

Rack PDU G3+

New features 2019	G3+ range	G3 range
Extra flat breaker: avoid accidental tripping	V	
P-Lock & eGrip plugs: secure your IEC power cable	V	
Alternating Phase 3P-32A: Natural load balancing	V	
Stronger mounting system	V	
Daisy chain up to 3 sensors: Collect more environmental data's per rack	V	1
Cybersecurity enhancement	V	1
USB Smart Commissioning Tool (Coming later): Fast individual configuration deployment	V	1

1. available with the latest firmware 4.x or later

Outlets with dual built-in security mechanism

eGrip system to secure standard IEC power cables (Eaton's patentpending) with a lever-actuated grip that's integrated into each outlets. Once the levers click into the grip position, the plugs are secured from accidental disconnect due to bumps or vibrations. Outlets are also compatible with a locking system usine IEC P-Lock power

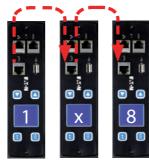

Hot-swap capability

Daisy chain eight units from one IP address

Eaton's new patented daisy-chain capability allows up to eight ePDUs to share the same network connection and IP address. Eaton technology provides a 87% percent reduction in network infrastructure costs.

Natural load balancing by design

Alternating phase per section on all 3 Phase 32A ePDUs to naturally balanced the rack power load using shorter cables.

	Phase	1	Phase	2	Phase 3		Phase	e 1	Phase	2	Phase	3

Quickly identify load protection and phase with color coded sections

One color for each phase, one letter per breaker protection.

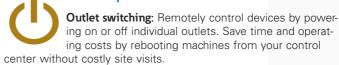

Provide zero interference into the rail space

New extra flat breakers and low-profile form factor chassis to avoid accidental tripping.

Upgrade your power distribution

Control power at server level

Sequential start up: Make sure your servers start sequentialy to avoid in rush current and start your database before the application.

Turn off unused outlets: Control unauthorized use.

Daisy Chain Sensor

Daisy chain up to 3 sensors per rack PDU to get more environmental data's from your rack. Each sensor has 1 temperature probe, 1 humidity probe and 2 dry contacts.

Cybersecurity enhancement

The firmware is updated on regulary basis to keep the ePDU cybersecurity to highest standard

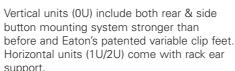

High 60°C operating temperature

Fully functional in high operating temperature environments, resulting in reduced cooling costs.

Universal mounting system

Accurate Power Measurement

grade power monitoring for higher accuracy in department billing or colocation data centers. Effectively measure power usage to all outlets or individual outlets.

Device reboot and measurement across A and B feed

When connecting multiple source input servers to an A and B feed power source, the daisy-chain capability allows you to group power supplies across the ePDU. As a result, all the power supplies are controlled with a single action, which saves time rebooting servers with two to six power supplies. The power consumption is available for each device.

Accessories	Part Number	Benefits
Environmental Monitoring Probe (EMP) Gen 2	EMPDT1H1C2	Get live measurement on temperature, humidity, set threshold and be notified in real time
Adaptor Fast Ethernet Gigabit	GBCONV	Quick and easy way to upgrade your 10/100 Mb network interface G3 ePDU to Gigabit speed
ePDU to UPS cables	CBLOUT32 CBL2OUT32	Connect an ePDU 32A input to the hardwire output UPS
Water leak detector*	WLD012	Detect floods and water leaks
Door contact sensor*	DCS001	Monitor your rack access

^{*}Door contact sensor and water leak detector can be connected through EMPDT1H1C2 dry $\,$

DCS001*

WLD012*

CBL2OUT32

CBLOUT32

All ePDU G3 come with a 2 years warranty as

Standard product Warranty can be extended of 1 additional year (Warranty+1) or 3 additional years (Warranty+3)

^{*} Basic G3 features not applicable for the FlexPDU range All standard ePDUs come with 3m cable

Need Something Special? We make your custom ePDUs, please contact your local reseller. Standard models above are stocked in Europe.

Need Something Special? Your perfect Rack PDU on demand

Dedicated engineering teams to create your perfect Rack PDU on demand. Specific configurations or complete engineering projects

Typical requirements:

- Halogen free material, national socket types, specific number of C13/C19 outlets
- Colored ePDUs on demand to easily identify power source feed

Dual ePDU packaging on demand to reduce environmental impact.

Add power redundancy solution for mono power supply devices

Eaton ATS are designed to provide power supply redundancy for single connection equipment. With ATS, power from two independent sources can be supplied to IT equipment, which have only one input power supply.

Both sources (primary and secondary) are connected in a straightforward manner to the ATS in the base of the rack. The Eaton ATS then controls the redundancy of this electrical power supply.

If the primary source fails, transfer to the secondary source is automatic and instantaneous.

IPM Editions, Understand and Manage your power infrastructure

IPM Understand Edition helps to bridge the gap between facility and IT management by providing you just enough information, when you need it and where you need it.

Understand Edition

Understand your power chain infrastructure

- Monitoring of Eaton and many 3rd party power devices
- Power & Environmental reports
- Trending analysis
- Control your load balancing and power redudancy

Eaton collaborates with the leaders in converged and hyper-converged infrastructures

Our lab-validated power management solutions ensure high uptime of IT systems and data integrity in case of power and environmental issues.

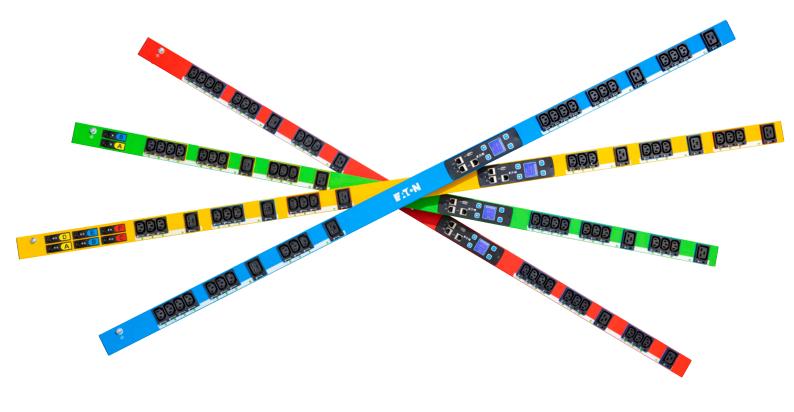

New Rack PDU Selector

rackpduselector.eaton.com/gb

From, input plugs to form factors and measurement features, Eaton's RackPDU selector tool can help you find the right solution for your specific $\ensuremath{\mathsf{IT}}$ needs.
