPORTANT: If you have installed Socket outlet and PowerTag, changing the icon to another category will delete all the historical data. Refer to Energy view of individual devices.

•	Back	lco	on	Save	B
Please choose an icon that best represents your device. The icon will be displayed on the home screen and also in the energy breakdown (if available).

Setting the device location in the room

Using the Wiser Home app, you can assign your Socket outlet to any room (such as bedroom, living room, dining room etc.). To assign a Socket outlet to a room:

- 1. On the Home page, tap 🕸.
- 2. Tap **Devices > Connected Socket > Location** (A) to assign the Socket outlet to the existing room or a new room (B) and tap **Submit**.

Identifying the device

Using the Wiser Home app, you can identify a Socket outlet from the other available devices in the room. To identify the Socket outlet:

- 1. On the Home page, tap 🔅.
- 2. Tap Devices > Connected Socket > Identify (A).

NOTE:

- This feature flashes the Socket outlet LED, so you can identify the actual device. It may take up to a minute to start and flash the Socket outlet LED.
- The socket LED will continue to flash until you tap **OK**.

Using the device

Switching operation manually

You can turn On/Off the Socket outlet manually by pressing the push-button. The LED turns red (default settings), which indicates the power output is On from the Socket Outlet.

Switching operation using the app

Using the Wiser Home app, you can turn On/Off the Socket outlet remotely.

To turn on/off the Socket outlet:

- 1. Go to the Home page, tap **All** devices or a room tab where the Socket outlet is located.
- 2. Tap (A) to turn On/Off the Socket outlet.

Create or assign a schedule

Using the Wiser Home app, you can create or assign a schedule to the Socket outlet.

To create or assign a schedule:

- 1. On the **Home** page, tap
- 2. Go to **Schedule** tab, tap \oplus .
- 3. Enter the Schedule name and select **Appliances** from the **TYPE** menu.
- 4. Select the **Smart Socket Outlet** from the **APPLIES TO** menu and tap **Create**.

Monitoring energy consumption

Using the Wiser app, you can monitor the energy consumption of the load connected to the device.

To check the energy consumption:

- 1. On the Home page, tap All devices > Connected Socket.
- 2. When the socket outlet is turned on, the power consumption is displayed in watts (W).

TIP: The power consumption varies depending on the load connected to the socket outlet.

Creating a moment

Moment allows you to group multiple actions that are usually performed together. By using the Wiser Home app, you can create moments based on your needs. To create a moment:

- 1. On the **Home** page, tap
- 2. Go to **Moments** > 🖶 to create a moment.
- 3. Enter the name of the moment (A).

TIP: You can choose the cover image that best represents your moment by tapping .

4. Tap **Add actions** (B) to select the list of devices.

5. In the Add actions menu, you can select the devices (C).

- 7. On the **Moment creator** page, tap on the device to set the condition. For example, select connected socket.

Тар	(D) to tu	urn d	on.
< Back	Connected Socket	Set	
	Tap to turn on		D

_

When the desired condition is set, tap Set.

8. Once all conditions are set, tap Save.

Once the moment is saved, it is visible on the **Moments** tab. You can tap on the moment to enable it.

Editing a moment

To edit a moment:

- 1. On the **Home** page, tap
- 2. Go to **Moments**, locate the moment you want to edit and tap \checkmark (A).
- 3. On the **Moment Editor** page, you can tap each item to change the settings and tap **Save** (B).

	Automations		Close Moment Editor	Save-B

Deleting a moment

To delete a moment:

- 1. On the **Home** page, tap
- 2. Go to **Moments**, locate the moment you want to delete and tap \checkmark (A).
- 3. On the Moment Editor page, tap **Delete** (B) and tap **Ok**.

Creating an automation

An automation allows you to group multiple actions that are usually done together, triggered automatically or at scheduled times. By using the Wiser app, you can create automations based on your needs. To create an automation:

- 1. On the **Home** page, tap
- 2. Go to **Automation** > \bigcirc to create an automation.

NOTE: Max. 10 automations can be added.

- 3. Tap If (A) and select any of the following conditions (B):
 - All conditions: This triggers an action only when all conditions are met.
 - Any condition: This triggers an action when at least one condition is met.

- 4. Tap Add conditions and select any of the following (C):
 - Device status change: Select a device to enable automation.
 - Away Mode: Enable / Disable away mode to trigger an action.

TIP: Away mode can also be used as a trigger to turn off the lights, dimmer or closing the shutter etc. For more information refer to Away mode.

NOTE:

Max. 10 conditions can be added.

To remove an added condition, swipe left and tap

- To set a specific time for your automation, tap When > Add time and select any of the following (D):
 - Specific time of the day: Sunrise, Sunset, Custom.
 - Period of time: Daytime, Night time, Custom.

	← Add time	
\bigcirc	Specific time of day E.g. at 07:00 or at sunrise	>
Y	Period of time E.g. from sunset to sunrise	>

NOTE:

- Max. 10 entries can be added.
- To remove a specific time, swipe left and tap
- To add an action, tap Then > Add an action and select any of the following (E):
 - Control a device: Select a devices that you want to trigger.
 - Send notification: Turn on the notification for the automation.
 - Activate a moment: Select the moment that you want to trigger.

Tap Control a device > Connected Socket, tap (b) (F) to turn on/off, then tap Set.

NOTE:

- Max. 10 actions can be added.
- To remove an action, swipe left on the action and tap
- 8. Enter the automation name (G).

You can choose the cover image that represents your automation by tapping

9. Tap Save.

Once the automation is saved, it is visible on the **Automation** tab. Using the \bigcirc (H) you can enable or disable the automation.

Example of an automation

In the example below, if away mode is enabled during daytime then the Connected Socket will turn Off.

- 1. Go to **Automation** > \bigcirc to create an automation.
- To add a condition, tap Add Condition > Away Mode > Enabled away mode (A).

- 3. Read the information and tap OK.
- 4. To set the time, tap When > Add time > Period of time > Day time > Set.

5. To add an action, tap Then > Add an action > Control a device > Connected Socket > Set.

TIP: You can turn on/off the socket.

Tap to turn on	
	Tap to turn on

6. Read the information and tap OK.

7. Enter the name of the automation.

TIP: You can choose the cover image that represents your automation by tapping

8. Tap Save.

Once the automation is saved, it is visible on the Automation tab.

NOTE: You can enable or disable automations on the **Automation** tab by using \bigcirc (B).

Editing an automation

To edit an automation:

- 1. On the **Home** page, tap
- 2. Go to Automation, tap the automation you want to edit.
- 3. On the Edit automation page, you can:
 - Change the icon.
 - Rename the automation.
 - Change/Delete the condition or action.
- 4. Remove the Condition or Action by swiping it to the left and tapping the **bin** (A).

Removing the device

Using the Wiser Home app, you can remove the Socket outlet from the Wiser system.

To remove the Socket outlet:

- 1. On the Home page, tap 🔅.
- 2. Tap Devices > Connected Socket > Delete (A).

< Device Details Connected Socke	t

Resetting the device

You can reset the Socket outlet to the factory default. It can be reset manually at any time, e.g., when the Hub is replaced.

Short press the push button 3 times and hold for 10 seconds to reset the device to the factory default mode.

NOTE: All configuration data, user data and network data are deleted.

LED indications

Pairing the device

User Action	LED Indication	Status
Press the push button 3 times	LED blinks amber, once per second.	Pairing mode is active for 30 seconds. When pairing is completed, LED displays solid green for a time, before turning Off.

Resetting the device

User Action	LED Indication	Status
Press the push button 3 times and hold it down once for > 10 s.	After 10 s, the LED starts blinking red.	The device is in reset mode. It is reset to the factory settings after 10 seconds. The device then restarts, and the LED glows solid orange.

Setting (Default state)

LED Indication	Description
The Red LED glows.	The Red LED glows when the output is switched ON.
All the LEDs are OFF.	The LEDs are OFF, when the output is OFF.
0	

Alarms

LED Indication	Description
Blinking red fast	When there is an overload or over-temperature alarm and the device is switched off. Refer to the Troubleshooting, page 24 to clear the alarms.

Troubleshooting

Symptom	Possible cause	Solution
The Socket outlet is not turning ON.	The Socket outlet is broken, or there could be an alarm if the LED blinks red.	First, power cycle the Socket outlet and check if it works afterwards. If it is still not working, you can replace the Socket outlet.
User cannot switch ON the output locally or remotely until the alarm is cleared. LED blinks fast RED.	Clear the Socket outlet alarms.	To clear the alarm, press and hold the push button for 4 seconds. After 4 seconds, the blinking will stop and the alarm will be cleared, you can use the Socket outlet again. Before clearing the alarm, you should take care of the reason why overload/temperature happened for safety.
