IS-SB

Overview ACOUSTIC & VISUAL SIGNALS - INTRINSICALLY SAFE - LED SOUNDER/BEACON

The Moflash Intrinsically Safe IS-SB Series is a reliable signalling solution for fire, security and hazardous environments, approved for explosive atmospheres in both Group I (mining) and Group II (above ground) applications. Designed to meet strict safety standards, it provides a visual & acoustic warning where traditional electrical equipment cannot be used safely.

Fully certified to EN54-3, for areas with flammable gases, dust, or vapours, the IS-SB Series ensures safety and compliance with international standards. Its Group I approval suits underground mining and methane or coal dust environments, while Group II approval makes it ideal for above-ground industrial sectors like oil, gas, and chemical plants.

The IS-SB Series combines nine SMT LEDs with two modes **(flashing or static)** and a two-stage alarm with 32 tones up to 105dB, configurable via DIP switches on the PCB for synchronized or independent operation.

For safety and compliance, the units must be powered through a suitably rated and approved Zener Barrier or Galvanic Isolator. **Please note that 1 barrier/isolator must be used to power each product.**

Features

- Flashing or Static
- 120° light output around the horizontal axis
- Diode Polarised & End of Line resistor compatible
- Suitable for ceiling or wall mounting
- 2 Stage Alarm
- 32 Selectable Tones
- Cable entry : 3 x M20
- Available in 24vDC
- Group I (Mining) & Group II (Above Ground)
- Zone: Gas 0, 1, 2 & Dust 20, 21, 22

Material

- Flame Retardant Polycarbonate UL94 V2

*Flashes Per Minute   **dB is dependent on the Tone selected

System Installation

The IS Sounder/Beacon must be installed in accordance with the latest IEC & EN 60079-0, IEC & EN 60079-11 standards or equivalent IEC standards, with consideration for any local installation requirements, and should only be carried out by appropriately competent and qualified personnel.

Moflash Signalling is not able to offer any assistance with additional system parameters beyond that included on the installation sheet, and can not give advise on individual system installations. The system integrators should be contacted for any additional installation requirements.

Accessories

WARNING: Connection into these Sounder/Beacons must be via a suitably rated Zener Barrier or Galvanic Isolator.

Never connect the Sounder/Beacons directly to the voltage supply without a Barrier in place. Failure to do so will result in permanent damage to the PCB & void the warranty.

Product		Description	Part Code	Weight
Zener Barrier		**Single Channel DC** Zener Barrier Single Barrier DC Z 728 (IS)	071788	0.150
		Single Channel AC Zener Barrier Single Channel AC Z 928 (IS)	071857	0.150
