

S: Standard termination

Notes:

Dimension: mm

Special terminations can be made as requested.

T: Solder tabs

P: Axial pins

Important Notes

Do not short or charge the battery.

Over-discharging, crushing, incinerating, and disassembling the battery are prohibited.

Do not heat/use the battery beyond the permitted temperature range.

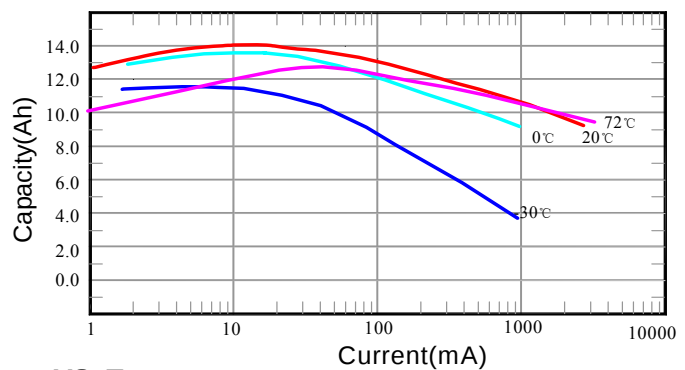

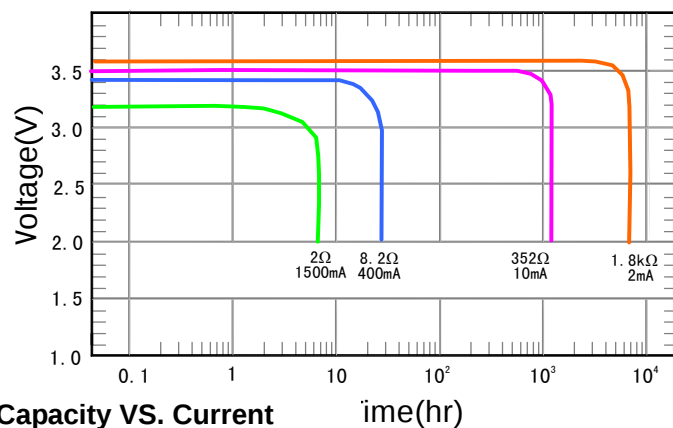

ER346 15M

SPECIFICATION: (23±2°C)

Nominal capacity (10mA~2V):	14.0Ah
Rated voltage:	3.6 V
Max constant current of discharge:	2000mA
Max discharge current(pulse):	3000mA
Weight:	118g
Operating temperature range:	-55~85°C

Discharge characteristics at 23±2°C

Voltage VS. Temperature
