

Caractéristiques de la gamme

• OptiClip - Luminaire architectural unique, à modules LED interchangeables. Solution éco-responsable permettant le remplacement des modules LED uniquement, avec système plug & play. Facilité de maintenance. Installation : encastré, en saillie ou suspendu. Dimensions : 1200x300x52mm. Caisson en Acier zingué RAL 9016. Diffuseur polycarbonate Opale avec reflecteur blanc. Equipé d'un bornier de repiquage LiLo. Flux lumineux : 3100 lm. Efficacité lumineuse : 119 lm/W. Température de couleur : 3000K. IRC 80. Angle de faisceau 85°. Luminanc...

| Product design      | 90            | 134.0                   | 2.7        | 0.0 to 0.5               | Very poor circular economy performance       |
| Manufacturing       | 24.2          | 46.5                    | 2.1        | 0.5 to 1.5               | Some circular economy functionality          |
| Materials           | 6             | 24.0                    | 1          | 1.5 to 2.5               | Definite/substantial progress to circularity |
| Ecosystem           | 34            | 43.0                    | 3.2        | 2.5 to 4.0               | Excellent circularity                        |
| Overall performance | 154.2         | 247.5                   | 2.25       |                          |                                              |

Technical Memorandum (TM) 66 describes a Circular Economy’s main aims, how it can be achieved and what it’s practice will mean to the different branches of our industry like specifiers, manufacturers, contractors, and Facilities Managers.

The Circular Economy Assement Method for Manufacturing (CEAM-Make)’s list of 66 searching questions, the majority of which askfor back-up evidence, is split into four sections :

- Product Design :  
Manufacturing :  
Materials :  
Ecosystem :
- Covering topics such as design for long life and repair  
Additive and subtractive techniques and localisation  
Usage of recyclable materials rather than virgin  
Repair or upgrade services to complement circular economy design

The outcome of the assement is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product’s performance in the context of a Circular Economy
