

Overview

ACOUSTIC SIGNALS - INDUSTRIAL - PIEZO BUZZER

The AE35M (P40) piezo buzzer is a versatile acoustic signal tailored for security systems, process control, and a broad spectrum of industrial applications that require a compact yet powerful acoustic signal.

This buzzer delivers a robust single-stage alarm that can be configured for either pulsed or continuous tone, with easy selection facilitated by a third wire. Designed for convenience, the AE35M features external mounting lugs for straightforward installation, making it a reliable choice for environments that demand clear and effective alerts in a compact form.

If you require a bigger model, please refer to our AE36M Datasheet.

Features

- Continuously rated
- Economical
- Suitable for panel or surface mounting
- Higher sound output
- Compact design
- Available in 12/24vDC

Material

- Off White ABS Plastic

IP30

Up to 92dB (A) @ 1m

Pulsed or Continuous

3200 Hz*

-20 to +60°C
