

Ref. 9630 MARINE PUSHBUTTON

**DESCRIPTION**

Spare parts kit with a push button and card holder for the Marine and Marine Classic Panels.

The Marine Call buttons are:

- Vandal-resistant, manufactured in stainless steel, with a flush surface and an anti-block system, which can resist any impact.
- The amplifier emits a confirmation sound when the call button is pressed.
- The buttons include a card holder to insert a label with the name of the householder and the door number. Integrated illumination allows you to view the cardholders, even in complete darkness.
- They are metal and rounded in shape, in line with the rounded panel design.
- The buttons's card holder is made of 6 mm thick polycarbonate, a material which is resistant to impact and high temperatures.

Fermax Marine Line stainless steel.

Marine is the range of vandal-proof panels made of 2.5mm-thick stainless steel. Straight lines that highlight the quality of the steel. Cutting-edge technology and resistance to even the most corrosive, humid and dangerous environments.
