

Data Sheet

FTC - Flow Temperature Control

Sensor / Thermostatic Controller

Application:

The flow temperature control (FTC) is used to regulate & maintain fluid temperature for hydronic floor or radiator heating systems. FTC is a self-acting thermostatic sensor, which can be combined with two-way valve body types

RA2000 (normally used with straight valve configuration) & RA-C.

The water temperature is measured by a surface sensor, which is mounted directly on the pipe surface by means of a strip (enclosed with the product). The snap-lock connector of the sensor element allows a quick and firm connection to the valve without the need for tools.

FTC features:

- Closes on rising sensor temperature
- Temperature scale on the dial (in Celsius)
- Choice of temperature setting ranges:
- 15° - 50°C (60° - 122°F) or 35° - 70°C (95° - 158°F)
- Valve & sensor can be mounted on supply or return piping

Ordering information:

Code No.	Temp Range	Type	Description	
013G5081	60 - 122°F (15 - 50°C)	FTC	Self-acting thermostatic operator with remote sensor. Celsius temperature scale on dial.	
013G5080	95 - 158°F (35 - 70°C)			
Available valves for mounting of FTC				
Code No.	Type	Size	Description	Cv
013G8015	RA 2000	1/2"	Straight valves, NPT female x male union tpcs.	1.6
013G8020		3/4"		2.7
013G8025		1"		2.8
013G8032		1-1/4"		2.8
013G8042		1/2"	Straight valves, double solder unions	1.6
013G8044		3/4"		2.7
013G3094	RA-C	1/2"	Straight valves, without tpcs. or union nuts*	1.39
013G3096		3/4"		3.82
* Tailpieces (tpcs.) & union nuts required for RA-C valves (Choose two union nuts & two tpcs.)				
013U0496		1/2" Union Nut		
013U8608		1/2" Female Solder Tailpiece		
013U0476		1/2" Male NPT Tailpiece		
013U0499		3/4" Union Nut		
013U8609		3/4" Female Solder Tailpiece		
013U0479		3/4" Male NPT Tailpiece		

Application:

Mounted to valve style	RA2000, RA-C valves
Capillary length	6.5ft (2 m)
Max. pressure	145 psi (PN 10 bar)
Max. diff. pressure, Δp	8.7 psi (0.6 bar)
Test pressure	232psi (16 bar)
Max. flow temperature	248°F (120°C)
Max. ambient temperature	149°F (65°C)

System Layouts:

Design:

1. Socket
2. Bellows
3. Setting dial
4. Reference mark
5. Limiter
6. Spring
7. Spindle
8. Safety spring
9. Capillary tube
10. Sensor base
11. Sensor housing
