Product Environmental Profile

OVALIS 2 WAY SWITCH WITH OUTER PLATE

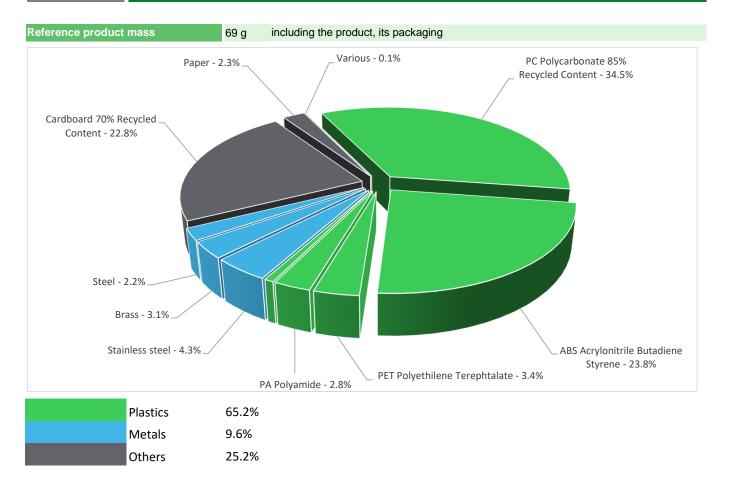

General information

ΪL

Representative product	OVALIS 2 WAY SWITCH WITH OUTER PLATE - S320204 + S320702
Description of the product	The main purpose of the Ovalis switches as product range is to give a solution for the control of electricity networks, like for lightings, roller blind motors, fans.
Description of the range	The indicators values of this OVALIS 2-Way switch can be extrapolated for other OVALIS switches, for all finishing types, with or witohout associated accesories.
	The environmental impacts of this referenced product are representative of the impacts of the other products of the range which are developed with a similar technology.
Functional unit	Establish, support and interrupt for 20 years rated currents in normal conditions of circuit characterized by the current 10A, including any conditions specified for overload in operation characterized by the current 10A, for the operating voltage 250V,for a specified time.

Constituent materials

E Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate– BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page

Additional environmental information

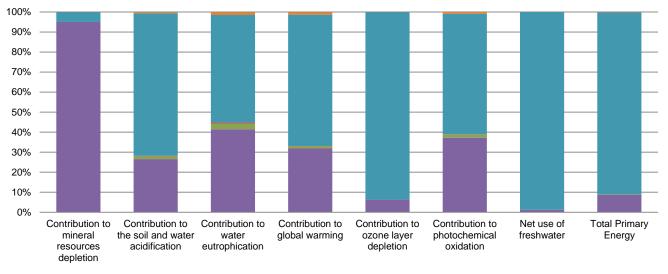

The OVALIS 2 WAY SWITCH WITH OUTER PLATE presents the following relevent environmental aspects						
Design	Ovalis Switches are made of at least 45% plastic recycled content.					
Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified					
	Weight and volume of the packaging optimized, based on the European Union's packaging directive					
Distribution	Packaging weight is 19.9 g, consisting of Cardboard (80%), PET film (12%) & Paper (8%)					
Distribution	Packaging recycled materials is 55% of total packaging mass.					
	Product distribution optimised by setting up local distribution centres					
Installation	This product does not require special installation operation. The disposal of the packaging materials are accounted for during the installation phase (including transport to disposal).					
Use	The product does not require special maintenance operations.					
	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials					
	No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process.					
End of life Recyclability pot	Recyclability potential: 79% Based on Reeecyclab tool of ecosystem (for Polycarbonate) and "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).					

$\mathcal O$ Environmental impacts

Reference life time	20 years					
Product category	Switches					
Installation elements	This product does not requrie any special componets during installation					
Use scenario	The product is in active mode 30% of the time with a power use of 0.0875W and in off mode 70% of the time with a power use of 0 W, for 20 years					
Geographical representativeness	France					
Technological representativeness	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production.					
	Manufacturing	Installation	Use	End of life		
Energy model used	Manufacturing Plant Location: Puente la Reina, Spain	Electricity grid mix; AC; consumption mix, at consumer; 230V; FR	Electricity grid mix; AC; consumption mix, at consumer; 230V; FR	Electricity grid mix; AC; consumption mix, at consumer; 230V; FR

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version 5.9.3, database version 2020-12 in compliance with ISO14044.

The Manufacturing phase is impacting on Indicators Abiotic depletion (elements, ultimate reserves) (ADPe for EN15804). The Manufacturing phase & Use phase are impacting equally on Indicator of Acidification potential of soil and water (total average for Europe) (A for PEP), Eutrophication (fate not incl.) (EP for EN15804), Photochemical oxidation (high NOx) (POCP for EN15804) & Global warming (GWP100) (GWP for EN15804). The Use phase is impacting on the indicators Net use of freshwater, Ozone layer depletion ODP steady state (ODP for EN15804) & Total Prime Energy.

According to this environmental analysis, proportionality rules may be used to evaluate the impacts of other products of this range, ratios to apply can be provided upon request.

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number :	SCHN-00779-V01.01-EN	Drafting rules	PCR-ed3-EN-2015 04 02
