The intelligent load management tool SMARTcharge automatically ensures smart distribution of the available electricity and ensures electric vehicles are charged in a flash. User-friendly monitoring and management options – from simple status queries to controlling or prioritizing charging processes increase the overview and make it easier to control a charging network. Also, the installation of SMARTcharge, as well as the integration of a PV system is simple, as the intuitive installation guide tells exactly what to do. Therefore, the system is ready for use in the shortest possible time and the surplus from the PV system can be used directly
