

BLUE MOULD PROTECT

Technical Data Sheet

Product name:	Blue Mould Protect	Creation date:	26/01/2017	Version:	I
				Replaces:	0

1: General description

Highly visible transparent blue coloured corrosion inhibitor for protection of the mould tools and equipment during a short period of inactivity. No need for cleaning as the product moulds off during the first production cycles.

2: Features

Thanks to its low surface tension, Blue Mould Protect displaces humidity on metal surfaces and forms a very thin wet film protective coating.

- Silicone-free
- Excellent coverage.
- Neutralises fingerprints.
- Does not require removal prior to production
- Chemically inert for alloys and non-ferrous metals.
- 360° valve allows to use the product upside down.
- NSF registration N° 140207 class H2

3: Applications

- Protection against corrosion of metallic moulds or parts stored outdoors, under shelter. Parts should be degreased, clean and dry prior to application.

4: Directions

- Spray an even coating from a distance of 20cm
- A safety data sheet (SDS) according to EC Regulation N° 1907/2006 Art.31 and amendments is available for all CRC products.

5: Typical product data (without propellant)

- | | | |
|----------------------|---|----------------|
| • Colour: | : | Blue |
| • Odour | : | Characteristic |
| • Density (at 20 °C) | : | 0,716 g/cm³ |

6: Packaging

Aerosol

12x500 ML

All statements in this publication are based on service experience and/or laboratory testing. Because of the wide variety of equipment and conditions and the unpredictable human factors involved, we recommend that our products be tested on-the-job prior to use. All information is given in good faith but without warranty neither expressed nor implied.

This Technical Data Sheet may already have been revised as a result of a change in legislation, availability of components or newly acquired experiences.
