Einbauleuchte | Recessed Luminaire | Luminaire encastré | Lampada ad incasso
Serie | Series | Série | Serie: P40E#

Montageanleitung | Assembly Instruction | Instructions de montage | Istruzioni di montaggio

Sicherheitshinweis

Die Montage, der Anschluss und die Inbetriebnahme dieser Leuchte darf nur durch eine autorisierte Elektrofachkraft erfolgen. Vor dem Arbeiten Spannung abschalten. Jede nicht in der Montageanleitung beschriebene Veränderung an dieser Leuchte ist verboten (Gewährleistung). Nur in trockenen, explosionsfreien Räumen montieren. Es sind alle landesüblichen Normen, Vorschriften und Hinweise zu beachten.

Safety Instructions

Assembly, connection and commissioning of this luminaire must be carried out by an authorized electrician. Disconnect voltage supply before starting any work. Warranty void if luminaire is modified in any way not described in these instructions. Assemble in a dry room free of any explosion hazards. All local standards, regulations, codes and instructions shall be observed.

Consignes de sécurité

Le montage, le raccordement et la mise en service de ce luminaire doivent uniquement être effectués par un électricien agréé. Coupez le courant avant de commencer l'installation. Toute modification du luminaire non précisée dans les instructions de montage est interdite (garantie). Le luminaire doit être monté dans des pièces sèches, ne présentant aucun risque d'explosion. Les normes, directives et consignes du pays dans lequel le luminaire est installé doivent être respectées.

Istruzioni di sicurezza

Il montaggio, la connessione e la messa in servizio di questo apparecchio devono essere eseguite esclusivamente da personale qualificato. Sconnettere la corrente prima di iniziare l'installazione. Tutte le modifiche apportate all'apparecchio, non esplicitamente descritte nelle istruzioni, sono vietate ed influenzeranno la durata della garanzia. Il montaggio deve essere eseguito in ambiente asciutto e senza rischio d'esplosioni. Tutte le norme, gli standard e le direttive locali devono essere rispettate.

LED – Sicherheitshinweise

Mechanische Belastungen der Bauteile auf den LED Modulen sind zu vermeiden! Bei der Montage dürfen die LED – Platinen nicht beschädigt, unterbrochen oder berührt werden. Nur eine Elektrofachkraft darf die Installation von LED Modulen (mit Konverter) unter Beachtung aller gültigen Vorschriften und Normen vornehmen. Auf Maßnahmen gegen ESD ist während der Montage zu achten. ESD Electro Static Discharge (engl.) = Elektrostatische Entladung. Bei der Ansteuerung der HCL-Leuchten ist unbedingt zu beachten, dass die Summe der beiden Einzelkanäle nicht 100% überschreiten darf.

Safety Instructions for LED Lights

Do not expose LED modules to mechanical pressure. Do not touch any exposed LED components during installation or service. Use proper ESD (Electro Static Discharge) protective measures when installing or servicing the fixture, failure to do so may result in damage to LED components from static discharge upon contact. When controlling HCL luminaires it is important to remember that the sum of the two individual channels must not exceed 100%.

Consignes de sécurité pour les luminaires LED

Aucune contrainte mécanique ne doit être exercée sur les modules LED. Lors du montage, les platines LED ne doivent pas être touchées, endommagées ou cassées. L'installation de modules LED (et convertisseurs) doit être uniquement effectuée par un électricien agréé, conformément aux directives et normes applicables. Les mesures de protection contre la décharge électrostatique (DES) doivent être appliquées lors de l'installation. Pour la gestion des luminaires HCL, il faut bien veiller à ce que la somme des 2 canaux individuels ne dépasse pas 100 %.

Istruzioni di sicurezza per lampade LED

Non esporre i moduli LED ad alcuna pressione meccanica. Durante il montaggio o la manutenzione i chip LED non devono essere toccati, danneggiati o rotti. L'installazione dell'apparecchio e del driver deve essere effettuato da personale qualificato conformemente alle direttive e normative applicabili. Usare, durante il montaggio, tutte le misure di protezione richieste contro le scariche elettrostatiche ESD. Per il controllo degli apparecchi con tecnologia HCL e' importante ricordare e verificare che la somma dei due canali singoli non ecceda il 100%.
