

NOVUSMAST

Amplification unit for grounding

DESCRIPTION

NOVUSMAST mast amplifier with 32 ultra-selective UHF filters. Includes 1 UHF input ($G > 40$ dB), 1 UHF input with built-in preamplifier ($G > 50$ dB), and 1 FM-DAB-BIII input ($G > 12$ dB). Output level 94 dB μ V compliant with DIN 45004B. Individual filter programming and adjustment via patented Visual mode. TEST output usable as second output. 12V power supply not included.

ADVANTAGES

- 32 ultra-selective UHF filters for precise reception
- UHF and FM-DAB-BIII inputs with gains over 40 dB, 50 dB, and 12 dB
- TEST output usable as a second output for monitoring
- Individual filter adjustment via patented Visual mode
