Manufacturer's Declaration regarding the Use of Luminaires in IFS-Certified Companies (International Featured Standard 6)

We confirm that the luminaires listed in the attached table have been developed and produced in line with International Featured Standard 6 guidelines, in particular with regard to shatter protection, contamination deposits and hygiene cleaning. Since successful certification is situation dependent and is awarded for the company as a whole it is advised to check the appropriate luminaire type for the corresponding installation site in the table. Further optimum lighting solutions are available on request. This certificate as PDF can also be found at our website attached to the concerned products.

Sincerely

i.V. Harro Naggert
