# Modicon TM5 Digital I/O Modules Hardware Guide 

04/2018

The information provided in this documentation contains general descriptions and/or technical characteristics of the performance of the products contained herein. This documentation is not intended as a substitute for and is not to be used for determining suitability or reliability of these products for specific user applications. It is the duty of any such user or integrator to perform the appropriate and complete risk analysis, evaluation and testing of the products with respect to the relevant specific application or use thereof. Neither Schneider Electric nor any of its affiliates or subsidiaries shall be responsible or liable for misuse of the information contained herein. If you have any suggestions for improvements or amendments or have found errors in this publication, please notify us.
You agree not to reproduce, other than for your own personal, noncommercial use, all or part of this document on any medium whatsoever without permission of Schneider Electric, given in writing. You also agree not to establish any hypertext links to this document or its content. Schneider Electric does not grant any right or license for the personal and noncommercial use of the document or its content, except for a non-exclusive license to consult it on an "as is" basis, at your own risk. All other rights are reserved.
All pertinent state, regional, and local safety regulations must be observed when installing and using this product. For reasons of safety and to help ensure compliance with documented system data, only the manufacturer should perform repairs to components.
When devices are used for applications with technical safety requirements, the relevant instructions must be followed.

Failure to use Schneider Electric software or approved software with our hardware products may result in injury, harm, or improper operating results.
Failure to observe this information can result in injury or equipment damage.

## Safety Information

## Important Information

## NOTICE

Read these instructions carefully, and look at the equipment to become familiar with the device before trying to install, operate, service, or maintain it. The following special messages may appear throughout this documentation or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of this symbol to a "Danger" or "Warning" safety label indicates that an electrical hazard exists which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

## 1 DANGER

DANGER indicates a hazardous situation which, if not avoided, will result in death or serious injury.

## A WARNING

WARNING indicates a hazardous situation which, if not avoided, could result in death or serious injury.

## A CAUTION

CAUTION indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

## NOTICE

NOTICE is used to address practices not related to physical injury.

## PLEASE NOTE

Electrical equipment should be installed, operated, serviced, and maintained only by qualified personnel. No responsibility is assumed by Schneider Electric for any consequences arising out of the use of this material.

A qualified person is one who has skills and knowledge related to the construction and operation of electrical equipment and its installation, and has received safety training to recognize and avoid the hazards involved.

## About the Book

## At a Glance

## Document Scope

This manual describes the hardware implementation of the Modicon TM5 Digital I/O Modules. It provides part descriptions, specifications, wiring diagrams, installation and setup for Modicon TM5 Digital I/O Modules.

## Validity Note

This document has been updated for the release of SoMachine Motion V4.4 SP1.
The technical characteristics of the devices described in the present document also appear online. To access the information online:

| Step | Action |
| :---: | :--- |
| 1 | Go to the Schneider Electric home page www.schneider-electric.com. |
| 2 | In the Search box type the reference of a product or the name of a product range. <br> - Do not include blank spaces in the reference or product range. <br> - To get information on grouping similar modules, use asterisks ( ). |
| 3 | If you entered a reference, go to the Product Datasheets search results and click on the <br> reference that interests you. <br> If you entered the name of a product range, go to the Product Ranges search results and click <br> on the product range that interests you. |
| 4 | If more than one reference appears in the Products search results, click on the reference that <br> interests you. |
| 5 | Depending on the size of your screen, you may need to scroll down to see the data sheet. |
| 6 | To save or print a data sheet as a .pdf file, click Download XXX product datasheet. |

The characteristics that are presented in the present document should be the same as those characteristics that appear online. In line with our policy of constant improvement, we may revise content over time to improve clarity and accuracy. If you see a difference between the document and online information, use the online information as your reference.
For product compliance and environmental information (RoHS, REACH, PEP, EOLI, etc.), go to www.schneider-electric.com/green-premium.

## Product Related Information

### 4.4 DANGER

## HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

- Disconnect all power from all equipment including connected devices prior to removing any covers or doors, or installing or removing any accessories, hardware, cables, or wires except under the specific conditions specified in the appropriate hardware guide for this equipment.
- Always use a properly rated voltage sensing device to confirm the power is off where and when indicated.
- Replace and secure all covers, accessories, hardware, cables, and wires and confirm that a proper ground connection exists before applying power to the unit.
- Use only the specified voltage when operating this equipment and any associated products.

Failure to follow these instructions will result in death or serious injury.
The mixed module TM5SDM8DTS has been designed to operate outside of any hazardous location. Only install this equipment in zones known to be free of a hazardous atmosphere.

## ADANGER

## POTENTIAL FOR EXPLOSION

Install and use the mixed module TM5SDM8DTS in non-hazardous locations only. Failure to follow these instructions will result in death or serious injury.

For the input and output modules (TM5SDI $\cdots \cdot$ and TM5SDO $\cdot \cdots$ ) and for the mixed modules TM5SDM12DT and TM5SMM6D2L, the following measures apply:

## 4 DANGER

## POTENTIAL FOR EXPLOSION

- Only use this equipment in non-hazardous locations, or in locations that comply with Class I, Division 2, Groups A, B, C and D.
- Do not substitute components which would impair compliance to Class I, Division 2.
- Do not connect or disconnect equipment unless power has been removed or the location is known to be non-hazardous.
- Do not use the USB port(s), if so equipped, unless the location is known to be non-hazardous.

Failure to follow these instructions will result in death or serious injury.

## A WARNING

## LOSS OF CONTROL

- The designer of any control scheme must consider the potential failure modes of control paths and, for certain critical control functions, provide a means to achieve a safe state during and after a path failure. Examples of critical control functions are emergency stop and overtravel stop, power outage and restart.
- Separate or redundant control paths must be provided for critical control functions.
- System control paths may include communication links. Consideration must be given to the implications of unanticipated transmission delays or failures of the link.
- Observe all accident prevention regulations and local safety guidelines. ${ }^{1}$
- Each implementation of this equipment must be individually and thoroughly tested for proper operation before being placed into service.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

[^0]
## A WARNING

## UNINTENDED EQUIPMENT OPERATION

- Only use software approved by Schneider Electric for use with this equipment.
- Update your application program every time you change the physical hardware configuration.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Terminology Derived from Standards

The technical terms, terminology, symbols and the corresponding descriptions in this manual, or that appear in or on the products themselves, are generally derived from the terms or definitions of international standards.

In the area of functional safety systems, drives and general automation, this may include, but is not limited to, terms such as safety, safety function, safe state, fault, fault reset, malfunction, failure, error, error message, dangerous, etc.
Among others, these standards include:

| Standard | Description |
| :--- | :--- |
| EN 61131-2:2007 | Programmable controllers, part 2: Equipment requirements and tests. |
| ISO 13849-1:2008 | Safety of machinery: Safety related parts of control systems. <br> General principles for design. |
| EN 61496-1:2013 | Safety of machinery: Electro-sensitive protective equipment. <br> Part 1: General requirements and tests. |
| ISO 12100:2010 | Safety of machinery - General principles for design - Risk assessment and risk <br> reduction |
| EN 60204-1:2006 | Safety of machinery - Electrical equipment of machines - Part 1: General <br> requirements |
| EN 1088:2008 <br> ISO 14119:2013 | Safety of machinery - Interlocking devices associated with guards - Principles for <br> design and selection |
| ISO 13850:2006 | Safety of machinery - Emergency stop - Principles for design |
| EN/IEC 62061:2005 | Safety of machinery - Functional safety of safety-related electrical, electronic, and <br> electronic programmable control systems |
| IEC 61508-1:2010 | Functional safety of electrical/electronic/programmable electronic safety-related <br> systems: General requirements. |
| IEC 61508-2:2010 | Functional safety of electrical/electronic/programmable electronic safety-related <br> systems: Requirements for electrical/electronic/programmable electronic safety- <br> related systems. |
| IEC 61508-3:2010 | Functional safety of electrical/electronic/programmable electronic safety-related <br> systems: Software requirements. |
| IEC 61784-3:2008 | Digital data communication for measurement and control: Functional safety field <br> buses. |

| Standard | Description |
| :--- | :--- |
| $2006 / 42 / E C$ | Machinery Directive |
| $2014 / 30 / E U$ | Electromagnetic Compatibility Directive |
| $2014 / 35 / E U$ | Low Voltage Directive |

In addition, terms used in the present document may tangentially be used as they are derived from other standards such as:

| Standard | Description |
| :--- | :--- |
| IEC 60034 series | Rotating electrical machines |
| IEC 61800 series | Adjustable speed electrical power drive systems |
| IEC 61158 series | Digital data communications for measurement and control - Fieldbus for use in <br> industrial control systems |

Finally, the term zone of operation may be used in conjunction with the description of specific hazards, and is defined as it is for a hazard zone or danger zone in the Machinery Directive (2006/42/EC) and ISO 12100:2010.

## Part I

## TM5 Digital I/O General Overview

## What Is in This Part?

This part contains the following chapters:

| Chapter | Chapter Name | Page |
| :---: | :--- | :---: |
| 1 | TM5 System General Rules for Implementing | 17 |
| 2 | TM5 Digital I/O General Overview | 33 |

## Chapter 1

## TM5 System General Rules for Implementing

What Is in This Chapter?
This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| Installation and Maintenance Requirements | 18 |
| Wiring Best Practices | 21 |
| TM5 Environmental Characteristics | 27 |
| Installation Guidelines | 29 |
| Hot Swapping Electronic Modules | 30 |

## Installation and Maintenance Requirements

## Before Starting

Read and understand this chapter before beginning the installation of your TM5 System.
The use and application of the information contained herein require expertise in the design and programming of automated control systems. Only you, the user, machine builder or integrator, can be aware of all the conditions and factors present during installation and setup, operation, and maintenance of the machine or process, and can therefore determine the automation and associated equipment and the related safeties and interlocks which can be effectively and properly used. When selecting automation and control equipment, and any other related equipment or software, for a particular application, you must also consider any applicable local, regional or national standards and/or regulations.

Pay particular attention in conforming to any safety information, different electrical requirements, and normative standards that would apply to your machine or process in the use of this equipment.

| NOT/CE |
| :--- |
| ELECTROSTATIC DISCHARGE |
| - Store all components in their protective packaging until immediately before assembly. |
| - Never touch exposed conductive parts such as contacts or terminals. |
| Failure to follow these instructions can result in equipment damage. |

## Disconnecting Power

All options and modules should be assembled and installed before installing the control system on a mounting rail, onto a mounting plate or in a panel. Remove the control system from its mounting rail, mounting plate or panel before disassembling the equipment.

## 4 A DANGER

## HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

- Disconnect all power from all equipment including connected devices prior to removing any covers or doors, or installing or removing any accessories, hardware, cables, or wires except under the specific conditions specified in the appropriate hardware guide for this equipment.
- Always use a properly rated voltage sensing device to confirm the power is off where and when indicated.
- Replace and secure all covers, accessories, hardware, cables, and wires and confirm that a proper ground connection exists before applying power to the unit.
- Use only the specified voltage when operating this equipment and any associated products.

Failure to follow these instructions will result in death or serious injury.

## Programming Considerations

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

- Only use software approved by Schneider Electric for use with this equipment.
- Update your application program every time you change the physical hardware configuration.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Operating Environment

The mixed module TM5SDM8DTS has been designed to operate outside of any hazardous location. Only install this equipment in zones known to be free of a hazardous atmosphere.

## 4 DANGER

## POTENTIAL FOR EXPLOSION

Install and use the mixed module TM5SDM8DTS in non-hazardous locations only. Failure to follow these instructions will result in death or serious injury.

For the input and output modules (TM5SDI••• and TM5SDO $\cdot \cdots$ ) and for the mixed modules TM5SDM12DT and TM5SMM6D2L, the following measures apply:

## 4 DANGER

## POTENTIAL FOR EXPLOSION

- Only use this equipment in non-hazardous locations, or in locations that comply with Class I, Division 2, Groups A, B, C and D.
- Do not substitute components which would impair compliance to Class I, Division 2.
- Do not connect or disconnect equipment unless power has been removed or the location is known to be non-hazardous.
- Do not use the USB port(s), if so equipped, unless the location is known to be non-hazardous.

Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Install and operate this equipment according to the conditions described in the Environmental Characteristics.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Installation Considerations

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

- Use appropriate safety interlocks where personnel and/or equipment hazards exist.
- Install and operate this equipment in an enclosure appropriately rated for its intended environment and secured by a keyed or tooled locking mechanism.
- Use the sensor and actuator power supplies only for supplying power to the sensors or actuators connected to the module.
- Power line and output circuits must be wired and fused in compliance with local and national regulatory requirements for the rated current and voltage of the particular equipment.
- Do not use this equipment in safety-critical machine functions unless the equipment is otherwise designated as functional safety equipment and conforming to applicable regulations and standards.
- Do not disassemble, repair, or modify this equipment.
- Do not connect any wiring to reserved, unused connections, or to connections designated as No Connection (N.C.).

Failure to follow these instructions can result in death, serious injury, or equipment damage.

NOTE: JDYX2 or JDYX8 fuse types are UL-recognized and CSA approved.

## Wiring Best Practices

## Introduction

There are several rules that must be followed when wiring the TM5 System.

## Wiring Rules

## 4 ! DANGER

## HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

- Disconnect all power from all equipment including connected devices prior to removing any covers or doors, or installing or removing any accessories, hardware, cables, or wires except under the specific conditions specified in the appropriate hardware guide for this equipment.
- Always use a properly rated voltage sensing device to confirm the power is off where and when indicated.
- Replace and secure all covers, accessories, hardware, cables, and wires and confirm that a proper ground connection exists before applying power to the unit.
- Use only the specified voltage when operating this equipment and any associated products.

Failure to follow these instructions will result in death or serious injury.

The following rules must be applied when wiring the TM5 System:

- I/O and communication wiring must be kept separate from the power wiring. Route these 2 types of wiring in separate cable ducting.
- Verify that the operating conditions and environment are within the specification values.
- Use proper wire sizes to meet voltage and current requirements.
- Use copper conductors only.
- Use twisted pair, shielded cables for analog, expert, or fast I/O and TM5 bus signals.
- Use twisted pair, shielded cables for encoder, networks and fieldbus (CAN, serial, Ethernet).

Use shielded, properly grounded cables for all analog and high-speed inputs or outputs and communication connections. If you do not use shielded cable for these connections, electromagnetic interference can cause signal degradation. Degraded signals can cause the controller or attached modules and equipment to perform in an unintended manner.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

- Use shielded cables for all fast I/O, analog I/O and communication signals.
- Ground cable shields for all analog I/O, fast I/O and communication signals at a single point ${ }^{1}$.
- Route communication and I/O cables separately from power cables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.
${ }^{1}$ Multipoint grounding is permissible if connections are made to an equipotential ground plane dimensioned to help avoid cable shield damage in the event of power system short-circuit currents.
Refer to the section Grounding the TM5 System (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide) to ground the shielded cables.
This table provides the wire sizes to use with the removable spring terminal blocks (TM5ACTB06, TM5ACTB12, TM5ACTB12, TM5ACTB12PS, TM5ACTB32):

| $\frac{\mathrm{mm}}{\mathrm{in} .}$品 <br> $\mathrm{mm}^{2}$ | $0,08 \ldots 2,5$ | $0,25 \ldots 2,5$ | $0,25 \ldots 1,5$ | $2 \times 0,25 \ldots 2 \times 0,75$ |
| ---: | :---: | :---: | :---: | :---: |
| AWG | $28 \ldots 14$ | $24 \ldots 14$ | $24 \ldots 16$ | $2 \times 24 \ldots 2 \times 18$ |

This table provides the wire sizes to use with the TM5ACTB16 terminal blocks:

| $\frac{\mathrm{mm}}{\mathrm{in} .} \stackrel{9}{0.35^{\circ}}$ | $\square$ | $\square$ | $\square \square$ |
| :---: | :---: | :---: | :---: |
| $\mathrm{mm}^{2}$ | 0,08 ...1,5 | 0,25 .. 1,5 | 0,25 ..0,75 |
| AWG | 28... 16 | 24... 16 | 24... 20 |

## ! DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

The spring clamp connectors of the terminal block are designed for only one wire or one cable end. Two wires to the same connector must be installed with a double wire cable end to help prevent loosening.

## 4 A DANGER

## LOOSE WIRING CAUSES ELECTRIC SHOCK

Do not insert more than one wire per connector of the spring terminal blocks unless using a double wire cable end (ferrule).
Failure to follow these instructions will result in death or serious injury.

## TM5 Terminal Block

Inserting an incorrect terminal block into the electronic module can cause unintended operation of the application and/or damage the electronic module.

NOTE: To help prevent a terminal block from being inserted incorrectly, ensure that each terminal block and electronic module is clearly and uniquely coded (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## TM5 Strain Relief Using Cable Tie

There are 2 methods to reduce the stress on cables:

- The terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide) have slots to attach cable ties. A cable tie can be fed through this slot to secure cables and wires to reduce stress between them and the terminal block connections.
- After grounding the TM5 System by means of the grounding plate TM2XMTGB, wires can be bundled and affixed to the grounding plate tabs using wire ties to reduce stress on the cables.
The following table provides the size of the cable tie and presents the two methods to reduce the stress on the cables:

| Cable Tie <br> Size | Terminal Block | TM2XMTGB Grounding Plate |
| :--- | :--- | :--- |
| Thickness | $1.2 \mathrm{~mm}(0.05 \mathrm{in}$.$) maximum$ | $1.2 \mathrm{~mm}(0.05 \mathrm{in})$. |
| Width | $4 \mathrm{~mm}(0.16 \mathrm{in}$.$) maximum$ | $2.5 \ldots 3 \mathrm{~mm}(0.1 \ldots 0.12 \mathrm{in})$. |

| Cable Tie Size | Terminal Block | TM2XMTGB Grounding Plate |
| :---: | :---: | :---: |
| Mounting illustration |  |  |

## A WARNING

## ACCIDENTAL DISCONNECTION FROM PROTECTIVE GROUND (PE)

- Do not use the TM2XMTGB Grounding Plate to provide a protective ground (PE).
- Use the TM2XMTGB Grounding Plate only to provide a functional ground (FE).

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Protecting Outputs from Inductive Load Damage

Depending on the load, a protection circuit may be needed for the outputs on the controllers and certain modules. Inductive loads using DC voltages may create voltage reflections resulting in overshoot that will damage or shorten the life of output devices.

## A WARNING

## INDUCTIVE LOADS

Use an appropriate external protective circuit or device to reduce the risk of inductive direct current load damage.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

If your controller or module contains relay outputs, these types of outputs can support up to 240 Vac . Inductive damage to these types of outputs can result in welded contacts and loss of control. Each inductive load must include a protection device such as a peak limiter, RC circuit or flyback diode. Capacitive loads are not supported by these relays.

## A WARNING

## RELAY OUTPUTS WELDED CLOSED

- Always protect relay outputs from inductive alternating current load damage using an appropriate external protective circuit or device.
- Do not connect relay outputs to capacitive loads.

Failure to follow these instructions can result in death, serious injury, or equipment damage.
Protective circuit A: this protection circuit can be used for both AC and DC load power circuits.

C Value from 0.1 to $1 \mu \mathrm{~F}$
R Resistor of approximately the same resistance value as the load

Protective circuit B: this protection circuit can be used for DC load power circuits.

Use a diode with the following ratings:

- Reverse withstand voltage: power voltage of the load circuit x10.
- Forward current: more than the load current.

Protective circuit $C$ : this protection circuit can be used for both AC and DC load power circuits.

In applications where the inductive load is switched on and off frequently and/or rapidly, ensure that the continuous energy rating $(\mathrm{J})$ of the varistor exceeds the peak load energy by $20 \%$ or more.

## TM5 Environmental Characteristics

## Enclosure Requirements

TM5 components are designed as Zone B, Class A industrial equipment according to IEC/CISPR Publication 11. If they are used in environments other than those described in the standard, or in environments that do not meet the specifications in this manual, your ability to meet electromagnetic compatibility requirements in the presence of conducted and/or radiated interference may be reduced.
The TM5 components meet European Community (CE) requirements for open equipment as defined by EN61131-2. You must install them in an enclosure designed for the specific environmental conditions and to minimize the possibility of unintended contact with hazardous voltages. The enclosure should be constructed of metal to improve the electromagnetic immunity of your TM5 System. The enclosure should, and in the case of UL compliance, must, have a keyed locking mechanism to minimize unauthorized access.

## Environmental Characteristics

This equipment meets UL and CSA standards and, for the majority of the modules, carry both certification marks. In addition, all modules are certified as CE compliant. This equipment is intended for use in a Pollution Degree 2 industrial environment.
NOTE: Some module characteristics may differ from those presented in the following tables. Refer to the chapter concerning your specific module for more information.
The table below provides the general environmental characteristics:

| Characteristic | Specification |  |
| :---: | :---: | :---: |
| Standard | IEC61131-2 |  |
| Agency Standards | UL 508 <br> CSA 22.2 No. 142-M1987 <br> CSA 22.2 No. 213-M1987 <br> NOTE: This information applies to the input and output modules (TM5SDI... and TM5SDO $\cdots \cdot$ ) and for the mixed modules TM5SDM12DT and TM5SMM6D2L. |  |
| Ambient operating temperature | Horizontal installation | $0 . .55{ }^{\circ} \mathrm{C}\left(32 . .131{ }^{\circ} \mathrm{F}\right)$ |
|  | Vertical installation | $0 . .50{ }^{\circ} \mathrm{C}\left(32 . .122{ }^{\circ} \mathrm{F}\right)$ |
| Storage temperature |  | $-25 \ldots 70{ }^{\circ} \mathrm{C}\left(-13 \ldots 158{ }^{\circ} \mathrm{F}\right)$ |
| Relative humidity |  | 5...95\% (non-condensing) |
| Degree of pollution | IEC60664 | 2 |
| Degree of protection | IEC61131-2 | IP20 |
| Corrosion immunity |  | No |
| Operating altitude |  | 0... 2000 m (0...6.560 ft.) |
| Storage altitude |  | 0... 3000 m (0...9.842 ft.) |

| Characteristic | Specification | $3.5 \mathrm{~mm}(0.138 \mathrm{in}$.$) fixed amplitude from 5 \ldots 8.4 \mathrm{~Hz}$ |
| :--- | :--- | :--- |
| Vibration |  |  |
| resistance |  |  | Mounted on a DIN rail |  | $9.8 \mathrm{~m} / \mathrm{s}^{2}\left(1 \mathrm{~g}_{\mathrm{n}}\right)$ fixed acceleration from $8.4 \ldots 150 \mathrm{~Hz}$ |
| :--- | :--- |
| Mechanical shock resistance | $147 \mathrm{~m} / \mathrm{s}^{2}\left(15 \mathrm{~g}_{\mathrm{n}}\right)$ for a duration of 11 ms |
| Connection type | Removable spring terminal block |
| Connector insertion/removal cycles | 50 |

## Electromagnetic Susceptibility

The table below provides the TM5 System electromagnetic susceptibility specifications:

| Characteristic | Specification | Range |
| :---: | :---: | :---: |
| Electrostatic discharge | IEC/EN 61000-4-2 | 8 kV (air discharge) <br> 4 kV (contact discharge) |
| Electromagnetic fields | IEC/EN 61000-4-3 | $10 \mathrm{~V} / \mathrm{m}(80 \mathrm{MHz} . . .2 \mathrm{GHz}$ ) <br> $10 \mathrm{~V} / \mathrm{m}(80 \mathrm{MHz} . . .2 .7 \mathrm{GHz})^{(1)}$ |
| Fast transients burst | IEC/EN 61000-4-4 | Power lines: 2 kV <br> I/O: 1 kV <br> Shielded cable: 1 kV <br> Repetition rate: $5^{(1)}$ and 100 KHz |
| Surge immunity 24 Vdc circuit | IEC/EN 61000-4-5 | 1 kV in common mode 0.5 kV in differential mode |
| Surge immunity 230 Vac circuit |  | 2 kV in common mode 1 kV in differential mode |
| Induced electromagnetic field | IEC/EN 61000-4-6 | $10 \mathrm{~V}_{\text {eff }}(0.15 \ldots 80 \mathrm{MHz}$ ) |
| Conducted emission | EN 55011 (IEC/CISPR11) | $150 . .500 \mathrm{kHz}$, quasi peak $79 \mathrm{~dB} \mu \mathrm{~V}$ |
|  |  | $500 \mathrm{kHz} . . .30 \mathrm{MHz}$, quasi peak $73 \mathrm{~dB} \mu \mathrm{~V}$ |
| Radiated emission | EN 55011 (IEC/CISPR11) | $30 . .230 \mathrm{MHz}, 10 \mathrm{m@} 40 \mathrm{~dB} \mu \mathrm{~V} / \mathrm{m}$ |
|  |  | $230 \mathrm{MHz} . . .1 \mathrm{GHz}, 10 \mathrm{m@} 47 \mathrm{~dB} \mu \mathrm{~V} / \mathrm{m}$ |
| (1) Applies for TM5SE1IC20005 and TM5SE1MISC20005. |  |  |

## Installation Guidelines

## Installation

The following table provides documentation references for spacing requirements and installation of electronic modules and accessories:

| Spacing requirement | For mounting positions and minimum clearances, the electronic modules are <br> mounted according to the rules defined for the controllers. Refer to the Enclosing <br> the TM5 System (see Modicon TM5 / TM7 Flexible System, System Planning <br> and Installation Guide). |
| :--- | :--- |
| Electronic modules <br> installation | Refer to: <br> TM5 Association Table (see Modicon TM5 / TM7 Flexible System, System <br> Planning and Installation Guide). <br> $-\quad$ Expanding the TM5 System (see Modicon TM5 / TM7 Flexible System, <br> System Planning and Installation Guide). |
| Accessories installation | Refer to the Installation of Accessories (see Modicon TM5 / TM7 Flexible <br> System, System Planning and Installation Guide). |

## Hot Swapping Electronic Modules

## Definition

Hot swapping is the ability to remove an I/O electronic module from its bus base and then replace it with an identical electronic module while the TM5 System is under power without disrupting the normal operations of the controller. When the electronic module is returned to its bus base or replaced with another electronic module with the same reference, it starts to operate again.

Hot Swapping Considerations
Before initiating a hot swap operation, confirm that the electronic module type is approved for hot swapping (see page 32).
When removing or inserting an I/O module while power is applied, remove and insert the electronic module by hand. Do not use tools to hot swap modules because they may come into contact with hazardous voltages. Also, remove any locking clips and the terminal block before removing the electronic module from its bus base. Hot swapping is only allowed when replacing identical electronic modules.

## 4 A DANGER

## EXPLOSION OR ELECTRIC SHOCK

- Only perform a hot swap operation in locations known and confirmed to be non-hazardous.
- Use only your hands.
- Do not use any metal tools.
- Do not disconnect any wires from the terminal block.
- Only replace an electronic module with an identical reference.

Failure to follow these instructions will result in death or serious injury.

NOTE: Only the electronic module is hot swap-able. Do not attempt a hot swap operation on the bus base, or on electronic modules that are integrated with their bus bases such as the compact I/O.

You need to understand and plan for the effects of hot-swapping certain modules. Hot-swapping modules that control power distribution to other modules, for example, can impact your machine or process. Power Distribution modules, Interface Power Distribution Modules, Common Distribution modules, Field Bus Interface Modules, and Transmitter and Receiver modules all either distribute power or communications to other electronic modules. Disconnecting the connector to these modules will interrupt power or communications to the modules they service.
For example, some Power Distribution Modules (PDMs) provide power to both the TM5 power bus and 24 Vdc I/O power segment. It is possible that you may need to replace the PDM because one service is inoperable, but not both. In this case, hot-swapping the PDM would interrupt the service that is still operating, and would interrupt power to the modules drawing power from that service.

I/O configurations that employ Common Distribution modules require careful consideration when wiring is restricted by short wire lengths. It may be the case that in order to hot-swap an electronic module that has become inoperable, you need to disconnect the connector of the Common module servicing it. Further, that same Common module may be connected to modules or devices other than the module you wish to hot-swap. Disconnecting the Common module in this case would necessarily interrupt the supply to the unaffected modules and/or devices. Be sure that you know what I/O slices or devices are connected to the Common module, and the impact that this disconnection would have on your machine or process before attempting a hot-swap operation.

## A WARNING

## LOSS OF CONTROL

- The designer of any control scheme must consider the potential failure modes of control paths and, for certain critical control functions, provide a means to achieve a safe state during and after a path failure. Examples of critical control functions are emergency stop and overtravel stop, power outage and restart.
- Separate or redundant control paths must be provided for critical control functions.
- System control paths may include communication links. Consideration must be given to the implications of unanticipated transmission delays or failures of the link.
- Observe all accident prevention regulations and local safety guidelines. ${ }^{1}$
- Each implementation of this equipment must be individually and thoroughly tested for proper operation before being placed into service.
Failure to follow these instructions can result in death, serious injury, or equipment damage.
${ }^{1}$ For additional information, refer to NEMA ICS 1.1 (latest edition), "Safety Guidelines for the Application, Installation, and Maintenance of Solid State Control" and to NEMA ICS 7.1 (latest edition), "Safety Standards for Construction and Guide for Selection, Installation and Operation of Adjustable-Speed Drive Systems" or their equivalent governing your particular location.
NOTE: Be sure you thoroughly understand the effects of a hot-swap operation on all modules and connected devices as they relate to your machine or process.

## Modules that are not Hot Swap-able

Electronic modules that can not be hot swapped under any circumstances include:

| TM5 | Electronic Modules Type | Reasons |
| :--- | :--- | :--- |
| Controller | PCI communication | The replacement of the PCI communication module requires <br> a power cycle before it will recognized by the controller. |
|  | Controller Power <br> Distribution Module | These modules are not removable. |
|  | Embedded I/O Modules |  |
| Field bus <br> interface | CANopen interface module | The replacement of the CANopen interface module depends <br> on CANopen master architecture. Refer to the Generic <br> CANopen Implementation Guide and documentation <br> associated with the CANopen master. |
| Compact I/O | I/O modules | These modules are not removable. |

## Chapter 2

## TM5 Digital I/O General Overview

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| General Description | 34 |
| Physical Description | 36 |

## General Description

## Introduction

The range of digital electronic modules includes:

- digital input electronic modules,
- digital output electronic modules,
- mixed digital input/output electronic modules.

The TM5 digital input/output electronic modules need to be associated with a bus base and a terminal block. Every digital electronic module channel has a status LED.

## Digital Input Electronic Modules Features

Digital inputs convert the electronic input signal into a binary value in the controller. The following table shows the digital input electronic modules features, with corresponding channel type and voltage/current:

| Reference | Number of Channels | Voltage/current | Wiring | Signal type |
| :--- | :--- | :--- | :--- | :--- |
| TM5SDI2D (see page 42) | 2 | $24 \mathrm{Vdc} / 3.75 \mathrm{~mA}$ | 3 wires | sink |
| TM5SDI4D (see page 48) | 4 | $24 \mathrm{Vdc} / 3.75 \mathrm{~mA}$ | 3 wires | sink |
| TM5SDI6D (see page 54) | 6 | $24 \mathrm{Vdc} / 3.75 \mathrm{~mA}$ | 2 wires | sink |
| TM5SDI12D (see page 62) | 12 | $24 \mathrm{Vdc} / 3.75 \mathrm{~mA}$ | 1 wire | sink |
| TM5SDI16D (see page 70) | 16 | $24 \mathrm{Vdc} / 2.68 \mathrm{~mA}$ | 1 wire | sink |
| TM5SDI2DF (see page 78) | 2 | $24 \mathrm{Vdc} / 10.5 \mathrm{~mA}$ | 3 wires | sink |
| TM5SDI2A (see page 86) | 2 | $100 \ldots 240 \mathrm{Vac}$ | 3 wires | NA |
| TM5SDI4A (see page 92) | 4 | $100 \ldots 240 \mathrm{Vac}$ | 2 wires | NA |
| TM5SDI6U (see page 98) | 6 | $100 \ldots 120 \mathrm{Vac}$ | 1 wire | NA |

## Digital Output Electronic Modules Features

Digital outputs convert the binary value in the controller into an electronic output signal. The following table shows the digital output electronic modules features with corresponding channel type and voltage/current:

| Reference | Number of <br> Channels | Voltage/current | Wiring | Signal type |
| :--- | :--- | :--- | :--- | :--- |
| TM5SDO2T (see page 106) | 2 | $24 \mathrm{Vdc} / 0.5 \mathrm{~A}$ | 3 wires | source |
| TM5SDO4T (see page 116) | 4 | $24 \mathrm{Vdc} / 0.5 \mathrm{~A}$ | 3 wires | source |
| TM5SDO4TA (see page 126) | 4 | $24 \mathrm{Vdc} / 2 \mathrm{~A}$ | 3 wires | source |
| TM5SDO6T (see page 136) | 6 | $24 \mathrm{Vdc} / 0.5 \mathrm{~A}$ | 2 wires | source |
| TM5SDO8TA (see page 144) | 8 | $24 \mathrm{Vdc} / 2 \mathrm{~A}$ | 1 wire | source |
| TM5SDO12T (see page 154) | 12 | $24 \mathrm{Vdc} / 0.5 \mathrm{~A}$ | 1 wire | source |
| TM5SDO16T (see page 164) | 16 | $24 \mathrm{Vdc} / 0.5 \mathrm{~A}$ | 1 wire | source |
| TM5SDO2R (see page 174) | 2 | $30 \mathrm{Vdc} / 230 \mathrm{Vac} 5 \mathrm{~A} \mathrm{C/O}$ | 2 change over contacts |  |
| relays | NA |  |  |  |
| TM5SDO4R (see page 182) | 4 | $30 \mathrm{Vdc} / 230 \mathrm{Vac} 5 \mathrm{~A} \mathrm{N/O}$ | 4 normally open contacts <br> relays | NA |
| TM5SDO2S (see page 190) | 2 | $240 \mathrm{Vac} / 1 \mathrm{~A}$ | 3 wires | source |

## Digital Mixed Electronic Modules Features

Digital inputs convert the electronic input signal into a binary value in the controller. Digital outputs convert the binary value in the controller into an electronic output signal. Mixed electronic modules combine both digital inputs and outputs into a single electronic module. The following table shows the mixed input/output electronic modules features with corresponding channel type and voltage/current:

| Reference | Number of <br> Channels | Voltage/current | Wiring | Signal type |
| :--- | :--- | :--- | :--- | :--- |
| TM5SDM8DTS (see page 199) | 4 inputs <br> 4 outputs | $24 \mathrm{Vdc} / 1.3 \mathrm{~mA}$ <br> $24 \mathrm{Vdc} / 0.1 \mathrm{~A}$ | 1 wire | sink <br> source |
| TM5SDM12DT (see page 210) | 8 inputs <br> 4 outputs | $24 \mathrm{Vdc} / 3.75 \mathrm{~mA}$ <br> $24 \mathrm{Vdc} / 0.5 \mathrm{~A}$ | 1 wire | sink <br> source |
| TM5SMM6D2L (see page 221) | 4 digital inputs | $24 \mathrm{Vdc} / 3.3 \mathrm{~mA}$ | 1 wire | sink |
|  | 2 digital outputs | $24 \mathrm{Vdc} / 0.5 \mathrm{~A}$ | 1 wire | source |
|  | 1 analog input | $-10 \ldots+10 \mathrm{Vdc}$ <br> $0 \ldots 20 \mathrm{~mA} / 4 \ldots 20 \mathrm{~mA}$ | - | - |
|  | 1 analog input | $-10 \ldots+10 \mathrm{Vdc}$ <br> $0 \ldots 20 \mathrm{~mA}$ | - | - |

## Physical Description

## Introduction

Each slice consists of three elements. These elements are the bus base, the electronic module and the terminal block.

## Elements

The following illustration shows the elements of a slice.

1 Bus base
2 Electronic module
3 Terminal block
When assembled the three components form an integral unit that resists vibration and electrostatic discharge.

## NOTICE

## ELECTROSTATIC DISCHARGE

- Never touch the contacts of the electronic module.
- Always keep the connector in place during normal operation.

Failure to follow these instructions can result in equipment damage.

## Dimensions

The following illustration shows the dimensions of a slice:

Pin Assignment
The following illustration shows the pin assignments respectively for the 6-pin, 12-pin and the 16pin terminal blocks:

Accessories
Refer to the Installation of Accessories (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

Labeling
Refer to the Labeling the TM5 System (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Part II

## TM5 System Digital Input Electronic Modules

## What Is in This Part?

This part contains the following chapters:

| Chapter | Chapter Name | Page |
| :---: | :--- | :---: |
| 3 | TM5SDI2D Electronic Module 2DI 24 Vdc Sink 3 Wires | 41 |
| 4 | TM5SDI4D Electronic Module 4DI 24 Vdc Sink 3 Wires | 47 |
| 5 | TM5SDI6D Electronic Module 6DI 24 Vdc Sink 2 Wires | 53 |
| 6 | TM5SDI12D Electronic Module 12DI 24 Vdc Sink 1 Wire | 61 |
| 7 | TM5SDI16D Electronic Module 16DI 24 Vdc Sink 1 Wire | 69 |
| 8 | TM5SDI2DF Electronic Module 2DI 24 Vdc Sink 3 Wires | 77 |
| 9 | TM5SDI2A Electronic Module 2DI 100...240 Vac 50/60 Hz 3 Wires | 85 |
| 10 | TM5SDI4A Electronic Module 4DI 100...240 Vac 50/60 Hz 2 Wires | 91 |
| 11 | TM5SDI6U Electronic Module 6DI 100...120 Vac 50/60 Hz 1 Wire | 97 |

## Chapter 3

## TM5SDI2D Electronic Module 2DI 24 Vdc Sink 3 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDI2D Presentation | 42 |
| TM5SDI2D Characteristics | 44 |
| TM5SDI2D Wiring Diagram | 46 |

## TM5SDI2D Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDI2D electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 2 |
| Input type | Type 1 |
| Signal type | Sink |
| Rated input voltage | 24 Vdc |

## Ordering Information

The illustration below shows the TM5SDI2D:

The table below shows the model numbers for the terminal blocks and the bus bases associated with the TM5SDI2D:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | Bus base with address setting |$\quad$ White | 2 | TM5SDI2D |
| :--- | :--- |

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 3 | TM5ACTB06 <br> or <br> TM5ACTB12 | Terminal block, 6 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

This illustration shows the TM5SDI2D status LEDs:

The table below shows the TM5SDI2D status LEDs:

| LED | Color | Status | Description |
| :--- | :--- | :--- | :--- |
|  |  | Green | Off |
|  |  | Single flash | Reset state |
|  |  | Preoperational state |  |
|  | On | Normal operation |  |
| e | Red | Off | OK or no power supply |
| e+r | Steady red/single green <br> flash | Invalid firmware |  |
| $0-1$ | Green | Off | Corresponding input deactivated |
|  |  | On | Corresponding input activated |

## TM5SDI2D Characteristics

## Introduction

This is the description characteristics for the TM5SDI2D electronic module. See also Environmental Characteristics (see page 27).

## ! DANGER

FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDI2D electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 12 mA (all inputs On) |
| TM5 Bus 5 Vdc current draw | 24 mA |
| Power dissipation | 0.41 W max. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 7053 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDI2D electronic module:

| Input Characteristics |  |
| :--- | :--- |
| Number of input channels | 2 |
| Wiring type | 1,2 or 3 wires |
| Rated input voltage | 24 Vdc |
| Input voltage range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| Rated input current at 24 Vdc | 3.75 mA |
| Input impedance | $6.4 \mathrm{k} \Omega$ |
| OFF state | 5 Vdc max. |
| ON state | 15 Vdc min. |
| Input filter | Hardware |
|  | Software |
| Isolation | Between input and <br> internal bus |
|  | Default 1 ms, can be configured between 0 and 25 <br> ms in 0.2 ms intervals. |
|  | See note ${ }^{1}$. |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / O$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Sensor Supply

The table describes the sensor supply of the TM5SDI2D electronic module:

| Supply | Power segment supply less voltage drop for internal <br> protection. |
| :--- | :--- |
| Voltage | 2 Vdc max |
| Voltage drop for internal protection at <br> 500 mA | Overload and short-circuit |
| Sensor supply current (for all powered <br> connected sensors) | 500 mA |
| Internal protection |  |

## TM5SDI2D Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDI2D:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 3-wire sensor
4 2-wire sensor

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 4

## TM5SDI4D Electronic Module 4DI 24 Vdc Sink 3 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDI4D Presentation | 48 |
| TM5SDI4D Characteristics | 50 |
| TM5SDI4D Wiring Diagram | 52 |

## TM5SDI4D Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDI4D electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 4 |
| Input type | Type 1 |
| Signal type | Sink |
| Rated input voltage | 24 Vdc |

## Ordering Information

The following illustration shows the TM5SDI4D:

The table below shows the model numbers for the terminal blocks and the bus bases associated with the TM5SDI4D:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SDI4D | Bus base with address setting | White |

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 3 | TM5ACTB06 <br> or <br> TM5ACTB12 | Terminal block, 6 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows the LEDs for TM5SDI4D:

The table below shows the TM5SDI4D status LEDs:

| LEDs | Color | Status | Description |
| :--- | :--- | :--- | :--- |
|  | Green | Off | No power supply |
|  |  | Single <br> Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  | On | Normal operation |  |
| e | Red | Off | OK or no power supply |
| e+r | Steady red $/$ single <br> green flash | Invalid firmware |  |
| $0-3$ | Green | Off | Corresponding input deactivated |
|  |  |  |  |
|  |  | On | Corresponding input activated |

## TM5SDI4D Characteristics

## Introduction

This is the description characteristics for the TM5SDI4D electronic module. See also Environmental Characteristics (see page 27).

## !. DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDI4D electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots .28 .8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 25 mA (all inputs On) |
| TM5 Bus 5 Vdc current draw | 28 mA |
| Power dissipation | $0.73 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz})$ |
| ID code for firmware update | 7058 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDI4D electronic module:

| Input Characteristics |  |  |
| :---: | :---: | :---: |
| Number of input channels |  | 4 |
| Wiring type |  | 1,2 or 3 wires |
| Rated input voltage |  | 24 Vdc |
| Input voltage range |  | 20.4...28.8 Vdc |
| Rated input current at 24 Vdc |  | 3.75 mA |
| Input impedance |  | $6.4 \mathrm{k} \Omega$ |
| OFF state |  | 5 Vdc max. |
| ON state |  | 15 Vdc min. |
| Input filter | Hardware | $\leq 100 \mu \mathrm{~s}$ |
|  | Software | Default 1 ms , can be configured between 0 and 25 ms in 0.2 ms intervals. |
| Isolation | Between input and internal bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Sensor Supply

The table describes the sensor supply of the TM5SDI4D electronic module:

| Supply | Power segment supply less voltage drop for internal <br> protection. |
| :--- | :--- |
| Voltage | 2 Vdc max |
| Voltage drop for internal protection at <br> 500 mA | Overload and short circuit |
| Sensor supply current (for all powered <br> connected sensors) | 500 mA |
| Internal protection |  |

## TM5SDI4D Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDI4D:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 3-wire sensor
4 2-wire sensor

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 5

## TM5SDI6D Electronic Module 6DI 24 Vdc Sink 2 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDI6D Presentation | 54 |
| TM5SDI6D Characteristics | 56 |
| TM5SDI6D Wiring Diagram | 58 |

## TM5SDI6D Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDI6D electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 6 |
| Input type | Type 1 |
| Signal type | Sink |
| Rated input voltage | 24 Vdc |

## Ordering Information

The following illustration shows the TM5SDI6D:

The table below shows the model numbers for the terminal blocks and the bus bases associated with the TM5SDI6D:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SDI6D | Electronic module | White |

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 3 | TM5ACTB06 <br> or <br> TM5ACTB12 | Terminal block, 6 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows the LEDs for TM5SDI6D:

The table below shows theTM5SDI6D status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| r | Green | Off | No power supply |
|  |  | Single <br> Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no power supply |
| e+r | Steady red / single green flash |  | Invalid firmware |
| 0-5 | Green | Off | Corresponding input deactivated |
|  |  | On | Corresponding input activated |

## TM5SDI6D Characteristics

## Introduction

This is the description characteristics for the TM5SDI6D electronic module. See also Environmental Characteristics (see page 27).

## !. DANGER

FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDI6D electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots .28 .8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 37 mA (all inputs On) |
| TM5 Bus 5 Vdc current draw | 30 mA |
| Power dissipation | $1.03 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz})$ |
| ID code for firmware update | 7059 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDI2D electronic module:

| Input Characteristics |  |
| :--- | :--- |
| Number of input channels | 6 |
| Wiring type | 1 or 2 wires |
| Rated input voltage | 24 Vdc |
| Input voltage range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| Rated input current at 24 Vdc | 3.75 mA |
| Input impedance | $6.4 \mathrm{k} \Omega$ |
| OFF state | 5 Vdc max. |
| ON state | 15 Vdc min. |
| Input filter | Hardware |
|  | Software |
| Isolation | Between input and <br> internal bus |
|  | Default 1 ms, can be configured between 0 and 25 <br> ms in 0.2 ms intervals. |
|  | See note 1 |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## TM5SDI6D Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDI6D:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 2-wire sensor
The 6-input TM5SDI6D electronic module can independently support 2-wire devices. To connect 3 -wire electronic sensors, you can add a TM5SPDG6D6F Common Distribution module.

The following illustration shows the wiring diagram for the TM5SPDG6D6F and a TM5SDI6D:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 2-wire sensor
4 3-wire sensor
5 Integrated fuse type T slow-blow 6.3 A 250 V exchangeable

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)".
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 6

## TM5SDI12D Electronic Module 12DI 24 Vdc Sink 1 Wire

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDI12D Presentation | 62 |
| TM5SDI12D Characteristics | 64 |
| TM5SDI12D Wiring Diagram | 66 |

## TM5SDI12D Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDI12D electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 12 |
| Input type | Type 1 |
| Signal type | Sink |
| Rated input voltage | 24 Vdc |

## Ordering Information

The following illustration shows the TM5SDI12D:

The table below shows the model numbers for the terminal block and the bus bases associated with the TM5SDI12D:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5 SDI12D | Bus base with address setting | White |
| 3 | TM5ACTB12 | Terminal block, 12 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows the LEDs for TM5SDI12D:

The table below shows the TM5SDI12D status LEDs:

| LEDs | Color | Status | Description |
| :--- | :--- | :--- | :--- |
| r | Green | Off | No power supply |
|  |  | Single <br> Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  | On | Normal operation |  |
| e | Red | Off | OK or no power supply |
| $\mathrm{e}+\mathrm{r}$ | Steady red $/$ single <br> green flash | Invalid firmware |  |
| $\mathbf{0 - 1 1}$ | Green | Off | Corresponding input deactivated |
|  |  | On | Corresponding input activated |

## TM5SDI12D Characteristics

## Introduction

This is the description characteristics for the TM5SDI12D electronic module. See also Environmental Characteristics (see page 27).

## !. DANGER

FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20 ) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ (176 ${ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General characteristics

The table below describes the general characteristics of the TM5SDI12D electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 73 mA (all inputs On) |
| TM5 Bus 5 Vdc current draw | 36 mA |
| Power dissipation | 1.93 W max. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 7061 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDI12D electronic module:

| Input Characteristics |  |  |
| :---: | :---: | :---: |
| Number of input channels |  | 12 |
| Wiring type |  | 1 wire |
| Rated input voltage |  | 24 Vdc |
| Input voltage range |  | 20.4...28.8 Vdc |
| De-rating | $55 . .60^{\circ} \mathrm{C}\left(131 \ldots 140^{\circ} \mathrm{F}\right)$ | 11 channels |
| Rated input current at 24 Vdc |  | 3.75 mA |
| Input impedance |  | $6.4 \mathrm{k} \Omega$ |
| OFF state |  | 5 Vdc max. |
| ON state |  | 15 Vdc min. |
| Input filter | Hardware | $\leq 100 \mu \mathrm{~s}$ |
|  | Software | Default 1 ms , can be configured between 0 and 25 ms in 0.2 ms intervals. |
| Isolation | Between input and internal bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / O$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## TM5SDI12D Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDI12D:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
32 wire-sensor
424 Vdc I/O power segment by external connection
NOTE: I/O electronic modules and the field devices connected to them must all reside on the same 24 Vdc I/O power segment. If not, the status LEDs may not function correctly. In addition, there may potentially be more significant consequences such as an explosion and/or fire hazard.

## A WARNING

## POTENTIAL EXPLOSION OR FIRE

Connect the returns from the devices to the same power source as the 24 Vdc I/O power segment serving the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

The 12-input TM5SDI12D electronic module can independently support 1-wire devices. To connect 2 -wire devices, you can add a TM5SPDD12F Common Distribution module.

The following illustration shows the wiring diagram for the TM5SPDD12F and a TM5SDI12D:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 Integrated fuse type T slow-blow 6.3 A 250 V exchangeable
42 wire-sensor

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)".
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 7

## TM5SDI16D Electronic Module 16DI 24 Vdc Sink 1 Wire

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDI16D Presentation | 70 |
| TM5SDI16D Characteristics | 72 |
| TM5SDI16D Wiring Diagram | 75 |

## TM5SDI16D Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDI16D electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 16 |
| Input type | Type 1 |
| Signal type | Sink |
| Rated input voltage | 24 Vdc |

## Ordering Information

The following illustration shows the TM5SDI16D:

The table below shows the model numbers for the terminal block and the bus base associated with the TM5SDI16D:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 | Bus base | White |
| 2 | TM5SDI16D | Electronic Module | White |
| 3 | TM5ACTB16 | Terminal block, 16 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows the LEDs for TM5SDI16D:

The table below shows the TM5SDI16D status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| S | Green | Off | No power supply |
|  |  | Single <br> Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
|  | Red | Off | OK or no power supply |
|  | Steady red / single green flash |  | Invalid firmware |
| 0-15 | Green | Off | Corresponding input deactivated |
|  |  | On | Corresponding input activated |

## TM5SDI16D Characteristics

## Introduction

This is the description characteristics for the TM5SDI16D electronic module. See also Environmental Characteristics (see page 27).

## !. DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20 ) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).

Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDI16D electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 61 mA (all inputs On) |
| TM5 Bus 5 Vdc current draw | 36 mA |
| Power dissipation | 1.65 W max. |
| Weight | $21 \mathrm{~g} \mathrm{(0.7} \mathrm{oz)}$ |
| ID code | 56838 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDI16D electronic module:

| Input Characteristics |  |
| :--- | :--- |
| Number of input channels | 16 |
| Wiring type | 1 wire |
| Rated input voltage | 24 Vdc |
| Input voltage range | $20.4 \ldots .28 .8 \mathrm{Vdc}$ |
| De-rating | See section De-rating <br> (see page 74 ). |
| Rated input current at 24 Vdc | 2.68 mA |
| Input impedance | $8.9 \mathrm{k} \Omega$ |
| OFF state | 5 Vdc max. |
| ON state | Hardware |
| Input filter | Software |
|  |  |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / O$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## De-rating of the TM5SDI16D

The following illustration shows the de-rating of simultaneity factor at 24 Vdc and 28.8 Vdc input voltage in vertical installation:

\% Simultaneity factor
${ }^{\circ} \mathrm{C}$ Ambient temperature
The following illustration shows the de-rating of simultaneity factor at 24 Vdc and 28.8 Vdc input voltage in horizontal installation:

\% Simultaneity factor
${ }^{\circ} \mathrm{C}$ Ambient temperature

## TM5SDI16D Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDI16D:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
32 wire-sensor
424 Vdc I/O power segment by external connection
NOTE: I/O electronic modules and the field devices connected to them must all reside on the same 24 Vdc I/O power segment. If not, the status LEDs may not function correctly. In addition, there may potentially be more significant consequences such as an explosion and/or fire hazard.

## A WARNING

## POTENTIAL EXPLOSION OR FIRE

Connect the returns from the devices to the same power source as the 24 Vdc I/O power segment serving the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 8

## TM5SDI2DF Electronic Module 2DI 24 Vdc Sink 3 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDI2DF Presentation | 78 |
| TM5SDI2DF Characteristics | 80 |
| TM5SDI2DF Wiring Diagram | 83 |

## TM5SDI2DF Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDI2DF electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 2 |
| Input frequency | 50 kHz max |
| Input function | Function event counter / gate measurement |
| Input type | Type 1 |
| Signal type | Sink |
| Rated input voltage | 24 Vdc |

## Ordering Information

The following illustration shows the slice with a TM5SDI2DF:

The table below shows the model numbers for the terminal block and bus base associated with the TM5SDI2DF:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 2 | TM5SDI2DF | Electronic module | White |
| 3 | TM5ACTB06 <br> or <br> TM5ACTB12 | Terminal block, 6 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide)

## Status LEDs

The following illustrationillustration shows the LEDs for TM5SDI2DF:

The table below shows the TM5SDI2DF status LEDs:

| LEDs | Color | Status | Description |
| :--- | :--- | :--- | :--- |
| r | Green | Off | No power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | Normal operation |  |
| e | Red | Off | OK or no power supply |
| e+r | Steady red / single green flash |  | Invalid firmware |
| $0-1$ | Green |  | On |

## TM5SDI2DF Characteristics

## Introduction

This is the description characteristics for the TM5SDI2DF electronic module. See also Environmental Characteristics (see page 27).

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDI2DF electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots .28 .8 \mathrm{Vdc}$ |
| 24 Vdc I/O power segment current draw | 34 mA |
| TM5 power bus 5 Vdc current draw | 30 mA |
| Power dissipation | $0.97 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 7054 dec. |

## Input Characteristics

The table below describes the input characteristics of the TM5SDI2DF electronic module:

| Input Characteristics |  |
| :--- | :--- |
| Number of input channels | 2 |
| Wiring type | 1,2 or 3 wires |
| Signal type | Sink |
| Input frequency | 50 KHz max |
| Rated input voltage | 24 Vdc |
| Input voltage range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| Rated input current at 24 Vdc | 10.5 mA |
| Input impedance | $2.23 \mathrm{k} \Omega$ |

| Input Characteristics |  |
| :--- | :--- |
| OFF state | 5 Vdc min. |
| ON state | 15 Vdc max. |
| Noise resistance - cable | Shielded cable is necessary |
| Input filter | Hardware |
|  | Software |
| Isolation between input and internal <br> bus |  |
| Isolation between channels | $0 . . .25 \mathrm{~ms}$ in 0.2 ms intervals. |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Sensor Supply

The table describes the sensor supply of the TM5SDI2DF electronic module:

| Sensor Supply | Power segment supply less voltage drop for internal <br> protection |
| :--- | :--- |
| Voltage | 2 Vdc max. |
| Voltage drop for internal protection at <br> 500 mA | Overload and short circuit |
| Sensor supply current (for all powered <br> connected sensors) | 500 mA |
| Internal protection |  |

## Event Counter

The table describes the event counter of the TM5SDI2DF electronic module:

| Event Counter |  |
| :--- | :--- |
| Number of counters | 2 |
| Counter 1 | Input 1 |
| Counter 2 | Input 2 |
| Signal form | Square wave pulse |
| Input frequency | 50 KHz max |

| Event Counter |  |
| :--- | :--- |
| Counter frequency | 50 KHz max |
| Counter size | 16 bit |
| Evaluation | Every positive edge, cyclic counter |

## Gate measurement

The table describes the gate measurement of the TM5SDI2DF electronic module:

| Gate measurement |  |
| :--- | :--- |
| Number of gate measurements | 1 |
| Gate measurement using | Input 1 or Input 2 |
| Signal form | Square wave pulse |
| Evaluation | Positive edge - Negative edge |
| Pulse length | $\geq 20 \mu \mathrm{~s}$ |
| Length of pauses between pulses | $\geq 100 \mu \mathrm{~s}$ |
| Internal clock frequency | $48 \mathrm{MHz}, 24 \mathrm{MHz}, 12 \mathrm{MHz}, 6 \mathrm{MHz}, 3 \mathrm{MHz}, 1.5 \mathrm{MHz}$, |
|  | $750 \mathrm{KHz}, 375 \mathrm{KHz}, 187.5 \mathrm{KHz}$ |
| Counter size | 16 bit |

## TM5SDI2DF Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for TM5SDI2DF:

1 Internal electronics
224 Vdc I/O power segment integrated into bus base
3 3-wire sensor
4 Counting module

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.
Use shielded, properly grounded cables for all analog and high-speed inputs or outputs and communication connections. If you do not use shielded cable for these connections, electromagnetic interference can cause signal degradation. Degraded signals can cause the controller or attached modules and equipment to perform in an unintended manner.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

- Use shielded cables for all fast I/O, analog I/O and communication signals.
- Ground cable shields for all analog I/O, fast I/O and communication signals at a single point ${ }^{1}$.
- Route communication and I/O cables separately from power cables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.
${ }^{1}$ Multipoint grounding is permissible if connections are made to an equipotential ground plane dimensioned to help avoid cable shield damage in the event of power system short-circuit currents.

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)".
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 9

## TM5SDI2A Electronic Module 2DI 100... 240 Vac 50/60 Hz 3 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDI2A Presentation | 86 |
| TM5SDI2A Characteristics | 88 |
| TM5SDI2A Wiring Diagram | 90 |

## TM5SDI2A Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDI2A electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 2 |
| Input type | Type 1 |
| Rated input voltage | $100 \ldots 240$ Vac |

## Ordering Information

The following illustration shows the TM5SDI2A:

The table below shows the model numbers for the terminal block and the bus base associated with the TM5SDI2A:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM12 | Bus base | Black |
| 2 | TM5SDI2A | Electronic Module | Black |
| 3 | TM5ACTB32 | Terminal block, 12 pins | Black |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows the LEDs for TM5SDI2A:

The table below shows the TM5SDI2A status LEDs:

| LEDs | Color | Status | Description |
| :--- | :--- | :--- | :--- |
| r | Green | Off | No power supply |
|  |  | Single <br> Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  | On | Normal operation |  |
| e | Red | Off | OK or no power supply |
|  |  | Double <br> Flash | I/O supply too low |
| e+r | Steady red $/$ single <br> green flash | Invalid firmware |  |
| $0-1$ | Green | Off | Corresponding input deactivated |
|  |  | On | Corresponding input activated |

## TM5SDI2A Characteristics

## Introduction

This is the description characteristics for the TM5SDI2A electronic module. See also Environmental Characteristics (see page 27).

## !. DANGER

FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20 ) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDI2A electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | $100 \ldots 240 \mathrm{Vac}$ <br> Connected to an external AC power |
| Power supply range | $100 \ldots 240 \mathrm{Vac}$ |
| 24 Vdc I/O segment current draw | 0 mA (N.C.) |
| TM5 Bus 5 Vdc current draw | 28 mA |
| Power dissipation | 0.69 W max. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 9540 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDI2A electronic module:

| Input Characteristics |  |
| :--- | :--- |
| Number of input channels | 2 |
| Wiring type | 1,2 or 3 wires |
| Rated input voltage | 240 Vac |
| Input voltage range | $100 \ldots 240 \mathrm{Vac}$ |
| Rated input current at 100 Vac <br> Rated input current at 240 Vac | 5 mA <br> 11 mA |
| Input filter | Hardware |
|  | $0->1: \leq 40 \mathrm{~ms}$ <br> $1->0: \leq 30 \mathrm{~ms}$ |
|  |  |
|  | Default 1 ms, can be configured <br> between 0 and 25 ms in 0.2 ms <br> intervals. |

## Sensor Supply

The table describes the sensor supply of the TM5SDI2A electronic module:

| Supply | Electronic module supply minus voltage drop for <br> short circuit protection |
| :--- | :--- |
| Voltage | 2 Vdc max. |
| Voltage drop for internal protection at <br> 500 mA | 500 Vac max., can be configured by software <br> between 0 and 500 mA |
| Sensor supply current (for all powered <br> connected sensors) | Yes |
| Short circuit protection |  |

## TM5SDI2A Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDI2A:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 3-wire sensor
4 2-wire sensor
5 External power supply: 100... 240 Vac
6 External fuse type T slow-blow 1 A 250 V

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)".
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 10

TM5SDI4A Electronic Module 4DI 100... $240 \mathrm{Vac} 50 / 60 \mathrm{~Hz}$ 2 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDI4A Presentation | 92 |
| TM5SDI4A Characteristics | 94 |
| TM5SDI4A Wiring Diagram | 96 |

## TM5SDI4A Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDI4A electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 4 |
| Input type | Type 1 |
| Rated input voltage | $100 \ldots 240$ Vac |

## Ordering Information

The following illustration shows the TM5SDI4A:

The table below shows the model numbers for the terminal block and the bus base associated with the TM5SDI4A:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM12 | Bus base | Black |
| 2 | TM5SDI4A | Electronic Module | Black |
| 3 | TM5ACTB32 | Terminal block, 12 pins | Black |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows the LEDs for TM5SDI4A:

The table below shows the TM5SDI4A status LEDs:

| LEDs | Color | Status | Description |
| :--- | :--- | :--- | :--- |
| r | Green | Off | No power supply |
|  |  | Single <br> Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  | On | Normal operation |  |
| e | Red | Off | OK or no power supply |
|  |  | Double <br> Flash | I/O supply too low |
| e+r | Steady red $/$ single <br> green flash | Invalid firmware |  |
| $0-3$ | Green | Off | Corresponding input deactivated |
|  |  | On | Corresponding input activated |

## TM5SDI4A Characteristics

## Introduction

This is the description characteristics for the TM5SDI4A electronic module. See also Environmental Characteristics (see page 27).

## ! DANGER

FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDI4A electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | $100 \ldots 240 \mathrm{Vac}$ <br> Connected to an external AC power |
| Power supply range | $100 \ldots 240 \mathrm{Vac}$ |
| 24 Vdc I/O segment current draw | 0 mA (N.C.) |
| TM5 Bus 5 Vdc current draw | 34 mA |
| Power dissipation | 1.08 W max. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code | 9541 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDI4A electronic module:

| Input Characteristics |  |  |
| :---: | :---: | :---: |
| Number of input channels |  | 4 |
| Wiring type |  | 1 or 2 wires |
| Rated input voltage |  | 240 Vac |
| Input voltage range |  | 120... 240 Vac |
| Rated input current at 120 Vac Rated input current at 240 Vac |  | $\begin{aligned} & 5 \mathrm{~mA} \\ & 11 \mathrm{~mA} \end{aligned}$ |
| Input filter | Hardware | $\begin{aligned} & 0->1: \leq 40 \mathrm{~ms} \\ & 1->0: \leq 30 \mathrm{~ms} \end{aligned}$ |
|  | Software | Default 1 ms , can be configured between 0 and 25 ms in 0.2 ms intervals. |
| Isolation | Between channels and bus | 1 minute 2500 Vac |
|  | Between channels | Not isolated |

## TM5SDI4A Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for TM5SDI4A:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 2-wire sensor
4 External power supply: 100... 240 Vac
5 External fuse type T slow-blow $1 \mathrm{~A}-250 \mathrm{~V}$

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 11

## TM5SDI6U Electronic Module 6DI 100... 120 Vac $50 / 60$ Hz 1 Wire

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDI6U Presentation | 98 |
| TM5SDI6U Characteristics | 100 |
| TM5SDI6U Wiring Diagram | 102 |

## TM5SDI6U Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDI6U electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 6 |
| Input type | Type 1 |
| Rated input voltage | $100 \ldots 120 \mathrm{Vac}$ |

## Ordering Information

The following illustration shows the TM5SDI6U:

The table below shows the model numbers for the terminal block and the bus base associated with the TM5SDI6U:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM12 | Bus base | Black |
| 2 | TM5SDI6U | Electronic Module | Black |
| 3 | TM5ACTB32 | Terminal block, 12 pins | Black |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows the LEDs for TM5SDI6U:

The table below shows the TM5SDI6U status LEDs:

| LEDs | Color | Status | Description |
| :--- | :--- | :--- | :--- |
| r | Green | Off | No power supply |
|  |  | Single <br> Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  | On | Normal operation |  |
| e | Red | Off | OK or no power supply |
|  |  | Double <br> Flash | I/O supply too low |
| e+r | Steady red $/$ single <br> green flash | Invalid firmware |  |
| $0-5$ | Green | Off | Corresponding input deactivated |
|  |  | On | Corresponding input activated |

## TM5SDI6U Characteristics

## Introduction

This is the description characteristics for the TM5SDI6U electronic module. See also Environmental Characteristics (see page 27).

## !. DANGER

FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDI6U electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 120 Vac <br> Connected to the external power AC |
| Power supply range | $100 \ldots 120 \mathrm{Vac}$ |
| 24 Vdc I/O segment current draw | 0 mA (N.C.) |
| TM5 Bus 5 Vdc current draw | 42 mA |
| Power dissipation | $0.89 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code | 9583 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDI6U electronic module:

| Input Characteristics |  |  |
| :---: | :---: | :---: |
| Number of input channels |  | 6 |
| Wiring type |  | 1 wire |
| Rated input voltage |  | 120 Vac |
| Input voltage range |  | 100... 120 Vac |
| Rated input current at 120 Vac |  | 10 mA at 60 Hz 8.5 mA at 50 Hz |
| Input filter | Hardware | $\begin{aligned} & 0->1 \leq 15 \mathrm{~ms} \\ & 1->0 \leq 30 \mathrm{~ms} \end{aligned}$ |
|  | Software | Default 1 ms , can be configured between 0 and 25 ms in 0.2 ms intervals. |
| Isolation | Between channels and bus | 1 minute 1500 Vac |
|  | Between channels | Not isolated |

## TM5SDI6U Wiring Diagram

## Wiring Diagram

(5)

1 Internal electronics
$224 \mathrm{Vdc} \mathrm{I} / \mathrm{O}$ power segment integrated into the bus bases
3 1-wire sensor
4 External fuse type T slow-blow $1 \mathrm{~A}-250 \mathrm{~V}$
5 External power supply 110 Vac

## 4. WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Part III

## TM5 System Digital Output Electronic Modules

## What Is in This Part?

This part contains the following chapters:

| Chapter | Chapter Name | Page |
| :---: | :--- | :---: |
| 12 | TM5SDO2T Electronic Module 2DO 24 Vdc Tr 0.5 A 3 Wires | 105 |
| 13 | TM5SDO4T Electronic Module 4DO 24 Vdc Tr 0.5 A 3 Wires | 115 |
| 14 | TM5SDO4TA Electronic Module 4DO 24 Vdc Tr 2 A 3 Wires | 125 |
| 15 | TM5SDO6T Electronic Module 6DO 24 Vdc Tr 0.5 A 2 Wires | 135 |
| 16 | TM5SDO8TA Electronic Module 8DO 24 Vdc Tr 2 A 1 Wire | 143 |
| 17 | TM5SDO12T Electronic Module 12DO 24 Vdc Tr 0.5 A 1 Wire | 153 |

| 19 | TM5SDO2R Electronic Module 2DO 30 Vdc/230 Vac 50/60 Hz 5A Relay C/O | 173 |
| 20 | TM5SDO4R Electronic Module 4DO 30 Vdc/230 Vac 50/60 Hz 5 A Relay N/O | 181 |
| 21 | TM5SDO2S Electronic Module 2DO 240 Vac 50/60 Hz Triac 1 A 3 Wires | 189 |

## Chapter 12

## TM5SDO2T Electronic Module 2DO 24 Vdc Tr 0.5 A 3 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDO2T Presentation | 106 |
| TM5SDO2T Characteristics | 109 |
| TM5SDO2T Wiring Diagram | 112 |

## TM5SDO2T Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDO2T electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of outputs channels | 2 |
| Output type | Transistor |
| Signal type | Source |
| Rated input voltage | 24 Vdc |
| Output current | 0.5 A max. |

## Ordering Information

The following illustration shows the TM5SDO2T:

The table below shows the model numbers for the terminal blocks and the bus bases associated with the TM5SDO2T:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SDO2T | Electronic Module base with address setting | White |

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 3 | TM5ACTB06 <br> or <br> TM5ACTB12 | Terminal block, 6 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows LEDs for TM5SDO2T:

The table below shows the TM5SDO2T status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| r | Green | Off | No power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no power supply |
|  |  | Single flash | Error detected on output channels ${ }^{(1)}$ |
| e+r | Steady Red / <br> Single Green flash |  | Invalid firmware |
| NOTE: <br> ${ }^{(1)}$ The e LED flashes when detecting one of the following errors on output channels: <br> - Short-circuit <br> - Overload <br> - No 24 Vdc Power Segment supply and an output is at logic 1 |  |  |  |

| LEDs | Color | Status | Description |
| :--- | :--- | :--- | :--- |
| $0-1$ | Yellow | Off | Corresponding output deactivated |
|  | On | Corresponding output activated |  |
| NOTE: |  |  |  |
| (1) The e LED flashes when detecting one of the following errors on output channels: |  |  |  |
| - Short-circuit |  |  |  |
| - Overload |  |  |  |
| - No 24 Vdc Power Segment supply and an output is at logic 1 |  |  |  |

## TM5SDO2T Characteristics

## Introduction

This is the description characteristics for TM5SDO2T electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

| WNARNING |
| :--- |
| UNINTENDED EQUIPMENT OPERATION |
| Do not exceed any of the rated values specified in the environmental and electrical characteristics |
| tables. |
| Failure to follow these instructions can result in death, serious injury, or equipment damage. |

## General Characteristics

The table below describes the general characteristics of the TM5SDO2T electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots . .28 .8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 14 mA |
| TM5 bus 5 Vdc current draw | 26 mA |
| Power dissipation | $0.57 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 7062 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO2T electronic module:

| Output Characteristics |  |
| :--- | :--- |
| Output channels | 2 |
| Wiring type | 1,2 or 3 wires |
| Output current | 0.5 A max. per output |
| Total output current | 1 A max. |
| Output voltage | 24 Vdc |
| Output voltage range | $20.4 . .28 .8$ Vdc |
| Voltage drop | 0.3 Vdc max. at 0.5 A rated current |
| Leakage current when switched off | $5 \mu \mathrm{~A}$ |
| Turn on time | $300 \mu$ s max. |
| Turn off time | 300 s max. |
| Output protection | Against short-circuit and overload, thermal protection |
| Short-circuit output peak current | 12 A max. |
| Automatic rearming after short- <br> circuit or overload | Yes, 10 ms min. depending on internal temperature |
| Protection against reverse polarity | Yes |
| Clamping voltage | Typ. 50 Vdc |
| Switching <br> frequency | Resistive load |
| Inductive load | 500 Hz max. |
| Isolation | Bee the switching inductive load characteristics <br> (see page 111). <br> internal bus |
| Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Actuator Supply

The table below describes the actuator supply of the TM5SDO2T electronic module:

| Supply |  |
| :--- | :--- |
| Voltage | Power segment supply less voltage drop for internal <br> protection. |
| Voltage drop for internal protection at <br> 500 mA | 2 Vdc max |
| Actuator supply current (for all <br> powered connected actuators) | 500 mA |
| Internal protection | Overload and short-circuit |

## Switching Inductive Loads

The curves below provide the switching inductive load characteristics for the TM5SDO2T electronic module.

(3)

1 Load resistance in $\Omega$
2 Load inductance
3 Max. operating cycles / second

## TM5SDO2T Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for TM5SDO2T:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 Inductive load protection
4 2-wire load
5 3-wire load

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 13

## TM5SDO4T Electronic Module 4DO 24 Vdc Tr 0.5 A 3 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |

## TM5SDO4T Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDO4T electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of output channels | 4 |
| Output type | Transistor |
| Signal type | Source |
| Rated input voltage | 24 Vdc |
| Output current | 0.5 A max. |

## Ordering Information

The following illustration shows the TM5SDO4T:

The table below shows the model numbers for the terminal blocks and the bus bases associated with the TM5SDO4T:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SDO4T | Bus base with address setting |  |$\quad$ White 

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 3 | TM5ACTB06 <br> or <br> TM5ACTB12 | Terminal block, 6 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows LEDs for TM5SDO4T:

The table below shows the TM5SDO4T status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| r | Green | Off | No power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no power supply |
|  |  | Single flash | Error detected on output channels ${ }^{(1)}$ |
| e+r | Steady Red / <br> Single Green flash |  | Invalid firmware |
| NOTE: <br> ${ }^{(1)}$ The e LED flashes when detecting one of the following errors on output channels: <br> - Short-circuit <br> - Overload <br> - No 24 Vdc Power Segment supply and an output is at logic 1 |  |  |  |

| LEDs | Color | Status | Description |
| :--- | :--- | :--- | :--- |
| $0-3$ | Yellow | Off | Corresponding output deactivated |
|  | On | Corresponding output activated |  |
| NOTE: |  |  |  |
| (1) The e LED flashes when detecting one of the following errors on output channels: |  |  |  |
| - Short-circuit |  |  |  |
| - Overload |  |  |  |
| - No 24 Vdc Power Segment supply and an output is at logic 1 |  |  |  |

## TM5SDO4T Characteristics

## Introduction

This is the description characteristics for TM5SDO4T electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

| WNARNING |
| :--- |
| UNINTENDED EQUIPMENT OPERATION |
| Do not exceed any of the rated values specified in the environmental and electrical characteristics |
| tables. |
| Failure to follow these instructions can result in death, serious injury, or equipment damage. |

## General Characteristics

The table below describes the general characteristics of the TM5SDO4T electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots . .28 .8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 20 mA |
| TM5 bus 5 Vdc current draw | 32 mA |
| Power dissipation | $0.86 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 7063 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO4T electronic module:

| Output Characteristics |  |  |
| :---: | :---: | :---: |
| Output channels |  | 4 |
| Wiring type |  | 1,2 or 3 wires |
| Output current |  | 0.5 A max. per output |
| Total output current |  | 2 A max. |
| Output voltage |  | 24 Vdc |
| Output voltage range |  | 20.4...28.8 Vdc |
| Voltage drop |  | 0.3 Vdc max. at 0.5 A rated current |
| Leakage current when switched off |  | $5 \mu \mathrm{~A}$ |
| Turn on time |  | $300 \mu s$ max. |
| Turn off time |  | $300 \mu \mathrm{~s}$ max. |
| Output protection |  | Against short-circuit and overload, thermal protection |
| Short circuit output peak current |  | 12 A max. |
| Automatic rearming after short circuit or overload |  | Yes, 10 ms min . depending on internal temperature |
| Protection against reverse polarity |  | Yes |
| Clamping voltage |  | Typ. 50 Vdc |
| Switching frequency | Resistive load | 500 Hz max. |
|  | Inductive load | See the switching inductive load characteristics (see page 121). |
| Isolation | Between input and internal bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Actuator Supply

The table below describes the actuator supply of the TM5SDO4T electronic module:

| Supply |  |
| :--- | :--- |
| Voltage | Power segment supply less voltage drop for internal <br> protection. |
| Voltage drop for internal protection at <br> 500 mA | 2 Vdc max |
| Actuator supply current (for all <br> powered connected actuators) | 500 mA |
| Internal protection | Overload and short circuit |

## Switching Inductive Loads

The curves below provide the switching inductive load characteristics for the TM5SDO4T electronic module.

(3)

1 Load resistance in $\Omega$
2 Load inductance
3 Max. operating cycles / second

## TM5SDO4T Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for TM5SDO4T:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 Inductive load protection
4 2-wire load
5 3-wire load

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 14

## TM5SDO4TA Electronic Module 4DO 24 Vdc Tr 2 A 3 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDO4TA Presentation | 126 |
| TM5SDO4TA Characteristics | 129 |
| TM5SDO4TA Wiring Diagram | 132 |

## TM5SDO4TA Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDO4TA electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of output channels | 4 |
| Output type | Transistor |
| Signal type | Source |
| Rated input voltage | 24 Vdc |
| Output current | 2 A max. |

## Ordering Information

The following illustration shows the TM5SDO4TA:

The table below shows the model numbers for the terminal blocks and the bus bases associated with the TM5SDO4TA:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SDO4TA | Electronic Module | White |
| 3 | TM5ACTB06 <br> or <br> TM5ACTB12 | Terminal block, 6 pins <br> Terminal block, 12 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows LEDs for TM5SDO4TA:

The table below shows the TM5SDO4TA status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| r | Green | Off | No power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no power supply |
|  |  | Single flash | Error detected on output channels ${ }^{(1)}$ |
| e+r | Steady Red / <br> Single Green flash |  | Invalid firmware |
| 0-3 | Yellow | Off | Corresponding output deactivated |
|  |  | On | Corresponding output activated |
| NOTE: <br> ${ }^{(1)}$ The e LED flashes when detecting one of the following errors on output channels: <br> - Short-circuit <br> - Overload <br> - No 24 Vdc Power Segment supply and an output is at logic 1 |  |  |  |

## TM5SDO4TA Characteristics

## Introduction

This is the description characteristics for the TM5SDO4TA electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

| WNARNING |
| :--- |
| UNINTENDED EQUIPMENT OPERATION |
| Do not exceed any of the rated values specified in the environmental and electrical characteristics |
| tables. |
| Failure to follow these instructions can result in death, serious injury, or equipment damage. |

## General Characteristics

The table below describes the general characteristics of the TM5SDO4TA electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots . .28 .8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 21 mA |
| TM5 bus 5 Vdc current draw | 32 mA |
| Power dissipation | $2.10 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 7068 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO4TA electronic module:

| Output Characteristics |  |
| :--- | :--- |
| Output channels | 4 |
| Wiring type | 1,2 or 3 wires |
| Output current | 2 A max. per output |
| Total output current | 4 A max. |
| Output voltage | 24 Vdc |
| Output voltage range | $20.4 . .28 .8$ Vdc |
| Voltage drop | 0.5 Vdc max. at 2 A rated current |
| Leakage current when switched off | $5 \mu \mathrm{~A}$ |
| Turn on time | 300 s max. |
| Turn off time | 300 s max. |
| Output protection | Against short-circuit and overload, thermal protection |
| Short circuit output peak current | 12 A max. |
| Automatic rearming after short <br> circuit or overload | Yes, 10 ms min. depending on internal temperature |
| Protection against reverse polarity | Yes |
| Clamping voltage | Typ. 50 Vdc |
| Switching <br> frequency | Resistive load |
| Inductive load | 500 Hz max. |
| Isolation | Bee the switching inductive load characteristics <br> (see page 131). <br> internal bus |
| Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Actuator Supply

The table below describes the actuator supply of the TM5SDO4TA electronic module:

| Supply |  |
| :--- | :--- |
| Voltage | Power segment supply less voltage drop for internal <br> protection. |
| Voltage drop for internal protection at <br> 500 mA | 2 Vdc max |
| Actuator supply current (for all <br> powered connected actuators) | 500 mA |
| Internal protection | Overload and short circuit |

## Switching Inductive Loads

The curves below provide the switching inductive load characteristics for the TM5SDO4TA electronic module.

(2)

1 Load resistance in $\Omega$
2 Load inductance
3 Max. operating cycles / second

## TM5SDO4TA Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for TM5SDO4TA:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 Inductive load protection
4 2-wire load
5 3-wire load

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 15

## TM5SDO6T Electronic Module 6DO 24 Vdc Tr 0.5 A 2 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |

| TM5SDO6T Presentation | 136 |
| TM5SDO6T Characteristics | 139 |
| TM5SDO6T Wiring Diagram | 142 |

## TM5SDO6T Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDO6T electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of output channels | 6 |
| Output type | Transistor |
| Signal type | Source |
| Rated input voltage | 24 Vdc |
| Output current | 0.5 A max. |

## Ordering Information

The following illustration shows the TM5SDO6T:

The table below shows the model numbers for the terminal blocks and the bus bases associated with the TM5SD06T:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SDO6T | Electronic module | White |
| 3 | TM5ACTB06 <br> or <br> TM5ACTB12 | Terminal block, 6 pins <br> Terminal block, 12 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows LEDs for TM5SDO6T:

The table below shows the TM5SDO6T status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| r | Green | Off | No power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no power supply |
|  |  | Single flash | Error detected on output channels ${ }^{(1)}$ |
| e+r | Steady Red / <br> Single Green flash |  | Invalid firmware |
| 0-5 | Yellow | Off | Corresponding output deactivated |
|  |  | On | Corresponding output activated |
| NOTE: <br> ${ }^{(1)}$ The e LED flashes when detecting one of the following errors on output channels: <br> - Short-circuit <br> - Overload <br> - No 24 Vdc Power Segment supply and an output is at logic 1 |  |  |  |

## TM5SDO6T Characteristics

## Introduction

This is the description characteristics for the TM5SDO6T electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

| WNARNING |
| :--- |
| UNINTENDED EQUIPMENT OPERATION |
| Do not exceed any of the rated values specified in the environmental and electrical characteristics |
| tables. |
| Failure to follow these instructions can result in death, serious injury, or equipment damage. |

## General Characteristics

The table below describes the general characteristics of the TM5SDO6T electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots . .28 .8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 30 mA |
| TM5 bus 5 Vdc current draw | 36 mA |
| Power dissipation | $1.20 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 7064 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO6T electronic module:

| Output Characteristics |  |  |
| :---: | :---: | :---: |
| Output channels |  | 6 |
| Wiring type |  | 1 or 2 wires |
| Output current |  | 0.5 A max. per output |
| Total output current |  | 3 A max. |
| Output voltage |  | 24 Vdc |
| Output voltage range |  | 20.4...28.8 Vdc |
| Voltage drop |  | 0.3 Vdc max. at 0.5 A rated current |
| Leakage current when switched off |  | $5 \mu \mathrm{~A}$ |
| Turn on time |  | $300 \mu s$ max. |
| Turn off time |  | $300 \mu \mathrm{~s}$ max. |
| Output protection |  | Against short-circuit and overload, thermal protection |
| Short-circuit output peak current |  | 12 A max. |
| Automatic rearming after shortcircuit or overload |  | Yes, 10 ms min . depending on internal temperature |
| Protection against reverse polarity |  | Yes |
| Clamping voltage |  | Typ. 50 Vdc |
| Switching frequency | Resistive load | 500 Hz Max. |
|  | Inductive load | See the switching inductive load characteristics (see page 141). |
| Isolation | Between input and internal bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Switching Inductive Loads

The curves below provide the switching inductive load characteristics for the TM5SDO6T electronic module.

1 Load resistance in $\Omega$
2 Load inductance
3 Max. operating cycles / second

|  |  | Double flash | External I/O supply too low |
| e+r | Steady Red / <br> Single Green flash |  | Invalid firmware |
| 0-7 | Yellow | Off | Corresponding output deactivated |
|  |  | On | Corresponding output activated |
| NOTE: <br> ${ }^{(1)}$ The e LED flashes when detecting one of the following errors on output channels: <br> - Short-circuit <br> - Overload |  |  |  |

## TM5SDO8TA Characteristics

## Introduction

This is the description characteristics for TM5SDO8TA electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

| WARNING |
| :--- |
| UNINTENDED EQUIPMENT OPERATION |
| Do not exceed any of the rated values specified in the environmental and electrical characteristics |
| tables. |
| Failure to follow these instructions can result in death, serious injury, or equipment damage. |

## General Characteristics

The table below describes the general characteristics of the TM5SDO8TA electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> External power supply |
| Power supply range | $20.4 \ldots . .28 .8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 0 mA |
| TM5 bus 5 Vdc current draw | 44 mA |
| Power dissipation | $1.50 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 7069 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO8TA electronic module:

| Output Characteristics |  |  |
| :---: | :---: | :---: |
| Output channels |  | 8 |
| Wiring type |  | 1 wire |
| Output current |  | 2 A max. per output* |
| Total output current |  | 8 A max. |
| Output voltage |  | 24 Vdc |
| Output voltage range |  | 20.4...28.8 Vdc |
| De-rating | $\begin{array}{\|l\|} \hline-10 \ldots . .55^{\circ} \mathrm{C} \\ \left(14 \ldots . .131^{\circ} \mathrm{F}\right) \\ \hline \end{array}$ | $\mathrm{I}=1.5$ A max. by channel* |
|  | $\begin{aligned} & 55 \ldots 60^{\circ} \mathrm{C} \\ & \left(131 \ldots 140^{\circ} \mathrm{F}\right) \end{aligned}$ | $\mathrm{I}=1$ A max. by channel* |
| Voltage drop |  | 0.5 Vdc max. at 2 A rated current |
| Leakage current when switched off |  | $5 \mu \mathrm{~A}$ |
| Turn on time |  | $300 \mu \mathrm{~s}$ max. |
| Turn off time |  | $300 \mu$ s max. |
| Output protection |  | Against short-circuit and overload, thermal protection |
| Short-circuit output peak current |  | 12 A max. |
| Automatic rearming after shortcircuit or overload |  | Yes, 10 ms min . depending on internal temperature |
| Protection against reverse polarity |  | Yes |
| Clamping voltage |  | Typ. 50 Vdc |
| Switching frequency | Resistive load | 500 Hz Max. |
|  | Inductive load | See the switching inductive load characteristics (see page 150). |
| Isolation | Between input and internal bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |
| * Refer to De-rating curve of the TM5SDO8TA (see page 149) |  |  |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / O$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## De-rating of the TM5SDO8TA

It is possible to obtain the 2 A rating by observing temperature restrictions. Refer to the de-rating graph below. If the modules adjacent to the TM5SDO8TA dissipate no more than 1 W , this graph applies and 2 A / output can be maintained at $35^{\circ} \mathrm{C}\left(95^{\circ} \mathrm{F}\right)$.

If the dissipation restriction of adjacent modules is not possible in your configuration, the de-rating must shift by $-5^{\circ} \mathrm{C}\left(-9^{\circ} \mathrm{F}\right)$, and 2 A / output can be maintained at $30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right)$. In most industrial applications, this would require the module to be in an air conditioned enclosure to maintain such temperatures.

## Switching Inductive Loads

The curves below provide the switching inductive load characteristics for the TM5SDO8TA electronic module.

(2)

1 Coil resistance in $\Omega$
2 Coil inductance
3 Max. operating cycles / second

## TM5SDO8TA Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDO8TA:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 Inductive load protection
4 2-wire load
50 Vdc I/O power segment by external connection
6 PS1: External isolated power supply 24 Vdc
7 External fuse, Type T slow-blow 8 A max., 250 V

## A WARNING

## POTENTIAL OF OVERHEATING AND FIRE

- Do not connect the modules directly to line voltage.
- Use only isolating PELV systems according to IEC 61140 to supply power to the modules.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

## POTENTIAL EXPLOSION OR FIRE

Connect the returns from the devices to the same power source as the 24 Vdc I/O power segment serving the module.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

Refer to Protecting Outputs from Inductive Load Damage (see Modicon, TM5 Communication Modules, Hardware Guide) for additional important information on this topic.

## Chapter 17

TM5SDO12T Electronic Module 12DO 24 Vdc Tr 0.5 A 1 Wire

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDO12T Presentation | 154 |
| TM5SDO12T Characteristics | 157 |
| TM5SDO12T Wiring Diagram | 160 |

## TM5SDO12T Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDO12T electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of output channels | 12 |
| Output type | Transistor |
| Signal type | Source |
| Rated input voltage | 24 Vdc |
| Output current | 0.5 A max. |

## Ordering Information

The following illustration shows the TM5SDO12T:

The table below shows the model numbers for the terminal block and the bus bases associated with the TM5SDO12T:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SDO12T | Bus base with address setting | White |
| 3 | TM5ACTB12 | Terminal block, 12 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows LEDs for TM5SDO12T:

The table below shows the TM5SDO12T status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| r | Green | Off | No power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no power supply |
|  |  | Single flash | Error detected on output channels ${ }^{(1)}$ |
| e+r | Steady Red / <br> Single Green flash |  | Invalid firmware |
| 0-11 | Yellow | Off | Corresponding output deactivated |
|  |  | On | Corresponding output activated |
| NOTE: <br> ${ }^{(1)}$ The e LED flashes when detecting one of the following errors on output channels: <br> - Short circuit <br> - Overload <br> - No I/O supply but the TM5 bus still powered and the output is activated |  |  |  |

## TM5SDO12T Characteristics

## Introduction

This is the description characteristics for the TM5SDO12T electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

| WARNING |
| :--- |
| UNINTENDED EQUIPMENT OPERATION |
| Do not exceed any of the rated values specified in the environmental and electrical characteristics |
| tables. |
| Failure to follow these instructions can result in death, serious injury, or equipment damage. |

## General Characteristics

The table below describes the general characteristics of the TM5SDO12T electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots . .28 .8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 48 mA |
| TM5 bus 5 Vdc current draw | 52 mA |
| Power dissipation | $2.04 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 7066 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO12T electronic module:

| Output Characteristics |  |  |
| :---: | :---: | :---: |
| Output channels |  | 12 |
| Wiring type |  | 1 wire |
| Output current |  | 0.5 A max. per output |
| Total output current |  | 6 A max. |
| Output voltage |  | 24 Vdc |
| Output voltage range |  | 20.4...28.8 Vdc |
| De-rating | $55 . .60^{\circ} \mathrm{C}\left(131 \ldots 140^{\circ} \mathrm{C}\right)$ | $\mathrm{I}=0.4 \mathrm{~A}$ max. by channel |
| Voltage drop |  | 0.3 Vdc max. at 0.5 A rated current |
| Leakage current when switched off |  | $5 \mu \mathrm{~A}$ |
| Turn on time |  | $300 \mu \mathrm{~s}$ max. |
| Turn off time |  | $300 \mu \mathrm{~s}$ max. |
| Output protection |  | Against short-circuit and overload, thermal protection |
| Short circuit output peak current |  | 12 A max. |
| Automatic rearming after short circuit or overload |  | Yes, 10 ms min. depending on internal temperature |
| Protection against reverse polarity |  | Yes |
| Clamping voltage |  | Typ. 50 Vdc |
| Switching frequency | Resistive load | 500 Hz Max. |
|  | Inductive load | See the switching inductive load characteristics (see page 159). |
| Isolation | Between input and internal bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / O$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Switching Inductive Loads

The curves below provide the switching inductive load characteristics for the TM5SDO12T electronic module.

1 Load resistance in $\Omega$
2 Load inductance
3 Max. operating cycles / second

## TM5SDO12T Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDO12T:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 Inductive load protection
4 2-wire load
50 Vdc I/O power segment by external connection
NOTE: I/O electronic modules and the field devices connected to them must all reside on the same 24 Vdc I/O power segment. If not, the status LEDs may not function correctly. In addition, there may potentially be more significant consequences such as an explosion and/or fire hazard.

## A WARNING

## POTENTIAL EXPLOSION OR FIRE

Connect the returns from the devices to the same power source as the 24 Vdc I/O power segment serving the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

The 12-output TM5SDO12T electronic module can independently support 1-wire devices. To connect 2-wire devices, you can add a TM5SPDG12F Common Distribution module.
The following illustration shows the wiring diagram for the TM5SPDG12F and TM5SDO12T:

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)".
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 18

TM5SDO16T Electronic Module 16DO 24 Vdc Tr 0.5 A 1 Wire

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDO16T Presentation | 164 |
| TM5SDO16T Characteristics | 166 |
| TM5SDO16T Wiring Diagram | 170 |

## TM5SDO16T Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDO16T electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of output channels | 16 |
| Output type | Transistor |
| Signal type | Source |
| Rated input voltage | 24 Vdc |
| Output current | 0.5 A max. |

## Ordering Information

The following illustration shows the TM5SDO16T:

The table below shows the model numbers for the terminal block and the bus bases associated with the TM5SDO16T:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 | Bus base | White <br> White |
| 2 | TM5SDO16T | Electronic Module | White |
| 3 | TM5ACTB16 | Terminal block, 16 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows LEDs for TM5SDO16T:

The table below shows the TM5SDO16T status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| S | Green | Off | No power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
|  | Red | Off | OK or no power supply |
|  |  | Single flash | Error detected on output channels ${ }^{(1)}$ |
|  | Steady Red / <br> Single Green flash |  | Invalid firmware |
| 0-15 | Yellow | Off | Corresponding output deactivated |
|  |  | On | Corresponding output activated |
| NOTE: <br> ${ }^{(1)}$ When the diagnostic of the outputs is activated, the s LED flashes when detecting one of the following errors on output channels: <br> - Short -circuit <br> - Overload <br> - Status of output not corresponding to the command status |  |  |  |

## TM5SDO16T Characteristics

## Introduction

This is the description characteristics for the TM5SDO16T electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDO16T electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 40 mA |
| TM5 bus 5 Vdc current draw | 56 mA |
| Power dissipation | 1.79 W max. |
| Weight | $24 \mathrm{~g} \mathrm{(0.8} \mathrm{oz)}$ |
| ID code for firmware update | 56839 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO16T electronic module:

| Output Characteristics |  |
| :--- | :--- |
| Output channels | 16 |
| Wiring type | 1 wire |
| Output current | 0.5 A max. per output |
| Total output current | 8 A max. |
| Output voltage | 24 Vdc |
| Output voltage range | $20.4 \ldots 28.8$ Vdc |
| De-rating | See section Current de-rating |
| Voltage drop | 0.1 Vdc max. at 0.5 A rated current |
| Leakage current when switched off | $5 \mu \mathrm{~A}$ |
| Turn on time | $300 \mu s$ max. |
| Turn off time | $300 \mu s$ max. |
| Output diagnostic | Output monitoring with 10 ms delay, the <br> function is activated or desactivated by <br> software. |
| Output protection | Against short-circuit and overload, <br> thermal protection |
| Short -circuit output peak current | 3 A max. |
| Automatic rearming after short -circuit or overload | Yes, 10 ms min. depending on internal <br> temperature |
| Protection against reverse polarity | Yes |
| Clamping voltage | Typ. 45 Vdc |
| Switching <br> frequency <br> Resistive load <br> Inductive load <br> Between input and internal bus <br> Between channels | See the switching inductive load <br> characteristics (see page 159). |
| See note 1 |  |
| Not isolated |  |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Current de-rating

The following illustration shows the current de-rating in vertical installation:

A Total current
${ }^{\circ} \mathrm{C}$ Ambient temperature

## Switching Inductive Loads

The curves below provide the switching inductive load characteristics for the TM5SDO16T electronic module.

1 Load resistance in $\Omega$
2 Load inductance
3 Max. operating cycles / second

## TM5SDO16T Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDO16T:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 Inductive load protection
4 2-wire load
50 Vdc I/O power segment by external connection
NOTE: I/O electronic modules and the field devices connected to them must all reside on the same 24 Vdc I/O power segment. If not, the status LEDs may not function correctly. In addition, there may potentially be more significant consequences such as an explosion and/or fire hazard.

## A WARNING

## POTENTIAL EXPLOSION OR FIRE

Connect the returns from the devices to the same power source as the 24 Vdc I/O power segment serving the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

| UWARNING |
| :--- |
| UNINTENDED EQUIPMENT OPERATION |
| Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". |
| Failure to follow these instructions can result in death, serious injury, or equipment damage. |

## Chapter 19

TM5SDO2R Electronic Module 2DO 30 Vdc/230 Vac 50/60 Hz 5A Relay C/O

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDO2R Presentation | 174 |
| TM5SDO2R Characteristics | 176 |
| TM5SDO2R Wiring Diagram | 179 |

## TM5SDO2R Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDO2R electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of output channels | 2 |
| Output type | Relay |
| Rated input voltage | $30 \mathrm{Vdc} / 230 \mathrm{Vac}$ |
| Output current | 5 A max. |

## Ordering Information

The following illustration shows the TM5SDO2R:

The table below shows the model numbers for the terminal block and the bus bases associated with the TM5SDO2R:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM12 | Bus base | Black |
| 2 | TM5SDO2R | Electronic Module | Black |
| 3 | TM5ACTB32 | Terminal block, 12 pins | Black |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows LEDs for TM5SDO2R:

The table below shows the TM5SDO2R status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| r | Green | Off | No power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no power supply |
|  |  | On | Error detected or reset state |
| e+r | Steady Red / <br> Single Green flash |  | Invalid firmware |
| 0-1 | Yellow | Off | Corresponding output deactivated |
|  |  | On | Corresponding output activated |

## TM5SDO2R Characteristics

## Introduction

This is the description characteristics for the TM5SDO2R electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDO2R electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | $30 \mathrm{Vdc} / 230 \mathrm{Vac}$ <br> Connected to the external AC or DC power |
| Power supply range | $24 \mathrm{Vdc} . .36 \mathrm{Vdc}$ <br> $184 \mathrm{Vac} . .276 \mathrm{Vac}$ |
| 24 Vdc I/O segment current draw | $0 \mathrm{~mA}(\mathrm{~N} . \mathrm{C})$. |
| TM5 bus 5 Vdc current draw | 90 mA |
| Power dissipation | 2.45 W max. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$. |
| ID code for firmware update | 8410 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO2R electronic module:

| Output Characteristics |  |  |
| :---: | :---: | :---: |
| Output channels |  | 2 |
| Wiring type |  | 2 (C/O) contacts |
| Output current |  | 5 A max. per output at 30 Vdc 5 A max. per output at 230 Vac |
| Total output current |  | 10 A max. at 30 Vdc 10 A max. at 230 Vac |
| Output voltage |  | $30 \mathrm{Vdc} / 230 \mathrm{Vac}$ |
| Output voltage range |  | 24 Vdc... 36 Vdc <br> 184 Vac... 276 Vac |
| De-rating | $55 . . .60^{\circ} \mathrm{C}\left(131 . .140{ }^{\circ} \mathrm{F}\right)$ | I = 3 A max. by channel |
| Turn on time |  | 10 ms max . |
| Turn off time |  | 10 ms max . |
| Protective circuit | Internal | None |
|  | External <br> DC <br> AC | Inverse diode, RC combination or VDR RC combination or VDR |
| Automatic rearming after short -circuit or overload |  | Yes, 10 ms min. depending on internal temperature |
| Switching capacity | Minimum | 10 mA at 5 Vdc |
|  | Maximum | 180 W / 1500 VA |
| Protection against reverse polarity |  | Yes |
| Isolation | Between channels and bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |
| Mechanical durability |  | Typically $2 \times 10^{7}$ cycles or more |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / \mathrm{O}$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

If your controller or module contains relay outputs, these types of outputs can support up to 240 Vac . Inductive damage to these types of outputs can result in welded contacts and loss of control. Each inductive load must include a protection device such as a peak limiter, RC circuit or flyback diode. Capacitive loads are not supported by these relays.

## A WARNING

## RELAY OUTPUTS WELDED CLOSED

- Always protect relay outputs from inductive alternating current load damage using an appropriate external protective circuit or device.
- Do not connect relay outputs to capacitive loads.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Electric Durability

The curves below provide the expected life of the relay contacts for the TM5SDO2R electronic module.

(2)

1 Switching procedures ( $\times 10^{4}$ )
2 Switching current in A

## TM5SDO2R Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for TM5SDO2R:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 External power supply 100... 240 Vac
4 Inductive load protection
5 2-wire load
6 External power supply 24 Vdc
7 External fuse type T slow-blow 5 A - 250 V

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)".
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 20

TM5SDO4R Electronic Module 4DO 30 Vdc/230 Vac $50 / 60 \mathrm{~Hz}$ 5 A Relay N/O

What Is in This Chapter?
This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDO4R Presentation | 182 |
| TM5SDO4R Characteristics | 184 |
| TM5SDO4R Wiring Diagram | 187 |

## TM5SDO4R Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDO4R electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of output channels | 4 |
| Output type | Relay |
| Rated input voltage | $30 \mathrm{Vdc} / 230 \mathrm{Vac}$ |
| Output current | 5 A max. |

## Ordering Information

The following illustration shows the TM5SDO4R:

The table below shows the model numbers for the terminal blocks and the bus bases associated with the TM5SDO4R:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM12 | Bus base | Black |
| 2 | TM5SDO4R | Electronic Module | Black |
| 3 | TM5ACTB32 | Terminal block, 12 pins | Black |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows LEDs for TM5SDO4R:

The table below shows the TM5SDO4R status LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| r | Green | Off | No power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no power supply |
|  |  | On | Error detected or reset state |
| e+r | Steady Red / <br> Single Green flash |  | Invalid firmware |
| 0-3 | Yellow | Off | Corresponding output deactivated |
|  |  | On | Corresponding output activated |

## TM5SDO4R Characteristics

## Introduction

This is the description characteristics for the TM5SDO4R electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDO4R electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | $30 \mathrm{Vdc} / 230 \mathrm{Vac}$ <br> Connected to an external AC or DC power |
| Power supply range | $24 \mathrm{Vdc} \ldots .36 \mathrm{Vdc}$ <br> $184 \mathrm{Vac} . .276 \mathrm{Vac}$ |
| 24 Vdc I/O segment current draw | 0 mA (N.C.) |
| TM5 bus 5 Vdc current draw | 160 mA |
| Power dissipation | 2.30 W max. |
| Weight | $30 \mathrm{~g} \mathrm{(1.1} \mathrm{oz)}$ |
| ID code for firmware update | 42756 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO4R electronic module:

| Output Characteristics |  |  |
| :---: | :---: | :---: |
| Output channels |  | 4 |
| Wiring type |  | 4 (C/O) contacts |
| Output current |  | 5 A max. per output at 30 Vdc 5 A max. per output at 230 Vac |
| Total output current |  | 10 A max. at 30 Vdc 10 A max. at 230 Vac |
| Output voltage |  | $30 \mathrm{Vdc} / 230 \mathrm{Vac}$ |
| Output voltage range |  | $24 \mathrm{Vdc} . .36 \mathrm{Vdc}$ <br> 184 Vac ... 276 Vac |
| Turn on time |  | 10 ms max . |
| Turn off time |  | 10 ms max . |
| Protective circuit | Internal | None |
|  | External <br> DC <br> AC | Inverse diode, RC combination or VDR RC combination or VDR |
| Automatic rearming after shortcircuit or overload |  | Yes, 10 ms min. depending on internal temperature |
| Switching capacity | Minimum | 10 mA at 5 Vdc |
|  | Maximum | 150 W / 1250 VA |
| Protection against reverse polarity |  | Yes |
| Isolation | Between channels and bus | See note ${ }^{1}$ |
|  | Between outputs | Not isolated |
| Mechanical durability |  | Typically $2 \times 10^{7}$ cycles or more |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / \mathrm{O}$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.
If your controller or module contains relay outputs, these types of outputs can support up to 240 Vac . Inductive damage to these types of outputs can result in welded contacts and loss of control. Each inductive load must include a protection device such as a peak limiter, RC circuit or flyback diode. Capacitive loads are not supported by these relays.

## A WARNING

## RELAY OUTPUTS WELDED CLOSED

- Always protect relay outputs from inductive alternating current load damage using an appropriate external protective circuit or device.
- Do not connect relay outputs to capacitive loads.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Electric Durability

The curves below provide the expected life of the relay contacts for the TM5SDO2R electronic module.

(2)

1 Switching procedures $\left(\times 10^{4}\right)$
2 Switching current in A

## TM5SDO4R Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for TM5SDO4R:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 External power supply 100... 240 Vac
4 Inductive load protection
5 2-wire load
6 External power supply 24 Vdc
7 External fuse type T slow-blow 5 A - 250 V

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)".
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 21

TM5SDO2S Electronic Module 2DO $240 \mathrm{Vac} 50 / 60 \mathrm{~Hz}$ Triac 1 A 3 Wires

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDO2S Presentation | 190 |
| TM5SDO2S Characteristics | 192 |
| TM5SDO2S Wiring Diagram | 194 |

## TM5SDO2S Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDO2S electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of output channels | 2 |
| Output type | Triac |
| Signal type | Source |
| Rated output voltage | $100 \ldots .240$ Vac |
| Output current | 1 A max. |

## Ordering Information

The following illustration shows the TM5SDO2S:

The table below shows the model numbers for the terminal block and the bus base associated with the TM5SDO2S:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM12 | Bus base | Black |
| 2 | TM5SDO2S | Electronic Module | Black |
| 3 | TM5ACTB32 | Terminal block, 12 pins | Black |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration shows LEDs for TM5SDO2S:

The table below shows the TM5SDO2S diagnostic LEDs:

| LEDs | Color | Status | Description |
| :---: | :---: | :---: | :---: |
| r | Green | Off | No external power supply |
|  |  | Single Flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no external power supply |
|  |  | On | Error detected or reset state |
|  |  | Single flash | Zero cross-over signal has dropped out. ${ }^{1}$ |
| e+r | Steady Red / Single Green flash |  | Invalid firmware |
| 0-1 | Yellow | Off | Corresponding output deactivated |
|  |  | On | Corresponding output activated |

${ }^{1}$ Zero cross-over detection is activated at the first zero crossover after being switched on .

## TM5SDO2S Characteristics

## Introduction

This is the description characteristics for TM5SDO2S electronic module.
See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDO2S electronic module:

| Electrical Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | $100 \ldots 240 \mathrm{Vac}$ <br> Connected to the external AC power |
| Power supply range | $80 \ldots 264 \mathrm{Vac}$ |
| 24 Vdc I/O segment current draw | - |
| TM5 bus 5 Vdc current draw | 70 mA |
| Power dissipation | $2.13 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 9851 dec |

## Output Characteristics

The table below describes the output characteristics of the TM5SDO2S electronic module:

| Output Characteristics |  |  |
| :---: | :---: | :---: |
| Output channels |  | 2 |
| Wiring type |  | 2 or 3 wires |
| Output current |  | 1 A max. per output |
| Total output current |  | 1 A max. |
| Output voltage |  | 100...240 Vac |
| Output voltage range |  | 80... 264 Vac |
| De-rating | $\begin{aligned} & -10 \ldots . .55^{\circ} \mathrm{C} \\ & \left(14 \ldots . .131^{\circ} \mathrm{F}\right) \end{aligned}$ | $\mathrm{I}=1$ A max. by channel |
|  | $\begin{aligned} & 55 \ldots 60^{\circ} \mathrm{C} \\ & \left(131 \ldots 140^{\circ} \mathrm{F}\right) \end{aligned}$ | $\mathrm{I}=0.3$ A max. by channel |
| Voltage drop |  | $1.5 \mathrm{~V}_{\text {RMS }}$ |
| Leakage current |  | 10 mA max. at $240 \mathrm{~V}_{\mathrm{RMS}}$ |
| Turn on time |  | 11 ms max. at 50 Hz and 9.3 ms max. at 60 Hz |
| Turn off time |  | 11 ms max. at 50 Hz and 9.3 ms max. at 60 Hz |
| Zero cross-over switches |  | Yes |
| Over voltage protection between L and N |  | Yes |
| Surge current |  | 40 A for 20 ms max . and 10 A for 1 s max . |
| Automatic rearming after short circuit or overload |  | Yes, $10 \mathrm{~ms} \mathrm{min}$. |
| Isolation | Between output and internal bus | 2500 Vac after 1 minute |
|  | Between channels | Not isolated |

## Actuator Supply

The table below describes the actuator supply of the TM5SDO2S electronic module:

| Supply |  |
| :--- | :--- |
| Voltage | External power supply. |
| Voltage drop for internal protection at <br> 500 mA | $1.5 \mathrm{~V}_{\text {RMS max. }}$ |

## TM5SDO2S Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for TM5SDO2S:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 External power supply 100... 240 Vac
4 External fuse type T slow-blow 3.15 A - 250 V
5 Inductive load protection
6 2-wire load
7 3-wire load

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

Refer to Protecting Outputs from Inductive Load Damage (see Modicon, TM5 Communication Modules, Hardware Guide) for additional important information on this topic.

## Part IV

## TM5 System Digital Mixed Input/Output

## What Is in This Part?

This part contains the following chapters:

| Chapter | Chapter Name | Page |
| :--- | :--- | :---: |
| 22 | TM5SDM8DTS Electronic Module 4DI/4DO 24 Vdc Tr 0.1 A 1 Wire | 199 |

| 24 | TM5SMM6D2L Electronic Module 4DI/2DO 24Vdc Tr 0.5A / 1AI/1AO $\pm 10 \mathrm{~V} / 0-$ <br> 20mA 12 Bits | 221 |

## Chapter 22 <br> TM5SDM8DTS Electronic Module 4DI/4DO 24 Vdc Tr 0.1 A 1 Wire

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDM8DTS Presentation | 200 |
| TM5SDM8DTS Characteristics | 203 |
| TM5SDM8DTS Wiring Diagram | 207 |

## TM5SDM8DTS Presentation

## Overview

The TM5SDM8DTS electronic module has been designed for use with PacDrive 3 systems supporting TM5 Sercos III bus interface TM5NS31. You can configure the modules to support oversampled input and outputs or time stamped inputs and oversampled outputs. For more information, refer to the document TM5SDM8DTS Parameter Description.
The time stamped inputs of the TM5SDM8DTS electronic module are used by PacDrive 3 in support of the touchprobe functionality. Throughout the documentation, the time stamped inputs of this module are often referred to as touchprobe inputs.
Given that the TM5SDM8DTS electronic module has been designed and optimized exclusively for use with PacDrive 3 applications, certain product characteristics for this module differ from those of other TM5 modules. For example, like the PacDrive 3 devices, the TM5SDM8DTS electronic module is certified for use in non-hazardous locations only.

## 4 DANGER

## POTENTIAL FOR EXPLOSION

Install and use the mixed module TM5SDM8DTS in non-hazardous locations only.
Failure to follow these instructions will result in death or serious injury.
There may be other specific differences between this and other TM5 modules characteristics that may be important to your application. For more information, see TM5SDM8DTS Characteristics (see page 203).

## Main Characteristics

The table below describes the main characteristics of the TM5SDM8DTS electronic module:

| Main characteristics |  |
| :--- | :--- |
| Number of digital input channels <br> (configurable as time stamped input or <br> oversampled input) | 4 |
| Input type | Refer to the Input Characteristics table (see page 204). |
| Input signal type | Sink |
| Number of digital output channels <br> (configurable as oversampled output) | 4 |
| Output type | Transistor |
| Output signal type | Source |
| Output current | 0.1 A per output |
| Rated input voltage | 24 Vdc |

NOTE: Use the TM5SDM8DTS electronic module only with PacDrive 3 and TM5 Sercos III bus interface TM5NS31.

## Ordering Information

The illustration below shows the TM5SDM8DTS:

The table below shows the references for the terminal block and the bus bases associated with the TM5SDM8DTS:

| Number | Reference | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SDM8DTS | Bus base with address setting | White |
| 3 | TM5ACTB12 | Terminal block, 12 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration describes the LEDs for TM5SDM8DTS:

The table below shows the TM5SDM8DTS input status LEDs:

| LED | Color | Status | Description |
| :--- | :--- | :--- | :--- |
| r | Green | Off | No power supply |
|  |  | Single flash | Reset state |
|  | Flashing | Preoperational state |  |
|  | Red | On | Off |
|  |  | On | OK or nal operation power supply |
|  | Double flash | Error detected or reset state | One of the following errors has been detected: <br> e Oversampled output control error <br> - Oversampled output copy error <br> - Edge detect poll cycle violation <br> - Error on edge generator unit $1 . .4$ |
| $1-8$ | Green |  | Status of the corresponding digital signal |

## TM5SDM8DTS Characteristics

## Introduction

This is the description characteristics for the TM5SDM8DTS electronic module. See also Environmental Characteristics (see page 27).
NOTE: In contrast to the description in Environmental Characteristics (see page 27), the TM5SDM8DTS electronic module has been designed to meet UL and CSA standards, and has been certified as cULus. In addition, the module has been designed for non-hazardous locations.

## 4 DANGER

## POTENTIAL FOR EXPLOSION

Install and use the mixed module TM5SDM8DTS in non-hazardous locations only. Failure to follow these instructions will result in death or serious injury.

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).
Failure to follow these instructions will result in death or serious injury.

| WNRNING |
| :--- |
| UNINTENDED EQUIPMENT OPERATION |
| Do not exceed any of the rated values specified in the environmental and electrical characteristics |
| tables. |
| Failure to follow these instructions can result in death, serious injury, or equipment damage. |

## General Characteristics

The table below describes the general characteristics of the TM5SDM8DTS electronic module:

| General characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 62.5 mA |
| TM5 bus 5 Vdc current draw | 2 mA |
| Power dissipation | 1.51 W maximum |
| Weight | $22 \mathrm{~g} \mathrm{(0.8} \mathrm{oz)}$ |
| ID code for firmware update | 43323 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDM8DTS electronic module:

| Input characteristics |  |  |
| :---: | :---: | :---: |
| Number of input channels |  | 4 inputs |
| Wiring type |  | 1 wire |
| Rated input voltage |  | 24 Vdc |
| Input voltage range |  | 20.4...28.8 Vdc |
| Rated input current at 24 Vdc |  | 1.3 mA |
| Input impedance |  | $18.4 \mathrm{k} \Omega$ |
| OFF state |  | $<5 \mathrm{Vdc}$ |
| ON state |  | > 15 Vdc |
| Input circuit |  | Sink |
| Input frequency |  | 40 kHz |
| Additional functions |  | - $4 x$ time stamping units with time stamp function <br> - $4 x$ input oversampling |
| Input filter | Hardware | $\geq 2 \mu \mathrm{~s}$ |
|  | Software | - |
| Isolation | Between channels and bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / O$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Output Characteristics

The table describes the output characteristics of the TM5SDM8DTS electronic module:

| Output characteristics |  |
| :---: | :---: |
| Output channels | 4 outputs |
| Wiring type | 1 wire |
| Output current | 0.1 A maximum per output |
| Total output current | 0.4 A |
| Output voltage | 24 Vdc |
| Output voltage range | 20.4..28.8 Vdc |
| Output circuit | Sink and/or source |
| Output protection | - Thermal cutoff for overcurrent and short-circuit <br> - Integrated protection for switching inductances |
| Additional functions | - $4 x$ edge generation with $\mu \mathrm{s}$ precision <br> - $4 x$ output oversampling |
| Voltage drop | <0.9 V at 0.1 A rated current |
| Leakage current when switched off | max. $25 \mu \mathrm{~A}$ |
| Turn on time | $<2 \mu$ s |
| Turn off time | $<2 \mu$ s |
| Automatic rearming after short-circuit or overload | Yes, 10 ms min . depending on internal temperature |

## Time Stamping

The table describes the time stamping units characteristics of the TM5SDM8DTS electronic module:

| Characteristics |  |
| :--- | :--- |
| Number of time stamping units | 4 |
| Input frequency (maximum) | 40 kHz |
| Resolution | $1 \mu \mathrm{~s}$ time stamp function |
| Signal form | Square wave pulse |
| Sensor supply | Module-internal, maximum 600 mA |

## Oversampling

The table describes the oversampling characteristics of the TM5SDM8DTS electronic module:

| Characteristics |  |
| :--- | :--- |
| Number of oversampling units | 4 |
| Sample time | $125 \mu \mathrm{~s}, 250 \mu \mathrm{~s}, 500 \mu \mathrm{~s}$ depending on Sercos cycle time |

## Switching Inductive Loads

The curves below provide the switching inductive load characteristics for the TM5SDM8DTS electronic module.

(3)

1 Load resistance in $\Omega$
2 Load inductance
3 Maximum operating cycles / second (with $90 \%$ duty cycle)

## TM5SDM8DTS Wiring Diagram

## Wiring Diagram

The following illustration presents the wiring diagram for the TM5SDM8DTS:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 2-wire sensor
4 2-wire load
5 Inductive load protection
624 Vdc for sensor supply
NOTE: I/O electronic modules and the field devices connected to them must all reside on the same 24 Vdc I/O power segment. If not, the status LEDs may not function correctly. In addition, there may potentially be more significant consequences such as an explosion and/or fire hazard.

## A WARNING

POTENTIAL EXPLOSION OR FIRE
Connect the returns from the devices to the same power source as the $24 \mathrm{Vdc} / / \mathrm{O}$ power segment serving the module.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Use the sensor and actuator power supply only for supplying power to sensors or actuators connected to the module.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 23

TM5SDM12DT Electronic Module 8DI/4DO $24 \mathrm{Vdc} \operatorname{Tr} 0.5 \mathrm{~A}$ 1 Wire

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SDM12DT Presentation | 210 |
| TM5SDM12DT Characteristics | 213 |
| TM5SDM12DT Wiring Diagram | 217 |

## TM5SDM12DT Presentation

## Main Characteristics

The table below describes the main characteristics of the TM5SDM12DT electronic module:

| Main Characteristics |  |
| :--- | :--- |
| Number of input channels | 8 |
| Input type | Type 1 |
| Input signal type | Sink |
| Number of output channels | 4 |
| Output type | Transistor |
| Output signal type | Source |
| Output current | $0.5 \mathrm{~A} \mathrm{max}$. |
| Rated input voltage | 24 Vdc |

## Ordering Information

The illustration below shows the TM5SDM12DT:

The table below shows the model numbers for the terminal block and the bus bases associated with the TM5SDM12DT:

| Number | Model Number | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SDM12DT | Electronic Module | White |
| 3 | TM5ACTB12 | Terminal block, 12 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration describes the LEDs for TM5SDM12DT:

The table below shows the TM5SDM12DT input status LEDs:

| LED | Color | Status | Description |
| :--- | :--- | :--- | :--- |
|  | Green | Off | No power supply |
|  |  | Single flash | Reset state |
|  |  | Flashing | Preoperational state |
|  |  | On | Normal operation |
| e | Red | Off | OK or no power supply |
|  |  | Single flash | Error detected on output channels ${ }^{1}$ |
| e+r | Steady red $/$ Single green flash | Invalid firmware |  |

| LED | Color | Status | Description |
| :--- | :--- | :--- | :--- |
| $0-7$ | Green | Off | Corresponding input deactivated |
|  |  | On | Corresponding input activated |
| $0-3$ | Yellow | Off | Corresponding output deactivated |
|  |  | On | Corresponding output activated |

## NOTE:

The e LED flashes when detecting one of the following errors on output channels:

- Short-circuit
- Overload
- No 24 Vdc Power Segment supply and an output is at logic 1

## TM5SDM12DT Characteristics

## Introduction

This is the description characteristics for the TM5SDM12DT electronic module. See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).

Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SDM12DT electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O power segment |
| Power supply range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 21 mA (all inputs On) |
| TM5 Bus 5 Vdc current draw | 42 mA |
| Power dissipation | 1.52 W max. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 8377 dec |

## Input Characteristics

The table describes the input characteristics of the TM5SDM12DT electronic module:

| Input Characteristics |  |  |
| :---: | :---: | :---: |
| Number of input channels |  | 8 |
| Wiring type |  | 1 wire |
| Rated input voltage |  | 24 Vdc |
| Input voltage range |  | 20.4...28.8 Vdc |
| De-rating | $55 . .60^{\circ} \mathrm{C}\left(131 . .140^{\circ} \mathrm{F}\right)$ | $\mathrm{I}=0.3$ A max. by channel |
| Rated input current at 24 Vdc |  | 3.75 mA |
| Input impedance |  | $6.4 \mathrm{k} \Omega$ |
| OFF state |  | 5 Vdc max. |
| ON state |  | 15 Vdc min. |
| Input filter | Hardware | $\leq 100 \mu \mathrm{~s}$ |
|  | Software | Default 1 ms , can be configured between 0 and 25 ms in 0.2 ms intervals. |
| Isolation | Between channels and bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / \mathrm{O}$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Output Characteristics

The table describes the output characteristics of the TM5SDM12DT electronic module:

| Output Characteristics | 4 |
| :--- | :--- |
| Output channels | 1 wire |
| Wiring type | 0.5 A max. per output |
| Output current | 2 A max. |
| Total output current | 24 Vdc |
| Output voltage | $20.4 \ldots . .28 .8 \mathrm{Vdc}$ |
| Output voltage range | 0.3 A max. by channel |
| De-rating |  |

| Output Characteristics |  |  |
| :---: | :---: | :---: |
| Voltage drop |  | 0.3 Vdc max. at 0.5 A rated current |
| Leakage current when switched off |  | $5 \mu \mathrm{~A}$ |
| Turn on time |  | $300 \mu \mathrm{~s}$ max. |
| Turn off time |  | 300 s max. |
| Output protection |  | Against short-circuit and overload, thermal protection |
| Short-circuit output peak current |  | 12 A max. |
| Automatic rearming after shortcircuit or overload |  | Yes, $10 \mathrm{~ms} \mathrm{min}$. |
| Protection against reverse polarity |  | Yes |
| Clamping voltage |  | Typ. 50 Vdc |
| Switching frequency | Resistive load | 500 Hz max. |
|  | Inductive load | See the switching inductive load characteristics (see page 216). |
| Isolation | Between input and internal bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Switching Inductive Loads

The curves below provide the switching inductive load characteristics for the TM5SDM12DT electronic module.

1 Load resistance in $\Omega$
2 Load inductance
3 Max. operating cycles / second

## TM5SDM12DT Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for the TM5SDM12DT:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 2-wire sensor
424 Vdc I/O power segment by external connection
5 Inductive load protection
6 2-wire load
70 Vdc I/O power segment by external connection
NOTE: I/O electronic modules and the field devices connected to them must all reside on the same 24 Vdc I/O power segment. If not, the status LEDs may not function correctly. In addition, there may potentially be more significant consequences such as an explosion and/or fire hazard.

## A WARNING

## POTENTIAL EXPLOSION OR FIRE

Connect the returns from the devices to the same power source as the $24 \mathrm{Vdc} / / \mathrm{O}$ power segment serving the module.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

The 8-input / 4-output TM5SDM12DT electronic module can independently support 1-wire devices. To connect 2-wire devices, you can add TM5SPDD12F and TM5SPDG12F Common Distribution modules.

The following illustration shows the wiring diagram for the TM5SPDD12F, TM5SPDG12F and the TM5SDM12DT:

1 Internal electronics
224 Vdc I/O power segment integrated into the bus bases
3 2-wire load
4 Inductive load protection
5 Integrated fuse type T slow-blow 6.3 A 250 V exchangeable
6 2-wire sensor

## A WARNING

UNINTENDED EQUIPMENT OPERATION
Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Chapter 24

## TM5SMM6D2L Electronic Module 4DI/2DO 24Vdc Tr 0.5A / $1 \mathrm{Al} / 1 \mathrm{AO} \pm 10 \mathrm{~V} / 0-20 \mathrm{~mA} 12$ Bits

## What Is in This Chapter?

This chapter contains the following topics:

| Topic | Page |
| :--- | :---: |
| TM5SMM6D2L Presentation | 222 |
| TM5SMM6D2L Characteristics | 225 |
| TM5SMM6D2L Wiring Diagram | 230 |

## TM5SMM6D2L Presentation

## Main Characteristics

The tables describe the main characteristics of the TM5SMM6D2L electronic module:

| Main Characteristics of Digital Input / Output Channels |  |
| :--- | :--- |
| Number of digital input <br> channels | 4 |
| Number of digital output <br> channels | 2 |
| Input type | Type 1 |
| Input signal type | Sink |
| Rated input voltage | 24 Vdc |
| Output type | Transistor |
| Output signal type | Source |
| Output current | 0.5 A max. |

| Main Characteristics of Analog Input / Output Channels |  |  |
| :--- | :--- | :--- |
| Number of analog input <br> channels | 1 |  |
| Number of analog <br> output channels | 1 |  |
| Signal type | Voltage | Current |
| Input range | $-10 \ldots+10 \mathrm{Vdc}$ | $0 \ldots 20 \mathrm{~mA} / 4 \ldots 20 \mathrm{~mA}$ |
| Output range | $-10 \ldots+10 \mathrm{Vdc}$ | $0 \ldots 20 \mathrm{~mA}$ |
| Resolution | 12 bits + sign | 12 bits |

## Ordering Information

The illustration shows the TM5SMM6D2L:

The table shows the model numbers for the terminal block and the bus bases associated with the TM5SMM6D2L:

| Number | Reference | Description | Color |
| :--- | :--- | :--- | :--- |
| 1 | TM5ACBM11 <br> or <br> TM5ACBM15 | Bus base | White |
| 2 | TM5SMM6D2L | Electronic module | White |
| 3 | TM5ACTB12 | Terminal block, 12 pins | White |

NOTE: For more information, refer to TM5 bus bases and terminal blocks (see Modicon TM5 / TM7 Flexible System, System Planning and Installation Guide).

## Status LEDs

The following illustration describes the LEDs for TM5SMM6D2L:

The table shows the TM5SMM6D2L input status LEDs:

| Position in Illustration | LED | Color | Status | Description |
| :---: | :---: | :---: | :---: | :---: |
| - | r | Green | Off | No power supply |
|  |  |  | Single flash | Reset state |
|  |  |  | Flashing | Preoperational state |
|  |  |  | On | Normal operation |
| - | e | Red | Off | OK or no power supply |
|  |  |  | Single flash | Error detected on output channels |
| - | e+r | Steady red / Single green flash |  | Invalid firmware |
| A | 0-3 | Green | Off | Corresponding digital input deactivated |
|  |  |  | On | Corresponding digital input activated |
| B | 0-1 | Orange | Off | Corresponding digital output deactivated |
|  |  |  | On | Corresponding digital output activated |
| C | A0 | Orange | Off | The value $=0$. |
|  |  |  | On | The value $=0$. |
| D | A0 | Green | Off | The connection is open or the sensor is disconnected. |
|  |  |  | Flashing | Overflow or underflow of the input signal |
|  |  |  | On | The analog / digital converter is running, the value is OK. |

## TM5SMM6D2L Characteristics

## Introduction

This is the description characteristics for the TM5SMM6D2L electronic module. See also Environmental Characteristics (see page 27).

## 4 DANGER

## FIRE HAZARD

- Use only the correct wire sizes for the current capacity of the I/O channels and power supplies.
- For relay output (2 A) wiring, use conductors of at least $0.5 \mathrm{~mm}^{2}$ (AWG 20) with a temperature rating of at least $80^{\circ} \mathrm{C}\left(176{ }^{\circ} \mathrm{F}\right)$.
- For common conductors of relay output wiring (7 A), or relay output wiring greater than 2 A , use conductors of at least $1.0 \mathrm{~mm}^{2}$ (AWG 16) with a temperature rating of at least $80^{\circ} \mathrm{C}$ ( $176{ }^{\circ} \mathrm{F}$ ).

Failure to follow these instructions will result in death or serious injury.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not exceed any of the rated values specified in the environmental and electrical characteristics tables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.

## General Characteristics

The table below describes the general characteristics of the TM5SMM6D2L electronic module:

| General Characteristics |  |
| :--- | :--- |
| Rated power supply voltage <br> Power supply source | 24 Vdc <br> Connected to the 24 Vdc I/O <br> power segment |
| Power supply range | $20.4 \ldots 28.8 \mathrm{Vdc}$ |
| 24 Vdc I/O segment current draw | 73 mA (all digital inputs and <br> outputs On) |
| TM5 Bus 5 Vdc current draw | 2 mA |
| Power dissipation | $1.75 \mathrm{~W} \mathrm{max}$. |
| Weight | $25 \mathrm{~g} \mathrm{(0.9} \mathrm{oz)}$ |
| ID code for firmware update | 9411 dec |

## Input Characteristics of Digital Channels

The table describes the input characteristics of digital channels of the TM5SMM6D2L electronic module:

| Input Characteristics |  |  |
| :---: | :---: | :---: |
| Number of input channels |  | 4 |
| Wiring type |  | 1 wire |
| Rated input voltage |  | 24 Vdc |
| Input voltage range |  | 20.4...28.8 Vdc |
| De-rating | $\begin{aligned} & \text { Temperature: } 55 \ldots . .60^{\circ} \mathrm{C} \\ & \left(131 \ldots 140^{\circ} \mathrm{F}\right) \\ & \hline \end{aligned}$ | up to 3 inputs simultaneously activated |
| Rated input current at 24 Vdc |  | 3.3 mA |
| Input impedance |  | $7.18 \mathrm{k} \Omega$ |
| OFF state |  | 5 Vdc max. |
| ON state |  | 15 Vdc min. |
| Input filter | Hardware | $\leq 2 \mu \mathrm{~s}$ |
|  | Software | Default: 1 ms Can be configured between 0 and 25 ms in 0.2 ms intervals. |
| Isolation | Between input and internal bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Input Characteristics of Analog Channels

The table describes the input characteristics of analog channels of the TM5SMM6D2L electronic module:

| Input Characteristics | Voltage Input | Current Input |
| :--- | :--- | :--- |
| Input range | $-10 \ldots+10 \mathrm{Vdc}$ | $0 \ldots .20 \mathrm{~mA} / 4 \ldots 20 \mathrm{~mA}$ |
| Input impedance | $1 \mathrm{M} \Omega \mathrm{min}$. | - |
| Load impedance | - | $300 \Omega \mathrm{max}$. |
| Sample duration time | $400 \mu \mathrm{~s}$ |  |

| Input Characteristics | Voltage Input | Current Input |
| :--- | :--- | :--- |
| Input type | Single ended |  |
| Conversion mode | Successive Approximative Register |  |
| Input filter | Low pass third order / cut-off frequency 1 kHz |  |
| Input tolerance - maximum deviation at <br> ambient $25^{\circ} \mathrm{C}\left(77^{\circ} \mathrm{F}\right)$ | $<0.08 \%$ of the measurement | $<0.08 \%$ of the measurement |
| Input tolerance - temperature drift | $0.006 \% /{ }^{\circ} \mathrm{C}$ of the measurement | $0.009 \% /{ }^{\circ} \mathrm{C}$ of the measurement |
| Input tolerance - non linearity | $0.02 \%$ | $0.02 \%$ |
| Digital resolution | 12 bits + sign | 12 bits |
| Resolution value | 2.441 mV | $4.883 \mu \mathrm{~A}$ |
| Common mode rejection | DC | 70 dB min. |
|  | 50 Hz | 70 dB min. |

## Output Characteristics of Digital Channels

The table describes the output characteristics of digital channels of the TM5SMM6D2L electronic module:

## Output Characteristics

| Switching frequency | Resistive load | 100 Hz |
| :--- | :--- | :--- |
|  | Inductive load | See the switching inductive load <br> characteristics (see page 229). |
| Isolation | Between input and internal bus | See note ${ }^{1}$ |
|  | Between channels | Not isolated |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the 24 Vdc I/O power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Output Characteristics of Analog Channels

The table describes the output characteristics of analog channels of the TM5SMM6D2L electronic module:

| Output Characteristics | Voltage Output | Current Output |
| :---: | :---: | :---: |
| Output range | -10... 10 Vdc | 0... 20 mA |
| Output impedance | $\begin{aligned} & 1 \mathrm{k} \Omega \min .\left(0 \ldots 55^{\circ} \mathrm{C}\left(32 \ldots . .131^{\circ} \mathrm{F}\right)\right) \text {, } \\ & 10 \mathrm{k} \Omega \min .\left(55 \ldots . .60^{\circ} \mathrm{C}\right. \\ & \left.\left(131 \ldots 140^{\circ} \mathrm{F}\right)\right) \end{aligned}$ | - |
| Load impedance | - | $\begin{aligned} & 400 \Omega \max .\left(0 \ldots 55^{\circ} \mathrm{C}\right. \\ & \left.\left(32 \ldots . .131^{\circ} \mathrm{F}\right)\right),>300 \Omega \max . \\ & \left(55 . . .60^{\circ} \mathrm{C}\left(131 \ldots 140^{\circ} \mathrm{F}\right)\right) \end{aligned}$ |
| Conversion time | $300 \mu \mathrm{~s}$ |  |
| Response time for output change | 1 ms max . |  |
| Output tolerance - maximum deviation at ambient $25^{\circ} \mathrm{C}\left(77^{\circ} \mathrm{F}\right)$ | < $0.15 \%$ of the measurement |  |
| Output tolerance - temperature drift | 0.02\% / ${ }^{\circ} \mathrm{C}$ of the measurement |  |
| Output tolerance - non linearity | $<0.1 \%$ of the measurement |  |
| Output tolerance - maximum deviation caused by load change | $0.02 \%$ from $10 \mathrm{M} \Omega$ to $1 \mathrm{k} \Omega$, resistive | 0.5\% from $1 \Omega$ to $500 \Omega$, resistive |
| Digital resolution | 12 bits + sign | 12 bits |
| Resolution value | 2.441 mV | $4.882 \mu \mathrm{~A}$ |
| Noise resistance - cable | Shielded cable is necessary |  |
| Isolation between channels | Not isolated |  |

| Output Characteristics | Voltage Output | Current Output |
| :--- | :--- | :--- |
| Isolation between channels and bus | See note $^{1}$ |  |
| Output protection | Short-circuit protection: current limitation is $50 \mathrm{~mA}^{\text {P }}$ |  |

${ }^{1}$ The isolation of the electronic module is 500 Vac RMS between the electronics powered by the TM5 bus and those powered by 24 Vdc I/O power segment connected to the module. In practice, the TM5 electronic module is installed in the bus base, and there is a bridge between the TM5 power bus and the $24 \mathrm{Vdc} / / O$ power segment. The two power circuits reference the same functional ground (FE) through specific components designed to reduce effects of electromagnetic interference. These components are rated at 30 Vdc or 60 Vdc . This effectively reduces isolation of the entire system from the 500 Vac RMS.

## Switching Inductive Loads

The curves provide the switching inductive load characteristics for the TM5SMM6D2L electronic module.

1 Load resistance in $\Omega$
2 Load inductance
3 Max. operating cycles / second

## TM5SMM6D2L Wiring Diagram

## Wiring Diagram

The following illustration shows the wiring diagram for TM5SMM6D2L:

1 internal electronics
2 2-wire sensor
3 inductive load protection
4 2-wire load
$50 \mathrm{Vdc} \mathrm{I} / \mathrm{O}$ power segment by external connection
624 Vdc I/O power segment by external connection
724 Vdc I/O power segment integrated into the bus bases
I current
U voltage

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

Do not connect wires to unused terminals and/or terminals indicated as "No Connection (N.C.)". Failure to follow these instructions can result in death, serious injury, or equipment damage.

## Specific Information for Digital Inputs

NOTE: I/O electronic modules and the field devices connected to them must all reside on the same 24 Vdc I/O power segment. If not, the status LEDs may not function correctly. In addition, there may potentially be more significant consequences such as an explosion and/or fire hazard.

## A WARNING

## POTENTIAL EXPLOSION OR FIRE

Connect the returns from the devices to the same power source as the $24 \mathrm{Vdc} / / \mathrm{O}$ power segment serving the module.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

The 4-digital input TM5SMM6D2L electronic module can independently support 1-wire devices. To connect 2-wire devices, you can add a TM5SPDD12F Common Distribution module.

## Specific Information for Analog Inputs

Use shielded, properly grounded cables for all analog and high-speed inputs or outputs and communication connections. If you do not use shielded cable for these connections, electromagnetic interference can cause signal degradation. Degraded signals can cause the controller or attached modules and equipment to perform in an unintended manner.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

- Use shielded cables for all fast I/O, analog I/O and communication signals.
- Ground cable shields for all analog I/O, fast I/O and communication signals at a single point ${ }^{1}$.
- Route communication and I/O cables separately from power cables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.
${ }^{1}$ Multipoint grounding is permissible if connections are made to an equipotential ground plane dimensioned to help avoid cable shield damage in the event of power system short-circuit currents.
NOT/CE
INOPERABLE EQUIPMENT
Verify that the physical wiring of the analog circuit is compatible with the software configuration
for the analog channel.

Failure to follow these instructions can result in equipment damage.

## Specific Information for Digital Outputs

NOTE: I/O electronic modules and the field devices connected to them must all reside on the same 24 Vdc I/O power segment. If not, the status LEDs may not function correctly. In addition, there may potentially be more significant consequences such as an explosion and/or fire hazard.

## A WARNING

POTENTIAL EXPLOSION OR FIRE
Connect the returns from the devices to the same power source as the 24 Vdc I/O power segment serving the module.
Failure to follow these instructions can result in death, serious injury, or equipment damage.

The 2-digital output TM5SMM6D2L electronic module can independently support 1-wire devices.
To connect 2 -wire devices, you can add a TM5SPDG12F Common Distribution module.

## Specific Information for Analog Output

Use shielded, properly grounded cables for all analog and high-speed inputs or outputs and communication connections. If you do not use shielded cable for these connections, electromagnetic interference can cause signal degradation. Degraded signals can cause the controller or attached modules and equipment to perform in an unintended manner.

## A WARNING

## UNINTENDED EQUIPMENT OPERATION

- Use shielded cables for all fast I/O, analog I/O and communication signals.
- Ground cable shields for all analog I/O, fast I/O and communication signals at a single point ${ }^{1}$.
- Route communication and I/O cables separately from power cables.

Failure to follow these instructions can result in death, serious injury, or equipment damage.
${ }^{1}$ Multipoint grounding is permissible if connections are made to an equipotential ground plane dimensioned to help avoid cable shield damage in the event of power system short-circuit currents.

## NOTICE

## INOPERABLE EQUIPMENT

Verify that the physical wiring of the analog circuit is compatible with the software configuration for the analog channel.
Failure to follow these instructions can result in equipment damage.
!
\%
According to the IEC standard, \% is a prefix that identifies internal memory addresses in the logic controller to store the value of program variables, constants, $\mathrm{I} / \mathrm{O}$, and so on.

## A

analog input
Converts received voltage or current levels into numerical values. You can store and process these values within the logic controller.

## analog output

Converts numerical values within the logic controller and sends out proportional voltage or current levels.

## B

## bus base

A mounting device that is designed to seat an electronic module on a DIN rail and connect it to the TM5 bus for M258 and LMC058 logic controllers. Each base bus extends the integrated TM5 data and electronic power buses as well as the 24 Vdc I/O power segment. The electronic modules are added to the TM5 system through their insertion on the base bus.

## C

CAN
(controller area network) A protocol (ISO 11898) for serial bus networks, designed for the interconnection of smart devices (from multiple manufacturers) in smart systems and for real-time industrial applications. Originally developed for use in automobiles, CAN is now used in a variety of industrial automation control environments.

## CANopen

An open industry-standard communication protocol and device profile specification (EN 50325-4).

## control network

A network containing logic controllers, SCADA systems, PCs, HMI, switches, ...
Two kinds of topologies are supported:

- flat: all modules and devices in this network belong to same subnet.
- 2 levels: the network is split into an operation network and an inter-controller network.

These two networks can be physically independent, but are generally linked by a routing device.

## controller

Automates industrial processes (also known as programmable logic controller or programmable controller).
(Canadian standards association) The Canadian standard for industrial electronic equipment in hazardous environments.

## D

DIN
(Deutsches Institut für Normung) A German institution that sets engineering and dimensional standards.

## E

electronic module
In a programmable controller system, most electronic modules directly interface to the sensors, actuators, and external devices of the machine/process. This electronic module is the component that mounts in a bus base and provides electrical connections between the controller and the field devices. Electronic modules are offered in a variety of signal levels and capacities. (Some electronic modules are not I/O interfaces, including power distribution modules and transmitter/receiver modules.)

## element

The short name of the ARRAY element.

## EN

EN identifies one of many European standards maintained by CEN (European Committee for Standardization), CENELEC (European Committee for Electrotechnical Standardization), or ETSI (European Telecommunications Standards Institute).

## encoder

A device for length or angular measurement (linear or rotary encoders).
equipment
A part of a machine including sub-assemblies such as conveyors, turntables, and so on.
Ethernet
A physical and data link layer technology for LANs, also known as IEEE 802.3.

## F

## FAST I/O

FAST input/outputSpecific I/O modules with some electrical features (for example, response time) while the treatment of these channels are done directly by the controller

## firmware

Represents the BIOS, data parameters, and programming instructions that constitute the operating system on a controller. The firmware is stored in non-volatile memory within the controller.

## function

A programming unit that has 1 input and returns 1 immediate result. However, unlike FBs, it is directly called with its name (as opposed to through an instance), has no persistent state from one call to the next and can be used as an operand in other programming expressions.
Examples: boolean (AND) operators, calculations, conversions (BYTE_TO_INT)

## H

hot swapping
The replacement of a component with a like component while the system remains under power and operational. The replacement component begins to function automatically after it is installed.

I
I/O
(input/output)
ID
(identifierlidentification)

## IEC

(international electrotechnical commission) A non-profit and non-governmental international standards organization that prepares and publishes international standards for electrical, electronic, and related technologies.

## input filter

A special function that helps reject extraneous signals on input lines due to such things as contact bounce and inducted electrical transients. Inputs provide a level of input filtering using the hardware. Additional filtering with software is also configurable through the programing or the configuration software.

IP 20
(ingress protection) The protection classification according to IEC 60529 offered by an enclosure, shown by the letter IP and 2 digits. The first digit indicates 2 factors: helping protect persons and for equipment. The second digit indicates helping protect against water. IP 20 devices help protect against electric contact of objects larger than 12.5 mm , but not against water.

L

## LED

(light emitting diode) An indicator that illuminates under a low-level electrical charge.
M
machine
Consists of several functions and/or equipment.
ms
(millisecond)

## N

network
A system of interconnected devices that share a common data path and protocol for communications.

## P

PCl
(peripheral component interconnect) An industry-standard bus for attaching peripherals.
PDM
(power distribution module) A module that distributes either AC or DC field power to a cluster of I/O modules.

## R

RPDO
(receive process data object An unconfirmed broadcast message or sent from a producer device to a consumer device in a CAN-based network. The transmit PDO from the producer device has a specific identifier that corresponds to the receive PDO of the consumer devices.

## T

## terminal block

(terminal block) The component that mounts in an electronic module and provides electrical connections between the controller and the field devices.

TPDO
(transmit process data object) An unconfirmed broadcast message or sent from a producer device to a consumer device in a CAN-based network. The transmit PDO from the producer device has a specific identifier that corresponds to the receive PDO of the consumer devices.

U

UL
(underwriters laboratories) A US organization for product testing and safety certification.
