# **Product Environmental Profile**

## **OVALIS FLUSH PIN EARTH SOCKET OUTLET**

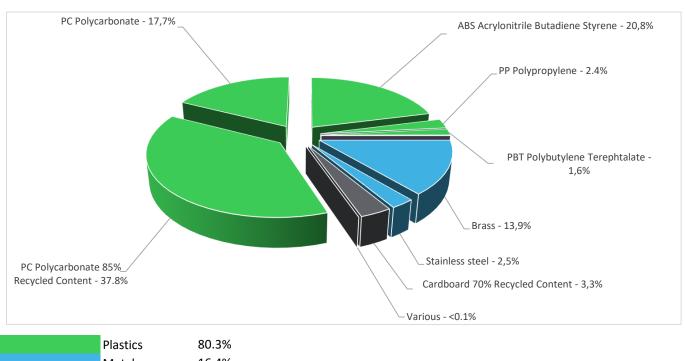

## **General information**

Representative product	OVALIS FLUSH PIN EARTH SOCKET OUTLET - S325052
Description of the product	The main purpose of the Ovalis socket outlet product is to give a solution for the infrastructures that give access to Electricity till the plug.
Description of the range	The indicators values of this OVALIS Socket Outlet can be extrapolated for other OVALIS Socket outlets: with or without pin earth, flush or not and for all finishing types.
	The environmental impacts of this referenced product are representative of the impacts of the other products of the range which are developed with a similar technology.
Functional unit	Connect/Disconnect during 20 years the plug of a load consuming 16A under a voltage of 250V while protecting the user from direct contact with live parts and and with a protection class IP21 in accordance with the standard IEC 60529 and IK04 in accordance with the standard IEC 62262.

## Constituent materials

#### Reference product mass

61,5 g including the product, its packaging and additional elements and accessories

Metals 16.4%
Others 3.3%

#### **Substance assessment**

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate - BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website <a href="http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page">http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page</a>

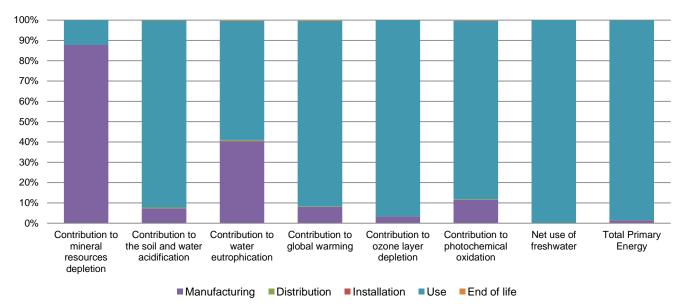

The OVALIS FLUSH PIN EARTH SOCKET OUTLET presents the following relevent environmental aspects						
Design	Ovalis sockets are made of at least 40% plastic recycled content.					
Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified					
	Weight and volume of the packaging optimized, based on the European Union's packaging directive					
Distribution	Packaging weight is 3.5 g, consisting of Cardboard (57%), PP film (43%)					
	Packaging recycled materials is 40% of total packaging mass.					
	Product distribution optimised by setting up local distribution centres					
Installation	The product does not require special installation procedure and requires little to no energy to install. The disposal of the packaging materials are accounted during the installation phase (including transport to disposal).					
Use	The product does not require special maintenance operations.					
	End of life optimized to decrease the amount of waste and allow recovery of the product components and m					
End of life	No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process.					
	Recyclability potential: 64%	Based on Reeecyclab tool of ecosystem (for Polycarbonate) and "ECO'DEEE (for all other materials) recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).				

## **P** Environmental impacts

Reference life time	20 years						
Product category	Power socket						
Installation elements	No special components needed						
Use scenario	The product is in active mode 50% of the time with a power use of 0.3072W and 0W for the other 50% of the time.						
Geographical representativeness	France						
Technological representativeness	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production.						
Energy model used	Manufacturing	Installation	Use	End of life			
	Manufacturing Plant Location: Puente la Reina, Spain	Electricity grid mix; AC; consumption mix, at consumer; 230V; FR	Electricity grid mix; AC; consumption mix, at consumer; 230V; FR	Electricity grid mix; AC; consumption mix, at consumer; 230V; FR

<sup>\*</sup> represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version 5.9.3, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators except Abiotic depletion (elements, ultimate reserves) (ADPe for EN15804) (based on compulsory indicators).

According to this environmental analysis, proportionality rules are used to evaluate the impacts of other products of this range, ratios to apply can be provided upon request.

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
