

# CSI

CSI comes from French “Commande de Secours Intégrée” meaning integrated emergency command. By using a CSI motor the rolling shutter or the awning can be operated manually with a crank.

**To integrate and use CSI motors, specific accessories, detailed in this part of the catalogue, must be used.**

Included in this chapter :

- CSI Brackets: specific motor brackets for CSI motors, they have the same characteristics and respond to the same technical requirements as the other motor brackets.
- CSI Accessories: all the accessories dedicated to the CSI motors use.
- Cranks
