## Application

H07RN-F, enhanced version are heavy duty rubber insulated /rubber sheathed cables designed for connecting equipment for heavy stress and connecting industrial and agricultural machines where cables underlie medium mechanical stress. (e.g. machine tools, hot plates, lamps, electrical tools).
In compliance with recommended application acc to. DIN EN 50565-2, H07RN-F, enhanced version is suitable for use in dry, damp or wet rooms as well as outdoors. Fixed installation such as on plaster in provisory buildings and barracks are allowed. Continuous operational movements, restricted guidance, usage of these cables in moving cable carriers or on motor drum guidance or under a strain of more than $15 \mathrm{~N} / \mathrm{mm}^{2}$ conductor cross section are not allowed. Arrangements made of single-core, rubber-sheathed cables H07RN-F can be used for short circuit-proof and short-to-ground-proof installations acc. to DIN VDE 0100-520.
Enhanced application fields through additional characteristics:

- halogen-free material with low smoke density in the event of fire: Improved appropriateness for rooms and closed coverage locations with above-average concentration of human beings, animals or assets
- improved cold flexibility: minimum temperature $-40^{\circ} \mathrm{C}$ for flexible use
- improved temperature range: maximum conductor temperature $+90^{\circ} \mathrm{C}$ instead of $+60^{\circ} \mathrm{C}$
- normed ozone resistance, broadened temperature range and UV-resistance (due to black outer sheath), commonly higher outdoor durability
- long time water submersion (AD8) down to 100 m without interruption (chlorine and sea water permissible, no drinking wa-ter, water temperature from $+5^{\circ} \mathrm{C}$ to $+40^{\circ} \mathrm{C}$, only mostly lentic water without streaming)
- Drip loop torsion resistant: as torsion cable in the drip loop ("cable loop") of windmills/ wind turbine generators be-tween the nacelle and the tower

## Design

Design
Certification
Conductor
Insulation
Core identification code

Outer sheath
acc. to EN 50525-2-21
The cable is characterized with the $\triangleleft H A R \triangleright$ HAR-sign or HAR-identification thread.
fine wire strands of bare copper, acc. to IEC 60228 resp. EN 60228, class 5
special rubber
up to 5 cores: colour-coded acc. to VDE 0293-308 starting at 6 cores: black cores with white numbers special rubber, black

## Electrical properties at $20^{\circ} \mathrm{C}$

Nominal voltage
Test voltage

Uo/U: $450 / 750 \mathrm{~V}$ (up to 1000 V AC at protected, static laying acc. to DIN EN 50565-2) 2500 V AC

## Mechanical and thermal properties

| Minimum bending radius | flexible: $6 x$ outer diameter fixed: $4 \times$ outer diameter |
| :---: | :---: |
| Temperature range | flexible: $-40^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}$ max. conductor temperature |
| Torsional stress | Torsion movement in wind turbine generators TW-0 (5000 cycles at $\geq+5^{\circ} \mathrm{C}$ ) <br> TW-2 ( 2000 cycles at $\geq-40^{\circ} \mathrm{C}$ ) <br> $\pm 150^{\circ} / \mathrm{m}$ at 1 revolution per minute |
| Flammability | acc. to IEC 60332-1-2 resp. EN 60332-1-2 |
| Halogen free | acc. to IEC 60754-1 resp. EN 60754-1 |
| Corrosivity of gases | acc. to IEC 60754-2 resp. EN 60754-2 |
| Smoke density | acc. to IEC 61034-2 resp. EN 61034-2 |
| Weather and UV resistance | acc. to EN ISO 4892-2 |
| Oil resistance | acc. to EN 50363-2-1 |
| General requirements | These cables are conform to the EU-Directive 2014/35/EU (Low Voltage Directive) |
| Environmental information | These cables meet the substance-specific requirements of the EU Directive 2011/65/EU (RoHS). |
