

KLASSIFIZIERUNG ZUM BRANDVERHALTEN NACH DIN EN 13501-1:2010-01

No. of Classification Report:

K-2300/536/15-MPA BS

Client:

ERICO BV
Jules Verneweg 75
5015 BG Tilburg
The Netherlands

Issued by:

Materialprüfanstalt für das Bauwesen
Beethovenstraße 52
38106 Braunschweig
Germany

Number of the notified testing laboratory:

0761-CPD

Product name:

Inlays for pipe clamps made of EPDM-
SBR Rubber and Silicone Rubber

Issue number:

1st issue

Issued on:

13/5/2016

Validity:

Not restricted

This Classification Report consists of 7 pages and 24 annexes

This Classification Report may not be circulated unless as a complete text without any alterations. Excerpts and abridged versions of this document are subject to approval in writing of MPA Braunschweig. Translations of this document that are made without the approval of the Testing House must bear the note "translation of the German original not examined by the Materials Testing Institute" in Braunschweig. The first sheet of this document and the page carrying the signatures bear the official stamp of MPA Braunschweig. Documents that do not carry a signature and the official stamp are invalid. The test material has been fully used.

1 Introduction

This Classification Report defines the classification that is assigned on the basis of the test method specified in DIN EN 13501-1 to the construction products that are described below.

2 Details of the classified construction products

2.1 General

The tested products made of EPDM-SBR Rubber and the tested products made of Silicone Rubber are Inlays for pipe clamps for suspension of stationary non-insulated pipe lines.

Designation of the compliance of the classified products made of EPDM-SBR Rubber and Silicone Rubber can be found in annex 1-24.

2.3 Description of the products

The tested products are described in detail in the Test Report that is listed in section 3.1 below and on which this classification is based.

3 Test reports and test results for classification

3.1 Test Report

Name of testing laboratory	Client	Number of the Test Report	Test method / date
MPA Braunschweig	ERICO BV	2300/536/15 of 13/05/2016	EN ISO 11925-2:2011-02

3.2 Test results

3.2.1 Test results for the "EPDM-SBR Rubber" products

Test method	Parameter	Number of tests	Test results	
			Continuous parameters (mean value)	Discrete parameters
EN ISO 11925-2				
Flames applied to surface 15 s	$F_s \leq 150 \text{ mm}$	21	-	Complied with
Burning droplets/falling burning particles	Ignition of the filter paper	21	-	Complied with
Flames applied to edge 15 s	$F_s \leq 150 \text{ mm}$	21	-	Complied with
Burning droplets/falling burning particles	Ignition of the filter paper	21	-	Complied with

3.2.2 Test results for the "Silicone Rubber" products

Test method	Parameter	Number of tests	Test results	
			Continuous parameters (mean value)	Discrete parameters
EN ISO 11925-2				
Flames applied to surface 15 s	$F_s \leq 150 \text{ mm}$	14	-	Complied with
Burning droplets/falling burning particles	Ignition of the filter paper	14	-	Complied with
Flames applied to edge 15 s	$F_s \leq 150 \text{ mm}$	14	-	Complied with
Burning droplets/falling burning particles	Ignition of the filter paper	14	-	Complied with

4 Classification and field of direct application

4.1 Classification basis

This classification was made in compliance with DIN EN 13501-1:2010-01, section 11.

4.2 Classification

The following reaction-to-fire performance class is assigned to the tested products "EPDM-SBR-Rubber" and "Silicone Rubber":

E

The additional product classification regarding smoke production is:

No requirements

The additional product classification regarding burning droplets/falling burning particles is:

Compliance

The classification format for the reaction to fire of building products in accordance with table 1 in DIN EN 13501-1 is:

Reaction-to-fire		Smoke production			Burning droplets	
<i>E</i>	--	--	--	--	--	--

Reaction-to-fire classification: E

4.3 Field of application and product parameters

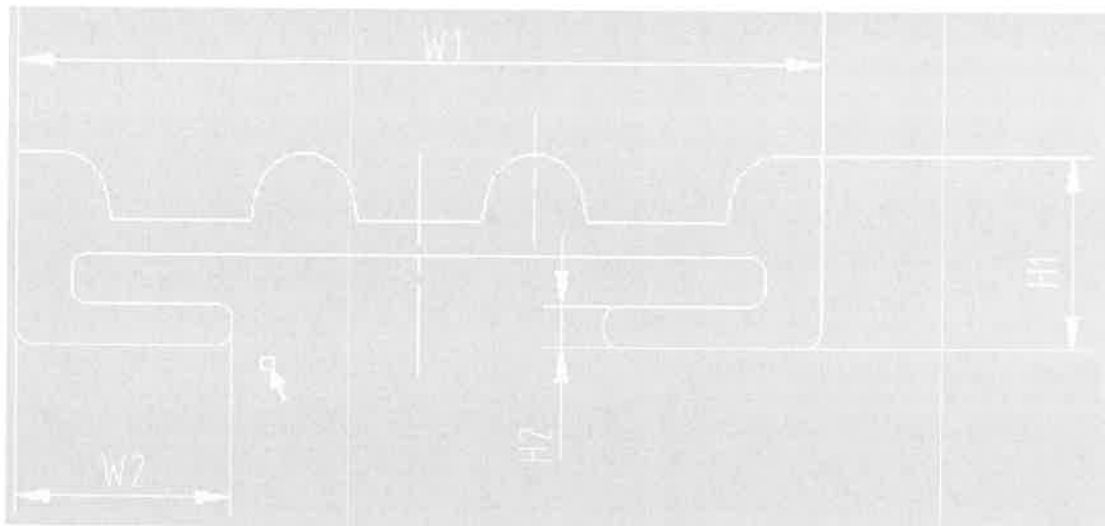

4.3.1 Field of application and parameters of the "EPDM-SBR Rubber" products

The classification in section 4.2 for the product applies to the following product fields of application and/or product parameters:

- Product parameter

Product	Parameter	The classification applies to
Inlays	Type	EPDM-SBR Rubber
	Density	1040 kg/m ³ - 1135 kg/m ³
	Dimensions	
	W1	21,6 mm – 47 mm
	H1	4,6 mm – 14,5 mm
	H2	1 mm – 2,5 mm
	W2	5 mm – 9,5 mm
	colours	black, white
Subsoil	Connection with other products	Only direct application on metal subsoil for the practical application with a melting point $\geq 1000^{\circ}\text{C}$, thickness $\geq 0,8$ mm and density ≥ 5850 kg/m ³

- Field of application: use as Inlays for pipe clamps

Picture 1: Exemplary sketch

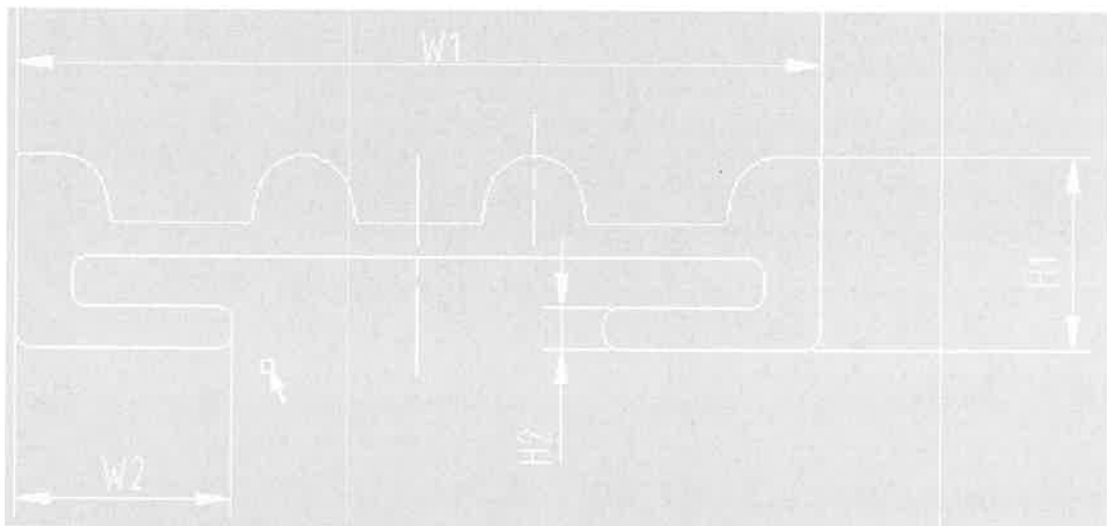

4.3.2 Field of application and parameters of the "Silicone-Rubber" products

The classification in section 4.2 for the product applies to the following product fields of application and/or product parameters:

- Product parameter

Product	Parameter	The classification applies to
Inlays	Type	Silicone-Rubber
	Density	1150 kg/m ³ ± 50 kg/m ³
	Dimensions	
	W1	28 mm – 47 mm
	H1	6,7 mm – 10,3 mm
	H2	1,3 mm – 2,5 mm
	W2	5,25 mm – 8 mm
	colours	red
Subsoil	Connection with other products	Only direct application on metal subsoil for the practical application with a melting point ≥ 1000°C, thickness ≥ 0,8 mm and density ≥ 5850 kg/m ³

- Field of application: use as Inlays for pipe clamps.

Picture 2: Exemplary sketch

5 Additional information

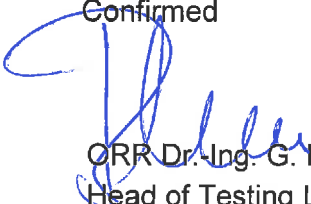

- 5.1 This Classification Report is not a type approval or product certification document, and it does not replace the approval that may be required under the German building law (State Government Building Regulations).
