3. How to install

1 Removing the remote controller panel

- 1) Untie the cords of the air inlet grille and remove the air inlet grille.
- 2) Unfasten the two screws fastening the upper cabinet. Lift up the upper cabinet and remove it.
- 3) Unfasten the two screws fastened on the back of the upper cabinet and remove the foam cover.
- 4) Push out the remote controller panel through the back of the upper cabinet and remove it.
- 5) Give the removed remote controller panel to the user and ask them to keep it together with the Installation Manual.

2 Installation of Cover kit

- 1) Attach the Cover kit to the position of the remote controller panel removed in 4) of **1** above.
- 2) Attach the foam cover to the upper cabinet using the two screws from 3) of **1** above.
- 3) Attach the upper cabinet and intake grill to the main body by reversing the procedure of **1** above.
