ÖLFLEX® CHAIN 819 CP

Application

ÖLFLEX® CHAIN 819 CP cables are high flexible control cables for power chains for the European, Northern American and Canadian market, for flexible use and fixed installation under light to medium mechanical load conditions.

ÖLFLEX® CHAIN 819 CP cables are increased resistant to oils and at room temperature largely resistant to acids and alkalis.

They are especially suitable for basic requirements (Basic Line) in power chains and in permanently moved machine parts.

They are suitable for linear, automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted.

The screening braid protects against interference from electrical fields.

Application range: power chains or moving machine parts, measuring, control and regulation circuits, wiring of machines, tools, devices, appliances and control cabinets.

This cable is suitable for torsion application in wind turbines (WTG). The torsional load is limited to applications, as they typically occur in the loop of a wind turbine.

USE gemäß N: Internal wiring.

USE gemäß A: Cables for internal or external interconnection with or without mechanical abuse.

Design

Design acc. to UL AWM Style 21576, CSA C22.2 No. 210-15

> based on EN 50525-2-21 and EN 50525-2-51

Certification £ AWM Style 21576 (File No. E63634)

AWM I A/B, II A/B (File No. E63634)

Conductor fine wire strands of bare copper, acc. to EN IEC 60228 resp. EN 60228, class 5

Insulation PVC compound (UL/CSA 80 °C rating)

Core identification code acc. to VDE 0293-1, with or without GN/YE ground conductor

black cores with white numbers acc. to EN 50334

Cable assembly cores stranded in layers with short lay length

Wrapping soft fleece tape (optional) laminated fleece tape Screen

on top:

braid of tinned copper wires, coverage = 85 % (nominal value)

Outer sheath LAPP TPU-Special Blend

Colour: black, similar RAL 9005

Electrical properties at 20 °C

Specific volume resistivity $> 20 \text{ G}\Omega \text{ x cm}$

Transfer impedance max. 250 m Ω /m (at 30 MHz) Nominal voltage EN U₀/U: 300/500 V Rated voltage UL/CSA: 1000 V

Test voltage core / core: 4000 V AC core / screen: 3000 V AC

Mechanical and thermal properties

up from 10 x outer diameter Minimum bending radius flexing:

fixed installation: 4 x outer diameter

EN: -5°C up to +70°C max. conductor temperature Temperature range flexing:

UL: -5°C up to +80°C max. conductor temperature fixed installation: EN: -40°C up to +80°C max. conductor temperature

> UL: up to +80°C max. conductor temperature

Bending cycles and power chain

See Selection Table A2-1 in the appendix of our online catalogue

operation parameters For use in power chains: Please comply with assembly guideline Appendix T3

Torsional stress TW-0 (5000 cycles at $\geq +5$ °C) TW-1 (2000 cycles at \geq -20°C)

± 150 °/m at 1 revolution per minute

ÖLFLEX® CHAIN 819 CP

Flammability flame retardant acc. to IEC 60332-1-2 resp. EN 60332-1-2

UL: horizontal flame

CSA: FT2

UV resistance acc. to EN 50620

EN ISO 4892-2-2013, method A (change of colour allowed)

Oil resistance acc. to EN 50363-4-1, TM5

Tests acc. to IEC 60811 EN 60811, EN 50395, EN 50396, UL 1581 and CSA C22.2

General requirements These cables are conform to the EU-Directive 2014/35/EU (Low Voltage Directive)

Environmental information These cables meet the substance-specific requirements of the EU Directive 2011/65/EU (RoHS).
