	Outdoor Air (OA)	-15°C(*1)~43°C 80%RH or less																										
	Return Air (RA)	5°C~40°C 80%RH or less																										

- * Air volume can be changed over to high (extra high) mode or low mode at both heat exchange and normal ventilation modes.
- * Sound pressure level is measured 1.5m below the center of the unit, and the value which was measured at the acoustic room.
- * Sound pressure levels usually become higher than above values by the influence of actual installation condition such as reflected sound and peripheral noise.

*1) When the temperature of the outdoor air is below -10°C, the unit runs cold operation mode(intermittent operation of the ventilation for air supply). The unit cannot be used at -15°C or less.

The ventilator for air supply stops, and the ventilator for air exhaust also can be stopped by the setting.

The unit cannot be used at -15°C or less.

The ventilator for air supply stops, and the ventilator for air exhaust also can be stopped by the setting.

2. Dimensions

VN-M150HE

■ Attention

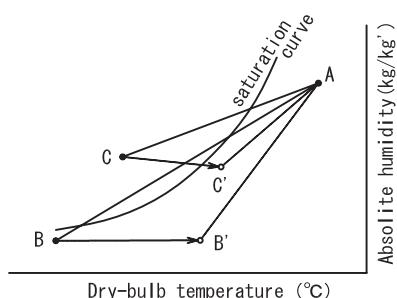

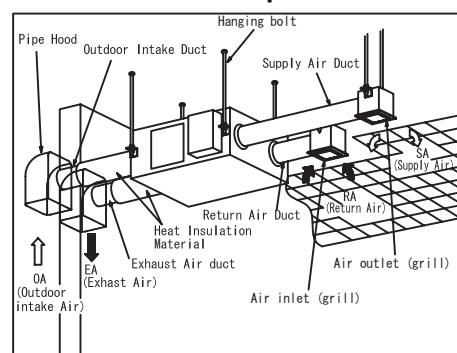

1. Duct size (Nominal Diameter): $\phi 100$
2. The above dimensions do not include the thickness (5 mm) of the insulation material on the unit body.

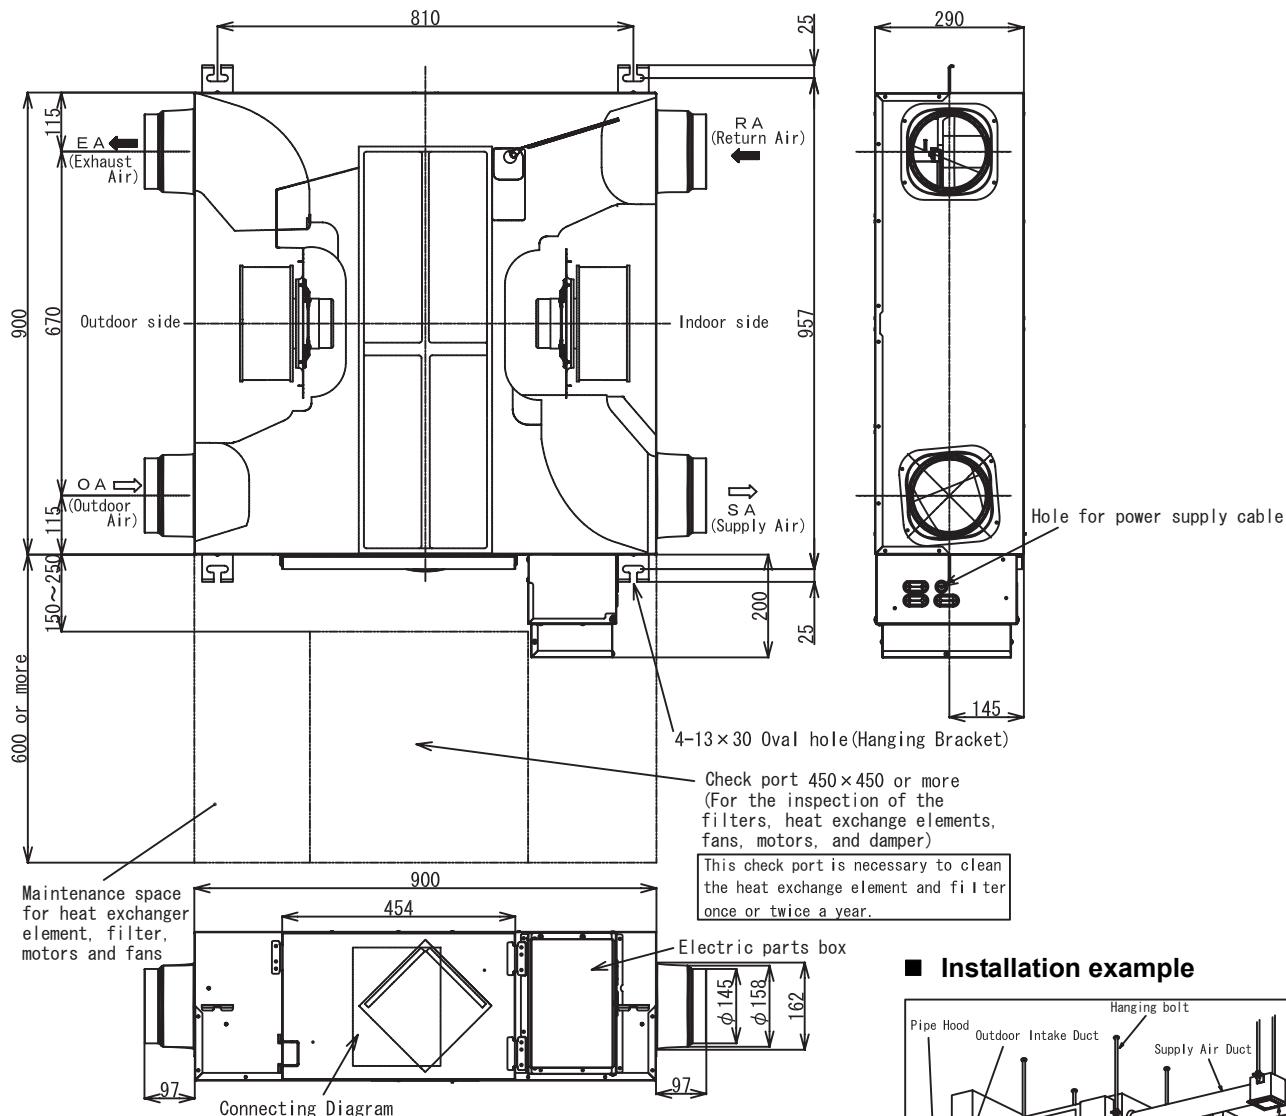

■ Attention

1. The two outdoor ducts (the Outdoor air Duct and the Exhaust air Duct) must be insulated to prevent condensation (Material: Glass wool, Thickness: 25 mm)
2. It is recommended that you use an electric damper together with the Air to Air Heat Exchanger, as wind may enter the room while the unit is not in operation in the cold or windy region.
3. As shown in the psychrometric chart, Point A is suction air condition in high temperature, Point B is discharge air condition in low temperature and Point C is the air condition that exchanged heat.

If C is located at the left of the saturation curve as shown, it is dewed or frosted in the heat exchanger element of the unit. In this case to prevent the dew or frost, be sure to heat B up to B' for making C C'(right side of saturation curve).

■ Installation example

3. Wiring diagram

VN-M150HE, VN-M250HE, VN-M350HE, VN-M500HE, VN-M650HE, VN-M800HE, VN-M1000HE

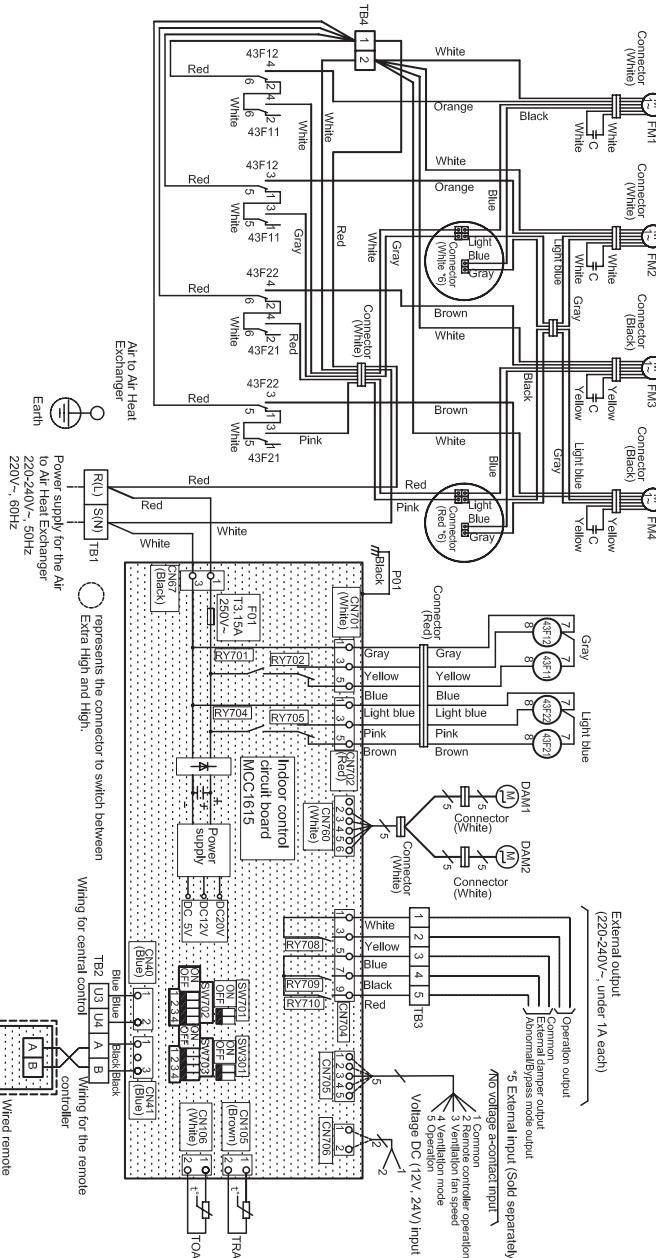

Code	Part name
CN***	Connector
F01	Fuse
FM1	Air supplying motor
FM2	Air exhausting motor
DAM	Damper motor
TRA	TRA sensor

Code	Part name
TOA	TOA sensor
RY701, RY702	Relay for air supplying motor
RY704, RT705	Relay for air exhausting motor
TB1	Terminal block (power supply)
TB2	Terminal block (communication)
TB3	Terminal block (external output)

Code	Part name
SW301, SW701 SW702, SW703	DIP switch
43F11, 43F12	Relay for air supplying motor
43F21, 43F22	Relay for air exhausting motor

- The dotted line represents a wire procured locally, and the dashed line represents an option sold separately.
- represents a terminal block, —○— represents a connection terminal, and ○—○— represents a connector on the printed circuit board.
- represents a protective earth.
- represents a printed circuit board.
- Using a no voltage a-contact input of the external input (Sold separately), the following operations are available:
 - Between 1 and 2: Selecting the remote controller operation (Invalid/Valid)
 - Between 1 and 3: Adjusting the ventilation fan speed (Low/High)
 - Between 1 and 4: Selecting the ventilation mode (Bypass mode/Heat exchange mode)
 - Between 1 and 5: Operation (ON/OFF)
- Use a microcurrent contact (DC12V, 1mA). In addition, ON/OFF operation is possible when using a voltage of DC12V or 24V.
- Blue wire (High) is connected as factory default. To switch to "Extra High", connect black wire's connector instead of blue.
- When the temperature of the outdoor air is below -10°C, the unit runs in the cold mode (the ventilator for air supply runs intermittently). The unit cannot run when the temperature of the outdoor air is below -15°C. The ventilator for air supply stops running and the ventilator for air exhaust also stops depending on the settings.
- Even if "Bypass mode" is selected manually, the unit switches to "Heat exchange mode" automatically to prevent condensation when the temperature of the outdoor air is below 15°C. However, "Bypass mode" is still displayed.
