

ROHS Certificate of Compliance

Directives 2002/95/EC, 2011/65/EU and the amended Annex II – Directive 2015/863 of the European Parliament and Council on the restriction of the use of certain hazardous substances in electrical and electronic equipment (commonly known as the ROHS 3 Directive) restricts the use of 10 substances in the manufacture of certain types of electrical and electrical equipment.

The following products put on to the market by Tapeswitch Ltd. do not contain any of the restricted substances in concentrations higher than the limits specified in the Directive and therefore comply with its requirements. These Tapeswitch® products are actually components, which are not legally within the scope of the Directive, and so cannot themselves be called “ROHS compliant”. However, they will not have any detrimental effect on the ROHS compliance of end-products or systems into which they are built.

Relevant Tapeswitch® Products

Ribbon switches

All types including DaDo panic strips

Sensing edges

All types

Sensing mats – touch pads – foot switches

All types

Safety mats

All types

Control units

All types

I certify to the best of my knowledge, based on available information conducted to me, as follows:

Specifically, products manufactured by Tapeswitch Ltd, do not contain the substances listed in the directives, in concentrations greater than the respectively defined maximum values.
