

Resisto 1500 IP66 30W 4200lm 840 CT  
0010251

Caractéristiques de la gamme

• Resisto 1500 IP66 30W 4200lm 840 CT - Solution étanche Led en polycarbonate. Étriers coulissants en inox 301 et platine LED fixée à la vasque. Pré-perçage aux extrémités pour 1 ou 2 presse-étoupes et pré-perçage pour alimentation par le milieu. Température de couleur 4000K, IRC80. Flux lumineux sortant 4000lm. Puissance consommée 30W. Efficacité lumineuse : 133lm/W. Version câblage traversant (CT). Facteur de puissance : 0,95. Taux de distorsion harmonique : 20%. Durée de vie (L80) : 69.000h. Risque photobiologique RG1, IP66, IK08. T...

| Overall performance | 104.2         | 247.5                   | 1.50       |                          |                                              |

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design :  
Manufacturing :  
Materials :  
Ecosystem :
- Covering topics such as design for long life and repair  
Additive and subtractive techniques and localisation  
Usage of recyclable materials rather than virgin  
Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
